### NEW QUESTION # 142

A SlicerDicer session in a dashboard component, using the Patients data model, returns no data despite correct filters and an enabled dashboard. The session is linked to Caboodle, and some users report no visibility or drill-down capability. What are the causes, and how should they be addressed?

- A. The component's data source is misconfigured, and the session is outdated; align the data source and rebuild the session.
- B. The Patients data model is disabled, and the dashboard is not interactive; enable the data model and configure interactivity.
- C. The session's Report Group is misaligned, and the data source is incorrect; align the Report Group and switch to Chronicles.
- D. The data is not extracted to Caboodle, and users lack Report Group or activity link security points; schedule ETL processes, update the Access form, and configure a Hyperspace activity link.

**Answer: D**

### NEW QUESTION # 143

A Reporting Workbench report, sourced from Chronicles, fails to execute for some users due to a custom filter for high-cost patients, despite a trace log and Ready for Use status. The report groups data by department and calculates cost variance, but some users report no benchmarking export. What are the issues, and how should they be resolved?

- A. Users lack access to the custom filter's security class and benchmarking export permissions; update their security settings and enable export in Report Settings.
- B. The report's Report Group is misaligned, and the dashboard is not enabled; update the Access form and enable the dashboard.

- C. The report's data source is set to Clarity, and export is disabled; switch to Chronicles and enable export.
- D. The high-cost filter is not enabled in SlicerDicer, and the session is outdated; rebuild the filter and session.
