## Free PDF Quiz 2026 Apple DEP-2025: Valid Exam Apple Deployment and Management Exam Study Guide

Web-based Apple Deployment and Management Exam (DEP-2025) practice exam is a convenient format to evaluate and improve preparation for the exam. It is a DEP-2025 browser-based application, which means you can access it from any operating system with an internet connection and a web browser. Unlike the desktop-based exam simulation software, the Apple Deployment and Management Exam (DEP-2025) browser-based practice test requires no plugins and software installation. It makes the Apple DEP-2025 online practice exam a perfect tool for those who do not want to go through complicated software installation on their device.

### Apple DEP-2025 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Apple Business Manager and Apple School Manager: This section of the exam measures the skills of an MDM Specialist and covers managing connections to resellers and managing device suppliers. It emphasizes the use of Apple Business Manager or School Manager to streamline large-scale deployments.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Device Security: This section of the exam measures the skills of an MDM Specialist and covers encryption on Apple platforms, FileVault operations, and the importance of key management. It focuses on protecting sensitive data on managed devices.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>Apple Configurator: This section of the exam measures the skills of an IT Administrator and covers the usage of Apple Configurator in enrollment, supervision, and deployment of Apple devices. It includes an overview of its features and setup processes.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Device Setup: This section of the exam measures the skills of an MDM Specialist and covers strategies and use cases for managing Setup Assistant via MDM. It also covers the configuration of enrollment-related settings and pane options.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Prepare Your Environment: This section of the exam measures the skills of an IT Administrator and covers the important factors involved in evaluating and preparing the environment for a successful MDM implementation. It emphasizes strategic planning before rollout.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>Device Configuration: This section of the exam measures the skills of an IT Administrator and covers declarative configuration properties and how they relate to the device enrollment type. It ensures that configurations align with organizational needs.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>Identity Services: This section of the exam measures the skills of an MDM Specialist and covers supported identity services on Apple devices, including Platform SSO and Single Sign-On, helping users manage secure access and authentication.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>Network Integration: This section of the exam measures the skills of an IT Administrator and covers assessing network responsiveness and device connectivity. It also covers wireless auto-join behavior on Apple devices and ensures strong network coverage.</li> </ul>

## Apple Deployment and Management Exam Sample Questions (Q153-Q158):

### NEW QUESTION # 153

What's the name of Apple's portal that allows IT administrators to manage device enrollment, app licenses, and content?

- A. Managed Apple ID portal
- B. Apple Business Manager**
- C. Apple Configurator
- D. Apple School Manager

### Answer: B

Explanation:

Apple Business Manager (ABM) is Apple's web-based portal designed for IT administrators in businesses to manage device enrollment (via Automated Device Enrollment), purchase and distribute app licenses, and assign content like books. Apple School Manager (option C) serves a similar purpose but is tailored for educational institutions. Apple Configurator (option B) is a macOS app for device configuration, not a portal. There's no "Managed Apple ID portal" (option D); Managed Apple IDs are managed within ABM or ASM. The question's broad scope fits ABM for business contexts, as per the Apple Platform Deployment Guide.

### NEW QUESTION # 154

What is required to use Managed Lost Mode?

- A. Supervision**
- B. Find My
- C. Activation Lock
- D. Managed Apple Account

### Answer: A

Explanation:

Supervision is required for Managed Lost Mode. The iOS Deployment Reference states, "Managed Lost Mode is an MDM feature available only on supervised devices, allowing administrators to lock and locate lost devices." References: iOS Deployment Reference, "Managed Lost Mode" section.

Mobile Device Management Protocol Reference, "Lost Mode Requirements" section.

### NEW QUESTION # 155

Where do you upload the content token to enable Managed Distribution of apps and books?

- A. Your MDM solution
- B. Your Apple Business Manager account
- C. Your Kerberos server
- D. Your identity provider (IdP) system

**Answer: A**

Explanation:

For organizations to distribute apps and books purchased through Apple Business Manager (ABM) or Apple School Manager (ASM), the content token (also called a server token) must be uploaded into the MDM solution. Apple documentation explains that the token authorizes the MDM to sync licenses and distribute them to devices or users. The token is first generated and downloaded from ABM/ASM, then installed into the MDM. Uploading the token anywhere else (such as an IdP or Kerberos server) would not link app licensing to MDM. Once uploaded, licenses purchased in ABM appear automatically in the MDM portal for assignment. This workflow ensures apps remain organizational assets and can be reassigned as needed.

References: Apple Business Manager User Guide - "Upload server tokens to MDM for Managed Distribution."

### NEW QUESTION # 156

Which type of enrollment is ideal for devices you need to distribute to multiple users in multiple regions?

- A. User Enrollment
- B. **Automated Device Enrollment**
- C. Device Enrollment

**Answer: B**

Explanation:

Automated Device Enrollment (ADE) is ideal for distributing devices to multiple users across multiple regions because it allows enrollment in an MDM solution without physically handling the devices. Devices are pre-registered in Apple Business Manager or Apple School Manager, and upon setup, they automatically enroll in MDM, streamlining deployment at scale. Device Enrollment (option A) requires manual profile installation, impractical for large, dispersed deployments. User Enrollment (option B) is suited for BYOD, not organization-owned devices distributed widely. The Apple Platform Deployment Guide recommends ADE for such scenarios.

### NEW QUESTION # 157

What's the benefit of using Managed Apple IDs?

- A. Simplifies enrollment
- B. Allows personalization
- C. **Enables organizational control**
- D. Improves network performance

**Answer: C**

Explanation:

Managed Apple IDs, created via Apple Business Manager (ABM) or Apple School Manager (ASM), enable organizational control by allowing administrators to manage accounts, restrict features (e.g., iCloud backups), and integrate with MDM for policy enforcement. This contrasts with personal Apple IDs, which prioritize user autonomy. Personalization (option A) is limited with Managed Apple IDs. Network performance (option C) is unrelated, and simplified enrollment (option D) pertains to ADE, not IDs. The Apple Platform Deployment Guide emphasizes control as the key benefit.

Reference: Apple Platform Deployment Guide (Chapter: Managed Apple IDs).

## NEW QUESTION # 158

The software version of our DEP-2025 study engine is designed to simulate a real exam situation. You can install it to as many computers as you need as long as the computer is in Windows system. And our software of the DEP-2025 training material also allows different users to study at the same time. It's economical for a company to buy it for its staff. Friends or workmates can also buy and learn with our DEP-2025 Practice Guide together.
