

Salesforce Mule-101 Valid Test Discount, Mule-101 Practice Questions

2026 Latest FreeDumps Mule-101 PDF Dumps and Mule-101 Exam Engine Free Share: <https://drive.google.com/open?id=1GiCnfETA4zZdnkVmxreJ5w1Gy6OSh4BX>

The client can try out and download our Mule-101 training materials freely before their purchase so as to have an understanding of our product and then decide whether to buy them or not. The website pages of our product provide the details of our Mule-101 learning questions. You can see the demos which are part of the all titles selected from the test bank and the forms of the questions and answers and know the form of our software on the website pages of our Mule-101 study materials.

The job with high pay requires they boost excellent working abilities and profound major knowledge. Passing the Mule-101 exam can help you find the job you dream about, and we will provide the best Mule-101 question torrent to the client. We are aimed that candidates can pass the Mule-101 exam easily. The Mule-101 Study Materials what we provide is to boost pass rate and hit rate, you only need little time to prepare and review, and then you can pass the Mule-101 exam. It costs you little time and energy, and you can download the software freely and try out the product before you buy it.

Hot Mule-101 Valid Test Discount | Reliable Salesforce Mule-101 Practice Questions: Salesforce Certified MuleSoft Integration Foundations

Now you do not need to worry about the relevancy and top standard of FreeDumps Salesforce Certified MuleSoft Integration Foundations in Mule-101 exam questions. These Salesforce Mule-101 dumps are designed and verified by qualified Mule-101 exam trainers. Now you can trust FreeDumps Mule-101 Practice Questions and start preparation without wasting further time. With the FreeDumps Mule-101 exam questions, you will get everything that you need to learn, prepare and pass the challenging Mule-101 exam with good scores.

Salesforce Certified MuleSoft Integration Foundations Sample Questions (Q23-Q28):

NEW QUESTION # 23

CloudHub is an example of which cloud computing service model?

- A. Platform as a Service (PaaS)
- B. Monitoring as a Service (MaaS)
- C. Software as a Service (SaaS)
- D. Infrastructure as a Service (IaaS)

Answer: A

Explanation:

PaaS (Platform as a Service): CloudHub is MuleSoft's managed integration platform. In the NIST cloud model, it falls under iPaaS, which is a specialized form of PaaS.

The Model:

MuleSoft manages: The underlying infrastructure (AWS EC2 instances), operating systems, updates, security patching, and the Java/Mule Runtime environment.

Customer manages: The application code (Mule apps) and data.

Why it is not IaaS: In IaaS (like raw AWS EC2), the customer would be responsible for installing the OS, Java, and patching the server. In CloudHub, this is abstracted away.

NEW QUESTION # 24

During a planning session with the executive leadership, the development team director presents plans for a new API to expose the data in the company's order database. An earlier effort to build an API on top of this data failed, so the director is recommending a design-first approach.

- A. Publishing the fully implemented API to Exchange so all developers can reuse the API
- B. Building MUnit tests so administrators can confirm code coverage percentage during deployment
- C. Developing a specification so consumers can test before the implementation is built
- D. Adding global policies to the API so all developers automatically secure the implementation before coding anything

Answer: C

Explanation:

Design-First Approach: This methodology prioritizes creating the API contract (RAML/OAS) before writing any code¹⁹.

The Benefit: By defining the specification first and publishing it to Exchange (often with a Mocking Service), API consumers (frontend developers or other teams) can test and provide feedback on the design immediately.²⁰ This ensures the API meets business needs before the expensive work of backend implementation begins, preventing the failure described in the scenario^{21,22,23} Why others are incorrect:

Publishing fully implemented API (C): This is a "Code-First" approach (build first, share later).

Global Policies (B): Relates to governance, not the design methodology.

NEW QUESTION # 25

According to MuleSoft, which system integration term describes the method, format, and protocol used for communication between two systems? ⁴

- A. Component
- B. Interaction
- C. Interface
- D. Message

Answer: C

NEW QUESTION # 26

An organization is choosing between API-led connectivity and other integration approaches.

- A. Higher outcome repeatability through centralized development
- B. Improved security through adoption of monolithic architectures
- C. Increased developer productivity through self-service of API assets

- D. Greater project predictability through tight coupling of systems

Answer: C

Explanation:

The Value Proposition: A primary goal of API-led connectivity is to close the IT delivery gap. It achieves this by turning APIs into reusable Assets published to Exchange. 8 Self-Service: When assets are discoverable, other developers (e.g., Line of Business developers) can reuse them without waiting for central IT to build everything from scratch. This "Self-Service" model significantly increases overall developer productivity.

Why others are incorrect:

Tight Coupling (B): API-led promotes loose coupling. Tight coupling makes systems brittle and hard to change (Point-to-Point).

Centralized Development (C): Creates a bottleneck. API-led enables federated development.

Monolithic (D): API-led breaks monoliths into composable services (Microservices/APIs).

NEW QUESTION # 27

According to MuleSoft, what is a major distinguishing characteristic of an application network in relation to the integration of systems, data, and devices?

- A. It uses a well-organized monolithic approach with standards
- B. It uses CI/CD automation for real-time project delivery
- **C. It is built for change and self-service**
- D. It leverages well-accepted internet standards like HTTP and JSON

Answer: C

Explanation:

The Application Network: MuleSoft defines an application network as a network of applications, data, and devices connected with APIs to make them pluggable and reusable.

Built for Change: Unlike rigid point-to-point integrations, an application network is designed to be flexible. Because the nodes (APIs) are reusable and discoverable, the network can evolve and change as business needs change without breaking existing connections³.

Self-Service: By publishing these APIs to Exchange, developers across the organization can discover and reuse them (Self-Service), facilitating the "bottom-up" emergence of the network.

NEW QUESTION # 28

.....

FreeDumps has hired professionals to supervise the quality of the Mule-101 PDF prep material. Laptops, tablets, and smartphones support the Salesforce Mule-101 test questions PDF file. If any taker of the Salesforce Mule-101 test prepares thoroughly with our exam product he will crack the exam of the credential on the first attempt.
