

2026 Useful 100% Free HPE7-J02–100% Free Brain Dump Free | Useful Advanced HPE Storage Integrator Solutions Written Exam Dumps

BONUS!!! Download part of ValidExam HPE7-J02 dumps for free: <https://drive.google.com/open?id=1PtnFtXZGbApKz0JuQVhGrFvXYkvuaynA>

The web-based HPE7-J02 practice test is accessible via any browser. This HPE7-J02 mock exam simulates the actual HP HPE7-J02 exam and does not require any software or plugins. Compatible with iOS, Mac, Android, and Windows operating systems, it provides all the features of the desktop-based HPE7-J02 Practice Exam software.

By unremitting effort to improve the accuracy and being studious of the HPE7-J02 real questions all these years, our experts remain unpretentious attitude towards our HPE7-J02 practice materials all the time. They are unsuspecting experts who you can count on. Without unintelligible content within our HPE7-J02 Study Tool, all questions of the exam are based on their professional experience in this industry. Besides, they made three versions for your reference, the PDF, APP and Online software version.

Useful HPE7-J02 Dumps & HPE7-J02 Related Certifications

As we all know, it is not easy to get promotion. For the first thing, you must be good at finishing your work excellently. At the same time, you must accumulate much experience and knowledge. If you urgently want to stand out in your company, our HPE7-J02 exam guide can help you realize your aims in the shortest time. For not only that our HPE7-J02 Study Materials can help you know more knowledge on the subject and our HPE7-J02 practice engine can help you get your according certification.

HP Advanced HPE Storage Integrator Solutions Written Exam Sample Questions (Q17-Q22):

NEW QUESTION # 17

A customer is replacing their HPE 3PAR 8200 Peer Persistence setup with Alletra 6000. In a recent audit, they were warned that the Quorum Witness VM was missing security updates.

How would you respond regarding the new setup?

- A. Quorum witness appliance can be set to automatically download and apply available updates.
- B. Quorum witness is installed as a service on a supported Linux server, which can be updated as needed.
- **C. Quorum witness is deployed as a SaaS option, and security updates are applied automatically.**
- D. Quorum witness appliance security patch updates follow the array release train updates.

Answer: C

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

With Alletra and Primera Peer Persistence, the Quorum Witness is no longer a self-hosted VM. It is delivered as a cloud-based SaaS service managed by HPE. This eliminates customer responsibility for patching and ensures HPE automatically applies updates and security fixes. This resolves the audit concern.

Distractors:

A: Applies to older 3PAR environments, not Alletra/Primera.

C/D: Quorum Witness is no longer an appliance - it is SaaS managed, so these don't apply.

Key Concept: Alletra Quorum Witness is SaaS-managed, removing patching responsibility.

Reference: HPE Alletra Peer Persistence and Cloud Quorum Witness Guide.

NEW QUESTION # 18

You need to evaluate a customer virtual server environment to size an HPE Block storage solution according to the metrics seen on the system over a period of time. The environment consists of Lenovo servers and Pure Storage as the storage vendor for a Microsoft Hyper-V cluster managed by Microsoft SCVMM.

Which HPE tools can you utilize to gather the usage metrics of this setup?

- A. Export the Microsoft System Center Virtual Machine Manager database for NinjaProtected analysis.
- **B. Import the HPE CloudPhysics.vhdx collector to the Hyper-V cluster to gather the analytics.**
- C. Install the SAFcollector agents into the environment and use SAFanalyze to import the agent output.
- D. Use the HPE InfoSight Primary Storage sizing tool to calculate the competitive performance metrics.

Answer: B

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

HPE CloudPhysics provides comprehensive environment assessment and competitive sizing for virtualized environments (VMware, Hyper-V, etc.). The CloudPhysics collector (available as a .vhdx for Hyper-V) is deployed into the cluster to gather metrics on CPU, memory, storage IOPS/latency, and utilization trends.

These analytics feed into the sizing of HPE storage solutions.

Distractors:

B: InfoSight sizing tools work with HPE systems, not competitive 3rd-party storage like Pure.

C: SAF is a manual assessment requiring email submission and is not the correct modern method for this case.

D: NinjaProtected applies to backup analysis, not production Hyper-V cluster sizing.

Key Concept: CloudPhysics.vhdx collector for Hyper-V sizing with 3rd-party infrastructure.

Reference: HPE CloudPhysics Assessment Guide.

NEW QUESTION # 19

A pool of Microsoft SQL servers started to use the Alletra 6000 family array six months ago. The data growth has been higher than expected, and the performance of the databases is facing some latency issues.

Which method would allow both capacity and performance to grow when expanding the array, while keeping the management simple?

- **A. By adding more arrays and capacity to a single scale-out group.**
- B. By including more NIC cards to load balance host traffic.
- C. By initially selecting the timeless storage option for the array.
- D. By selecting more flash to cache ratio on the expansion shelves.

Answer: A

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

HPE Alletra 6000 is a scale-out architecture array. Adding more arrays to a single scale-out group increases both performance (IOPS, throughput) and capacity, while maintaining single-pane management via HPE Data Services Cloud Console. This is the most efficient way to address both capacity growth and latency reduction for SQL workloads.

Distractors:

B: Adding NICs may help with throughput but not backend latency or capacity scaling.
C: Flash-to-cache ratios can optimize read caching but don't fundamentally increase system-wide performance.
D: Timeless storage is a procurement/licensing option, not a performance/capacity scaling method.
Key Concept: Alletra 6000 scale-out clustering for balanced growth of capacity and performance.
Reference: HPE Alletra 6000 Technical Architecture Guide.

NEW QUESTION # 20

Your customer is using 2 HPE StoreOnce appliances across 2 sites with replication enabled for disaster recovery. They are concerned about the fact that the StoreOnce administrators have full access to the systems, which allows them to delete backup copies on these systems.

What needs to be used to address the concern of your customer?

- A. Resource restriction policies
- **B. Dual Authorization**
- C. Challenge Handshake Authentication Protocol (CHAP)
- D. Data at rest encryption

Answer: B

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

HPE StoreOnce Dual Authorization prevents a single administrator from deleting, expiring, or modifying backup data. Instead, any destructive action requires approval from a second administrator, mitigating insider threats and accidental deletions. This is the correct feature for immutability protection in a replicated StoreOnce environment.

Distractors:

B (CHAP): Used for iSCSI authentication, not backup immutability.

C: Encryption protects data confidentiality, not accidental deletion.

D: Resource restrictions are policy-driven but don't enforce dual control over destructive actions.

Key Concept: Dual Authorization for ransomware and insider-threat protection on StoreOnce.

Reference: HPE StoreOnce Security Features White Paper.

NEW QUESTION # 21

You are working with a customer to upgrade their current VMware infrastructure. The hardware is outdated, and the customer has no information about performance requirements for the new servers and storage array.

You are using HPE CloudPhysics to run an assessment.

Which Card Deck will give you insights on the under- and overprovisioning of the current environment?

- A. Infrastructure Planning
- B. Reclaimable VMware vDisk Space
- **C. Simulator for VM Rightsizing**
- D. Storage Space Management

Answer: C

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

The Simulator for VM Rightsizing Card Deck in HPE CloudPhysics evaluates actual VM utilization against provisioned resources. It identifies under- and overprovisioned VMs, providing insights into reclaimable resources and accurate sizing recommendations. This directly helps plan server and storage upgrades.

Distractors:

A: Storage Space Management focuses on datastore usage trends, not provisioning mismatches.

B: Reclaimable VMware vDisk Space identifies unused storage, not CPU/RAM sizing.

D: Infrastructure Planning helps plan new builds but doesn't directly analyze current over/under provisioning.

Key Concept: VM Rightsizing = CloudPhysics tool for over/under provisioning analysis.

Reference: HPE CloudPhysics Card Decks Guide.
