Pass Guaranteed Quiz MS-721 - Collaboration Communications Systems Engineer Fantastic Test Answers

Our MS-721 test questions provide free trial services for all customers so that you can better understand our products. You can experience the effects of outside products in advance by downloading clue versions of our MS-721 exam torrent. In addition, it has simple procedure to buy our learning materials. After your payment is successful, you will receive an e-mail from our company within 10 minutes. In a matter of seconds, you will receive an assessment report based on each question you have practiced on our MS-721 test material. The final result will show you the correct and wrong answers so that you can understand your learning ability so that you can arrange the learning tasks properly and focus on the targeted learning tasks with MS-721 test questions. So you can understand the wrong places and deepen the impression of them to avoid making the same mistake again.

Microsoft MS-721: Collaboration Communications Systems Engineer (beta) exam consists of multiple-choice questions, drag-and-drop, and simulation-based questions. MS-721 exam duration is three hours, and the passing score is 700. MS-721 exam fee is \$165, and the exam can be taken online from anywhere in the world.

To earn the Microsoft MS-721 certification, candidates must demonstrate their expertise in designing and deploying collaboration and communication systems using Microsoft technologies. MS-721 Exam measures the candidate's ability to configure and manage Microsoft Teams, Skype for Business, Exchange Online, and SharePoint, as well as their knowledge of security and compliance requirements for collaboration and communication systems.

Microsoft Collaboration Communications Systems Engineer Sample Questions (Q180-Q185):

NEW QUESTION # 180

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company uses Microsoft Teams Calling Plans.

The company acquires a small development team. Currently, users on the team have their own direct inward dial (DID) numbers that have PSTN capabilities.

You migrate the users to Teams.

You need to ensure that the users have phone numbers.

Solution: From the Microsoft Teams admin center, you place a new order for service numbers.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoftteams/getting-service-phone-numbers>

NEW QUESTION # 181

You have a Microsoft Lync Server 2013 deployment.

Some users use Enterprise Voice.

You plan to migrate to Microsoft Teams.

You need to design a migration solution. The solution must minimize the impact on end users during the migration.

What should you include in the solution?

- A. Migrate all other users directly from Lync Server 2013 to Teams.
- B. Perform an in-place upgrade from Lync Server 2013 to Microsoft Skype for Business Server 2015, and then migrate all users to Teams.
- C. Migrate the Enterprise Voice users from Lync Server 2013 to Microsoft Skype for Business Server 2019. and then migrate the Enterprise Voice users to Teams.
- D. Migrate all users directly from Lync Server 2013 to Teams.

Answer: B

NEW QUESTION # 182

You create a network region Region1 in Microsoft Teams.
You are adding a network site to Region1. The site has a 1.5-Mb connection.
You need to ensure that all users at the site have a good voice experience.
What should you do?

- A. Assign the Region1 users a meeting policy that has a media bit rate of 1,500 Kbps.
- B. Create and assign a Teams Network Roaming Policy that has IP video disabled.
- C. Run the Microsoft 365 network connectivity test tool.
- D. Tag all traffic with a DSCP value of 46.

Answer: A

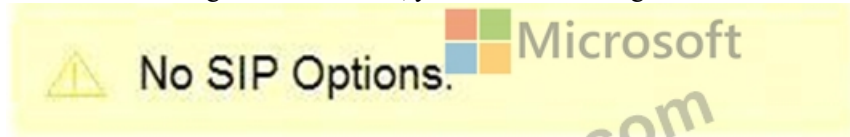

Explanation:

Reference:

<https://docs.microsoft.com/en-gb/powershell/module/skype/new-csteamsnetworkroamingpolicy?view=skype-ps>

NEW QUESTION # 183

You have a Microsoft Teams Phone deployment.
You are deploying Direct Routing.
All users have a SIP URI in the format of user@contoso.com. The Session Border Controller (SBC) is named sbc.voice.contoso.com.
When troubleshooting errors on the SBC, you receive the warning shown in the following exhibit.

The Session Border Controller exists in our database (your administrator created it using the command New-CSONlinePSTNGateway). It's configured to send SIP options but we never saw SIP options coming back from this SBC.
What is a possible cause of the issue?

- A. Microsoft 365 Phone System licenses are not assigned to the users.
- B. The certificate does not match the FQDN on the SBC.
- C. The firewall blocks inbound traffic on port 443 to the SBC.
- D. Only TLS 1.0 is enabled on the SBC.

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoftteams/troubleshoot/phone-system/direct-routing/sip-options-tls-certificate-issues>

NEW QUESTION # 184

Case Study 3 - Contoso, Ltd

Overview

Company Information

Contoso, Ltd. is an international manufacturing company that has 2,000 employees.

Contoso currently uses a third-party meeting service. The company plans to migrate the meeting service to Microsoft Teams and replace all legacy video teleconferencing (VTC) devices.

Physical Locations

Contoso has offices in Toronto, New York, Rome, and London. The company has a global sales team that works remotely.

Existing Environment

Active Directory Environment

The on-premises network contains an Active Directory Domain Services (AD DS) forest named contoso.com.

Microsoft 365 and Teams Environment

Contoso has a Microsoft 365 subscription. All users are licensed for Microsoft 365 E5 and Teams Premium. All users are enabled for Teams Phone by using Operator Connect.

The contoso.com domain syncs to Microsoft 365 by using Azure AD Connect cloud sync. All users use the Microsoft Authenticator app for multi-factor authentication (MFA) to cloud services.

A Microsoft Surface Hub device is deployed to the boardroom in each office.

The reception area at the Toronto office is configured to use a phone number of +14165555555 in Teams.

Problem Statements

Contoso identifies the following issues:

- A user in the London office cannot locate the recorded files from a recurring Teams meeting.
- Executives in the New York office report having to use Microsoft Authenticator to access their Microsoft OneDrive files from the Surface Hub.
- A user in the Toronto office reports receiving incoming calls while attending Teams meetings instead of having calls sent automatically to voicemail.

Requirements

Planned Changes

Contoso plans to implement the following changes:

- Deploy a new Teams-certified endpoint to all the boardrooms and huddle spaces in all the offices.
- Start a pilot project to deploy an Intelligent Speaker to the boardroom in the Rome office and evaluate transcription and voice attribution capabilities.
- Deploy a Teams shared device to the lunchroom in the Toronto office. Calls placed to +14165555555 must ring in both the reception area and the lunchroom.

Technical Requirements

Contoso identifies the following technical requirements:

- The endpoint deployed to each boardroom must include a console on the table. The endpoint must automatically invite the existing Surface Hub when joining a Teams meeting.
- The sales team must be able to temporarily sign in to the endpoints deployed to the huddle spaces to respond to Teams messages and attend video calls.
- The endpoints deployed to the huddle spaces must allow only outbound emergency calls when a user is NOT signed in.
- During Teams meetings, the sales team must have a watermark displayed on shared content.

You are evaluating the implementation of the technical requirements for the sales team.

After the implementation of the Watermark requirements, which meeting feature will the sales team be able to use during Teams meetings?

- A. Together mode
- **B. PowerPoint Live**
- C. meeting reactions
- D. Whiteboard

Answer: B

Explanation:

One of the key requirements is that a watermark should be displayed on shared content during Teams meetings. Watermarking is typically applied to content that is shared via PowerPoint Live.

PowerPoint Live allows users to share presentations securely, and when watermarks are enabled, they can be applied to all slides shared during the meeting. This is especially important for safeguarding sensitive content from unauthorized distribution during virtual meetings.

PowerPoint Live is tightly integrated with Microsoft Teams and allows presenters to share slides while also retaining full control over the meeting experience, including features like annotations, chat, and participant engagement. Watermarking is most relevant when confidential or proprietary information is presented, and PowerPoint Live is one of the primary ways to share such information securely.
