FreeDumps's products have favorable prices, and have quality assurance, but also to ensure you to 100% pass the exam.

ISACA Certified Information Security Manager Sample Questions (Q598-Q603):

NEW QUESTION # 598

What is the MOST important consideration when establishing metrics for reporting to the information security strategy committee?

- A. Agreeing on baseline values for the metrics
- B. Aligning the metrics with the organizational culture
- C. Developing a dashboard for communicating the metrics
- D. Benchmarking the expected value of the metrics against industry standards

Answer: B

Explanation:

The most important consideration when establishing metrics for reporting to the information security strategy committee is D. Aligning the metrics with the organizational culture. This is because the metrics should reflect the values, beliefs, and behaviors of the

organization and its stakeholders, and support the achievement of the strategic objectives and goals. The metrics should also be relevant, meaningful, and understandable for the intended audience, and provide clear and actionable information for decision making. The metrics should not be too technical, complex, or ambiguous, but rather focus on the key aspects of information security performance, such as risk, compliance, maturity, value, and effectiveness.

NEW QUESTION # 599

Which of the following is the BEST way to ensure that organizational security policies comply with data security regulatory requirements?

- A. Outsource compliance activities.
- B. Send the policies to stakeholders for review.
- C. Align the policies to the most stringent global regulations.
- **D. Obtain annual sign-off from executive management.**

Answer: D

NEW QUESTION # 600

Which of the following should be done FIRST when developing an information asset classification policy?

- A. Establish the criteria that define an asset's classification level.
- B. Obtain executive input to identify high-value assets to be classified.
- C. Identify existing security measures for protecting assets.
- **D. Identify accountability for information assets throughout the organization.**

Answer: D

NEW QUESTION # 601

In order to highlight to management the importance of network security, the security manager should FIRST:

- A. develop a security architecture.
- **B. conduct a risk assessment.**
- C. install a network intrusion detection system (NIDS) and prepare a list of attacks.
- D. develop a network security policy.

Answer: B

Explanation:

Explanation/Reference:

Explanation:

A risk assessment would be most helpful to management in understanding at a very high level the threats, probabilities and existing controls. Developing a security architecture, installing a network intrusion detection system (NIDS) and preparing a list of attacks on the network and developing a network security policy would not be as effective in highlighting the importance to management and would follow only after performing a risk assessment.

NEW QUESTION # 602

Senior management has just accepted the risk of noncompliance with a new regulation. What should the information security manager do NEXT?

- A. Update details within the risk register
- B. Reassess the organization's risk tolerance.
- C. Report the decision to the compliance officer.
- **D. Assess the impact of the regulation.**

Answer: D
