Enterprise-grade orchestration of models enables businesses to manage and deploy multiple AI models efficiently, ensuring scalability and performance across diverse use cases. Preconfigured content is not a primary feature of the Generative AI hub, and scalability and compliance of business documents are more aligned with SAP Document AI. The AI Ethics Steering Committee oversees governance, ensuring AI development aligns with ethical standards. Organizational practice involves embedding ethical considerations into business processes, training, and culture to promote responsible AI use. AI System engineering focuses on designing AI systems with transparency, fairness, and accountability, incorporating technical safeguards to mitigate bias and ensure reliability. Executive Sponsorship, while important for leadership support, is not a defined domain cluster, and AI System definition is not explicitly listed in SAP's framework. These clusters ensure SAP's AI solutions are trustworthy and aligned with global ethical standards.
