Features of CompTIA 220-1101 Desktop and Web-based Practice Exams

DumpsActual offers the 220-1101 exam questions in a convenient PDF format, allowing you to easily download them on your PC, laptop, Mac, tablet, or smartphone. With this accessibility, you can access the CompTIA 220-1101 PDF questions anytime and from anywhere. Having all the information about the CompTIA A+ Certification Exam: Core 1 (220-1101) Exam at your fingertips

enhances your studying experience, making it easier and more effective, whether you're at home or on the go.

CompTIA A+ Certification Exam: Core 1 Sample Questions (Q534-Q539):

NEW QUESTION # 534

An end user contacted a technician about a laser printer that was no longer printing images on the left side of the page. The technician replaced the toner cartridge, but the issue has persisted.

Which of the following should the technician perform NEXT?

- A. Clean the duplexing assembly.
- B. Realign the pickup rollers.
- C. Replace the imaging drum
- D. Calibrate the printer

Answer: C

NEW QUESTION # 535

A technician is replacing the toner cartridge in a laser printer. Which of the following steps should the technician complete first? (Select two).

- A. Open the toner compartment.
- B. Remove the sealing tape.
- C. Calibrate the printer.
- D. Check the expiration date of the cartridge.
- E. Run the cleaning utility.
- F. Ensure the cartridge is the correct model.

Answer: A,F

Explanation:

The technician is unable to access the company portal website, but other websites work fine. This suggests an issue with resolving the specific URL of the company portal, which is a function of DNS.

Here's why other options are not the most likely cause:

DHCP reservations: This is not relevant as the issue persists even when the technician tries a different workstation, indicating a problem beyond individual device configuration.

Static IP addresses: Similar to DHCP reservations, static IPs are not likely the cause as both affected workstations are experiencing the issue.

Default gateway: While the default gateway is necessary for internet access, other websites are working, making it less likely to be the root cause.

NEW QUESTION # 536

An end user's domain password expires while they are working from home. The end user tries to reset the password using Ctrl+Alt+Delete and then receives the following message:

Configuration information could not be read from the domain controller, either because the machine is unavailable or because access is denied.

Which of the following will resolve this issue?

- A. Restart the computer.
- B. Reset the account in Active Directory.
- C. Join the Wi-Fi network.
- D. Connect to the VPN.

Answer: D

Explanation:

To change a domain password from a remote location, the system must communicate with the domain controller. Since the user is working from home, they need to connect to the corporate VPN to establish that secure connection. Without it, the password

change cannot be authenticated.

* Option A: Restarting will not resolve the lack of connection to the domain controller.

* Option C: Resetting the password in AD could help, but doesn't let the user reset it themselves.

* Option D: The user may already be on Wi-Fi; the issue is with connecting to the corporate network, not local.

CompTIA A+ Core 1 Exam Objective Reference:

* Objective 1.6: Given a scenario, configure basic mobile device network connectivity and application support.

NEW QUESTION # 537

A drive failed on a server that was leveraging a RAID disk configuration. The server administrator would like to rebuild the array so it can withstand a potential multidrive failure in the future. Which of the following RAID configurations will the administrator MOST likely select?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

Explanation:

Explanation

RAID stands for Redundant Array of Independent Disks, which is a technology that combines multiple disks into a logical unit to improve performance, reliability, or both. There are different types of RAID levels that use different methods of data distribution and redundancy.

RAID 0 is a level that stripes data across multiple disks without any redundancy. It offers the highest performance but no fault tolerance. If any disk fails, the entire array is lost.

RAID 1 is a level that mirrors data across two disks. It offers the lowest performance but the highest fault tolerance. It can survive the failure of one disk.

RAID 5 is a level that stripes data across multiple disks with parity information. It offers a balance between performance and fault tolerance. It can survive the failure of one disk, but not two or more disks.

RAID 10 is a level that combines RAID 1 and RAID 0. It creates a striped array of mirrored pairs. It offers high performance and high fault tolerance. It can survive the failure of one disk in each pair, or multiple disks in different pairs.

Therefore, if the server administrator wants to rebuild the array to withstand a potential multidrive failure in the future, RAID 10 is the most likely choice.

NEW QUESTION # 538

Which of the following protocols provides the fastest bandwidth?

- A. 802.11ac
- B. 802.11ax
- C. 802.11a
- D. 802.11n

Answer: B

Explanation:

The 802.11ax protocol, also known as Wi-Fi 6, provides the fastest bandwidth among the options listed. It can achieve up to 10 Gbps of data transfer rate, using technologies such as OFDMA, MU-MIMO, and 1024-QAM. The 802.11ac protocol, or Wi-Fi 5, is the second fastest, with a maximum of 3.46 Gbps, followed by the 802.11n protocol, or Wi-Fi 4, with a maximum of 600 Mbps. The 802.11a protocol is the slowest, with a maximum of 54 Mbps.

NEW QUESTION # 539

.....

DumpsActual makes your 220-1101 exam preparation easy with its various quality features. Our 220-1101 exam braindumps come with 100% passing and refund guarantee. DumpsActual is dedicated to your accomplishment, hence assures you successful in 220-1101 Certification exam on the first try. If for any reason, a candidate fails in 220-1101 exam then he will be refunded his money

after the refund process. Also, we offer 1 year free updates to our 220-1101 Exam esteemed user, these updates are applicable to your account right from the date of purchase. 24/7 customer support is favorable to candidates who can email us if they find any ambiguity in the 220-1101 exam dumps, our support will merely reply to your all 220-1101 exam product related queries.
