It is a valuable certification that validates the knowledge and practical skills of product owners in delivering products that meet the requirements of customers, stakeholders, and the development team.

GAQM Certified Agile Scrum Product Owner (CASPO) Sample Questions (Q11-Q16):

NEW QUESTION # 11

Which one of the following is NOT a responsibility of a self-organized Developers? (Choose the best answer)

- A. Pull Product Backlog items for the Sprint
- **B. Reorder the Product Backlog**
- C. Do the work planned in accordance with the Definition of Done
- D. Determine the time for the Daily Scrum

Answer: B

Explanation:

Self-organization gives the Developers autonomy over their work execution, but not over Product Backlog ordering, which is the Product Owner's domain. The Scrum Guide states: "The Developers are the people in the Scrum Team that are committed to creating any aspect of a usable Increment each Sprint."

* A: Pulling items into the Sprint Backlog is their responsibility during Sprint Planning.

* B: Reordering the Product Backlog is the Product Owner's task: "Ordering Product Backlog items."

* C: Delivering "Done" work is their core duty.

NEW QUESTION # 12

When a Developers determines that it has over-committed itself for a Sprint, who has to be present when reviewing and adjusting the Sprint work selected? (Choose the best answer)

- **A. The Product Owner and the Developers.**
- B. The Product Owner and all stakeholders.
- C. The Developers.
- D. The Scrum Master, project manager, and Developers.

Answer: A

Explanation:

The Scrum Guide states that the Sprint Backlog is owned by the Developers, who are responsible for planning and executing the work to achieve the Sprint Goal. If they realize they've over-committed, they must adjust the Sprint Backlog. However, since the Product Owner is accountable for maximizing value and managing the Product Backlog, their involvement is critical to ensure adjustments align with value delivery and the Sprint Goal. The Scrum Guide notes: "The Product Owner may influence the Developers by helping them understand and select trade-offs." Option A includes a non-existent "project manager" role in Scrum, making it incorrect.

Option C involves stakeholders, who are not part of mid-Sprint adjustments (they provide feedback at the Sprint Review). Option D excludes the Product Owner, which is insufficient given their role. Thus, B is correct.

NEW QUESTION # 13

What outcome is expected as Scrum Teams mature? (Choose the best answer)

- A. The Scrum Master's role will no longer be necessary
- **B. Their Definition of Done will improve to be more stringent**
- C. Many of the Scrum events will be optional

Answer: B

Explanation:

As Scrum Teams mature, they improve quality and effectiveness. The Scrum Guide implies that the Definition of "Done" evolves: "As Scrum Teams mature, it is expected that their definitions of 'Done' will expand to include more stringent criteria for higher quality."

* A: Events remain mandatory for Scrum's structure.

* B: The Scrum Master remains vital for coaching and facilitation.

NEW QUESTION # 14

Which three purposes does the Definition of "Done" serve? (Choose the best three answers)

- A. Describe the purpose, objective, and time-box of each Scrum event.
- B. Describe the work that must be done before the Sprint is allowed to end.
- **C. Create a shared understanding of when work is complete.**
- **D. Increase transparency.**
- **E. Guide the Developers on how many Product Backlog items to select for the Sprint.**

Answer: C,D,E

Explanation:

The Scrum Guide explains the Definition of "Done" as "a formal description of the state of the Increment when it meets the quality measures required for the product".

* A: It increases transparency by making quality expectations visible to all.

* B: It creates a shared understanding of "complete" across the Scrum Team.

NEW QUESTION # 15

What happens if the Product Owner delegates the ordering of the Product Backlog? (Choose the best answer)

- A. Additional testers are added in the next Sprint
- B. The User Story is moved to the next Sprint
- **C. A risk of not creating a potentially shippable product occurs**
- D. The burndown chart is updated

Answer: C

Explanation:

The Product Owner is accountable for ordering the Product Backlog to maximize value. The Scrum Guide allows delegation of tasks but not accountability: "The Product Owner may do the above work, or may delegate the responsibility to others. Regardless, the Product Owner remains accountable." Delegating ordering risks misprioritization, potentially leading to an Increment that doesn't meet value goals or releasability.

* A, B, D: These are unrelated consequences.

NEW QUESTION # 16
