

Why do you need valid and updated Fortinet FCP_FMG_AD-7.6 Exam Questions?

DOWNLOAD the newest PDF4Test FCP_FMG_AD-7.6 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1reRjBNURAT-TJe2Rb-gAdektqyrAJiCO>

If you are a busy individual, you will have a short time to sit and study properly for the FCP_FMG_AD-7.6 exam. Finding the best route to quick learning is important because you are not a genius who can cover everything before the final attempt. You have to memorize real FCP - FortiManager 7.6 Administrator (FCP_FMG_AD-7.6) questions that will appear in the final FCP_FMG_AD-7.6 test. In this way, you can quickly prepare for the FCP_FMG_AD-7.6 examination.

Our online test engine and the windows software of the FCP_FMG_AD-7.6 study materials can evaluate your exercises of the virtual exam and practice exam intelligently. Our calculation system of the FCP_FMG_AD-7.6 study materials is designed subtly. Our evaluation process is absolutely correct. We are strictly in accordance with the detailed grading rules of the real exam. The point of every question is set separately. Once you submit your exercises of the FCP_FMG_AD-7.6 Study Materials, the calculation system will soon start to work.

Fortinet FCP_FMG_AD-7.6 Exam Score | FCP_FMG_AD-7.6 Practice Exam Pdf

Fortinet study material is designed to enhance your personal ability and professional skills to solve the actual problem. FCP_FMG_AD-7.6 exam certification will be the most important one. There are many study material online for you to choose. While, the FCP_FMG_AD-7.6 exam dumps provided by PDF4Test site will be the best valid training material for you. FCP_FMG_AD-7.6 study pdf contains the questions which are all from the original question pool, together with verified answers. Besides, the explanations are very detail and helpful after the FCP_FMG_AD-7.6 questions where is needed. You can pass your test at first try with our FCP_FMG_AD-7.6 training pdf.

Fortinet FCP_FMG_AD-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Policy and Objects: This section of the exam measures the skills of System Administrators and evaluates their ability to manage policies and objects within FortiManager. It involves ADOM revisions, workspace mode, and policy imports and installations, emphasizing consistent policy control across networks.
Topic 2	<ul style="list-style-type: none">• Advanced Configuration: This section of the exam measures the skills of Network Security Engineers and includes knowledge of high availability (HA), FortiGuard service configuration, and global database ADOM settings. These advanced functions help strengthen system reliability and streamline management at a larger scale.

Topic 3	<ul style="list-style-type: none"> This section of the exam measures the skills of System Administrators and focuses on resolving problems at different levels of FortiManager. Candidates must troubleshoot deployment scenarios, imports, installations, and both device-level and ADOM-level issues, as well as identify and resolve system problems effectively.
Topic 4	<ul style="list-style-type: none"> Device Manager: This section of the exam measures the skills of Network Security Engineers and focuses on registering devices within ADOMs and handling device configurations. Candidates also learn how to install changes through scripts and diagnose issues using the revision history.

Fortinet FCP - FortiManager 7.6 Administrator Sample Questions (Q51-Q56):

NEW QUESTION # 51

An administrator has enabled Service Access on FortiManager. What is the purpose of Service Access on the FortiManager interface?

- A. It allows FortiManager to determine the connection status of managed devices.
- B. It allows administrative access to FortiManager.
- C. It allows FortiManager to respond to requests for FortiGuard services from FortiGate devices.
- D. It allows third-party applications to gain read/write access to FortiManager.

Answer: C

Explanation:

Select the Fortinet services that are allowed access on this interface. These include FortiGate Updates and Web Filtering. Service access is not enabled on any port by default.

NEW QUESTION # 52

Refer to the exhibit. An administrator assigned a new policy package to FortiGate HQ-NGFW-1.

In the installation preview, they noticed some settings they did not modify and are unsure about the changes.

Based on the exhibit, which two things will happen if they continue with the installation? (Choose two.)

- A. FortiManager will install the CA certificate named root_CA3 to authenticate FortiGate-to- FortiManager communication protocol (FGFM) tunnel connections with FortiGate HQ- NGFW-1.
- B. FortiGate HQ-NGFW-1 can contact the FortiManager acting as FortiGuard Distribution Server (FDS) to download FortiGuard updates.
- C. FortiGate HQ-NGFW-1 can use FortiManager firmware templates to upgrade firmware and ratings.
- D. FortiGate HQ-NGFW-1 will use the root_CA3 certificate in firewall address objects or policies.

Answer: A,B

Explanation:

The configuration includes a server-list with server-type set to "update rating," which enables FortiGate HQ-NGFW-1 to contact FortiManager as a FortiGuard Distribution Server (FDS) for FortiGuard updates.

The installation includes a root_CA3 certificate, which FortiManager will install on FortiGate HQ- NGFW-1 to authenticate FGFM tunnel connections between the devices.

NEW QUESTION # 53

Refer to the exhibits.

An administrator added BR1-FGT-1 to FortiManager and started importing the policy package. During the process, they saw that they need to choose values from FortiGate or FortiManager.

Which conclusion is most clearly supported by the exhibits?

- A. BR1-FGT-1 does not support the SSL/SSH profile with HTTPS on port 443.
- B. The default Firewall Profile-Protocol-Options object is the only profile that does not significantly affect any configuration changes on either FortiManager or FortiGate.

- C. FortiManager has a different FortiGuard database compared to FortiGate BR1-FGT-1 for the QUIC protocol.
- D. The administrator must match the FortiOS firmware version with the FortiManager ADOM firmware version to resolve the conflict status.

Answer: B

Explanation:

The exhibits are directly supported by the lab guide's troubleshooting section. It states: "The only profile that can be replaced is the Firewall Profile-Protocol-Options profile, because the only difference is a change in the comment field." It then explains that for the other two profiles, "Whether you accept the value from BR1-FGT-1 or FortiManager, it will cause changes on different devices." That exactly matches C. The conflict window is not primarily showing a firmware mismatch, and the guide does not say BR1-FGT-1 lacks HTTPS 443 support. It also does not describe this as a FortiGuard database mismatch for QUIC. Instead, the key point is that only the default Firewall Profile-Protocol-Options conflict is minor enough to safely take from FortiManager because the difference is only in the comment field. The web filter and SSL/SSH profiles would cause real configuration differences if replaced.

NEW QUESTION # 54

Which two conditions trigger FortiManager to create a new revision history? (Choose two.)

- A. When a provisioning template is assigned to a managed device on the device-level database
- **B. When changes to the device-level database are made on FortiManager**
- **C. When FortiManager is auto-updated with configuration changes made directly on a managed device**
- D. When FortiManager installs device-level changes on a managed device

Answer: B,C

Explanation:

FortiManager creates a new revision history entry whenever changes are made to the device-level database on FortiManager. FortiManager also creates a new revision when it auto-updates its database with configuration changes detected directly on a managed device.

NEW QUESTION # 55

What are two expected results when both FortiManager and FortiGate are behind network address translation NAT devices? Choose two answers

- A. If the FortiGate-FortiManager communication protocol FGFM tunnel is torn down, FortiManager will try to reestablish the FGFM tunnel.
- B. FortiGate can announce itself to FortiManager only if the FortiManager non-NATed IP address is configured on FortiGate under central management.
- **C. During discovery, the FortiManager NATed IP address is not set by default on FortiGate.**
- **D. FortiGate is discovered by FortiManager through the FortiGate NATed IP address.**

Answer: C,D

Explanation:

The FortiManager 7.6 Administrator Study Guide is explicit for the scenario where both FortiManager and FortiGate are behind NAT. It states that FortiManager can discover FortiGate through the FortiGate NATed IP address, which makes A correct. It also explains that in this scenario, the FortiManager NATed IP address is not configured on FortiGate by default under central management, which makes B correct.

C is incorrect because FortiGate must use the FortiManager NATed IP address, not the non-NATed IP, if it needs to announce itself or reestablish the FGFM tunnel. D is also incorrect because in this NAT scenario, if the tunnel is torn down, only FortiGate attempts to reestablish the connection; FortiManager does not automatically do so.

NEW QUESTION # 56

.....

PDF4Test is a professional IT certification sites, the certification success rate is 100%. This number is proved by candidates through

practice. Because PDF4Test has a strong IT team of experts, they are committed to study exam questions and answers, and serve the vital interests of the majority of candidates. They use their own professional mind and experience to meet the needs of the candidates. According to the needs of the candidate, they consider the issue from all angles, and manufacturing applicability exam training materials. This material is Fortinet FCP_FMG_AD-7.6 Exam Training materials, which including questions and answers.
