

Test 1Z0-1042-25 Cram - Valid 1Z0-1042-25 Vce Dumps

BONUS!!! Download part of DumpsKing 1Z0-1042-25 dumps for free: <https://drive.google.com/open?id=1jezI54yU2aNuYX6fDklgXdwJZjfe64dq>

DumpsKing trained experts have made sure to help the potential applicants of Oracle Cloud Infrastructure 2025 Application Integration Professional certification to pass their Oracle Cloud Infrastructure 2025 Application Integration Professional exam on the first try. Our PDF format carries real Oracle 1Z0-1042-25 Exam Dumps. You can use this format of Oracle 1Z0-1042-25 actual questions on your smart devices.

Oracle 1Z0-1042-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Creating Orchestrated Integrations: This section tests the knowledge of Orchestration Developers and Business Process Analysts in managing orchestrated integrations within OIC. It includes using lookups, data mappers, and custom JavaScript libraries, configuring orchestration flow actions, implementing file handling options, and leveraging the fault-handling framework to manage errors effectively.
Topic 2	<ul style="list-style-type: none">• Testing, Monitoring, and Troubleshooting Integrations: This section assesses the abilities of Support Engineers and Integration Administrators in managing integration lifecycles. It includes activating and deactivating integrations, testing REST-triggered integrations, importing and exporting integrations, as well as monitoring and troubleshooting integration instances to ensure smooth operations.
Topic 3	<ul style="list-style-type: none">• Getting Started with OIC Integrations: This section of the exam measures the skills of Integration Specialists and Cloud Engineers in understanding the foundational components of Oracle Integration Cloud (OIC). It covers key integration concepts, how integrations work, and web services fundamentals such as WSDL, SOAP, REST, and JSON. The focus is on building a strong understanding of OIC's integration capabilities.
Topic 4	<ul style="list-style-type: none">• Creating Scheduled Integrations: This domain measures the skills of Automation Engineers and Cloud Administrators in defining integration schedules and converting scheduled integrations to app-driven ones. It also includes using scheduled parameters to automate workflows efficiently.

Topic 5	<ul style="list-style-type: none"> Using OIC Connections & Adapters: This section evaluates the expertise of Integration Developers and Solution Architects in creating and configuring OIC connections. It includes setting up trigger and invoke connections, understanding the role of the Connectivity Agent, and effectively using adapters to connect cloud and on-premises applications seamlessly.

Free PDF Quiz 1Z0-1042-25 - Test Oracle Cloud Infrastructure 2025 Application Integration Professional Cram

The 1Z0-1042-25 exam real questions are the ideal and recommended study material for quick and complete Oracle 1Z0-1042-25 exam preparation. As a 1Z0-1042-25 Exam candidate you should not ignore the 1Z0-1042-25 exam questions and must add the Oracle 1Z0-1042-25 exam questions in preparation.

Oracle Cloud Infrastructure 2025 Application Integration Professional Sample Questions (Q48-Q53):

NEW QUESTION # 48

Which Oracle Integration Cloud (OIC) XPath function can be used to retrieve data from an OIC lookup within the Data Mapper tool?

- A. getLookup
- B. get-content-as-string
- C. lookupValue
- D. get-value-from-lookup

Answer: C

Explanation:

Comprehensive and Detailed Explanation:

In OIC's Data Mapper, XPath functions handle transformations:

Option B:lookupValue is the correct function to retrieve values from a lookup table, taking parameters like lookup name and key.

Option A:Not a valid OIC function.

Option C:get-content-as-string processes content, not lookups.

Option D:getLookup doesn't exist; the function is lookupValue.

B is the standard method for lookup access.

NEW QUESTION # 49

As an integration developer, you are creating an integration in Oracle Integration Cloud (OIC) to transform a payload with multiple orders. You need to configure a for-each action to loop through each order and process them individually. How do you correctly configure the for-each action to loop through each order and process them individually?

- A. Select the Repeating Element field and map the source element that contains the orders.
- B. Select the Parallel Processing option and set the number of threads to the number of orders.
- C. Select the Group By option and group the orders by the order number.
- D. Select the Sequential Processing option and set the batch size to the number of orders.

Answer: A

Explanation:

Comprehensive and Detailed Explanation:

TheFor Eachaction in OIC iterates over a collection (e.g., multiple orders in a payload). Correct configuration involves:

Option C:Selecting theRepeating Elementfield and mapping it to the source element (e.g., /orders/order) containing the list of orders ensures OIC loops through each item individually. This is the standard and correct approach.

Option A:Parallel Processing exists but isn't default for For Each; it's an advanced setting requiring manual thread configuration, not ideal for basic iteration.

Option B:Group By is for aggregation, not individual processing, and doesn't apply here.

Option D:Sequential Processing is implied in For Each, but "batch size" isn't a configuration option for this action-it's relevant to Stage File operations.

Mapping the repeating element ensures precise, individual order processing.

NEW QUESTION # 50

When a connection is in edit mode and the browser crashes, the connection becomes locked, which then prevents it from being edited.

Which two users can unlock the connection?

- A. A user with the Administrator Role
- B. Any user
- C. The same user who has edited the connection
- D. A user with the Designer Role

Answer: A,C

Explanation:

The connection can be unlocked by the same user who was editing it or by an administrator with broader privileges. Designers or any other user typically lack the permission to unlock a connection.

NEW QUESTION # 51

Oracle Integration Cloud (OIC) integrations can be exported so that later they can be imported into another OIC instance environment. Which statement is NOT true about the import and export of OIC integrations?

- A. Imported integrations can be reconfigured to use different connection resources by using the OIC REST API.
- B. Exported integrations include all their dependent connection resource information except URLs and credentials.
- C. Imported integrations cannot be immediately activated if their dependent connection resources are not already present in the target OIC environment.
- D. Integrations must be exported as a package if you want to import them into another OIC environment.

Answer: D

Explanation:

Comprehensive and Detailed Explanation:

OIC supports exporting and importing integrations for migration or backup:

Option A:True-activation requires all dependent connections (e.g., adapters) to exist in the target environment; otherwise, manual configuration is needed.

Option B:True-exported integrations (IAR files) include connection metadata but exclude sensitive data like URLs and credentials for security.

Option D:True-the OIC REST API allows post-import reconfiguration of connections.

NEW QUESTION # 52

CSV-formatted data has been extracted from Oracle ERP Cloud by invoking a web service using the SOAP Adapter, and the data extract has been returned as an MTOM attachment. You now need to send this CSV file to an external REST API that supports accepting this content as a Base64 encoded string. Which is a valid solution offering the best performance?

- A. Use the REST adapter configuration wizard to define the structure of the CSV when configuring the invoke connection, then map the MTOM attachment directly.
- B. Create and register a JavaScript function to convert the contents, invoke it using the JavaScript call action, then map the result to the REST adapter invoke map action.
- C. Create an NXSD in Oracle JDeveloper to define the schema of the CSV and use it to map the transformed data to the REST adapter invoke map action.
- D. Map the received MTOM attachment directly to the REST adapter invoke map action using the `encodeReferenceToBase64` function.

Answer: D

NEW QUESTION # 53

.....

If you want to pass your exam just one time, then our 1Z0-1042-25 exam torrent will be your best choice. We can help you pass your exam just one time, and if you fail the exam in your first attempt after using 1Z0-1042-25 exam torrent, we will give you refund, and no other questions will be asked. Moreover, 1Z0-1042-25 Exam Braindumps of us are high-quality, and we have helped lots of candidates pass the exam successfully. We have received many good feedbacks from our customers. We offer you online and offline chat service stuff, if you have any questions about 1Z0-1042-25 exam torrent, you can consult them.
