You can easily assess yourself with the help of our Palo Alto Networks XSOAR Engineer (XSOAR-Engineer) practice software, as it records all your previous results for future use. You can easily judge whether you can pass Palo Alto Networks XSOAR Engineer (XSOAR-Engineer) on the first attempt or not, and if you don't, you can use this software to strengthen your preparation.

Palo Alto Networks XSOAR Engineer Sample Questions (Q82-Q87):

NEW QUESTION # 82

When using the playbook debugger, what may be the cause of a starred incident missing from the Test Data selections?.

- A. Closed incidents are not visible in the debugger.
- B. Starred incidents are not visible in the debugger.
- C. The incident has been restricted.
- D. The incident type is set incorrectly.

Answer: A

Explanation:

The XSOAR Playbook Debugger allows engineers to simulate playbook behavior using existing incidents as sample data. The documentation explicitly states that only open incidents appear within the debugger's Test Data selection list. Closed incidents are removed from the selectable list because the debugger cannot execute against non-active incident states.

Starring an incident does not affect debugger availability; the star is a user-level convenience for bookmarking. RBAC restrictions (B) could hide an incident in general UI contexts but not selectively from the debugger. Incorrect incident type (D) also does not prevent selection as long as the incident is open.

Therefore, if a starred incident does not appear as a debugging option, the most common and documented reason is that the incident has been closed, and closed incidents cannot be used as debugger input. This aligns with option A.

NEW QUESTION # 83

Which two options may be added when a content pack is being installed? (Choose two.)

- A. Other content packs
- B. Indicator layouts
- C. Lists
- D. Roles

Answer: C,D

NEW QUESTION # 84

How would context data be filtered to receive only malicious indicator values with DBotScore?

- A. Get DBotScore where DBotScore.Score (Larger than) 1
- B. Get DBotScore where DBotScore.Score (Larger or equals) 2
- C. Get DBotScore.value where DBotScore.Score (equals (int)) 3
- D. Get DBotScore.value where DBotScore.Score (Larger or equals) 4

Answer: C
