If you have any other questions about the NIS-2-Directive-Lead-Implementer exam dumps, just contact us.

PECB Certified NIS 2 Directive Lead Implementer Sample Questions (Q77-Q82):

NEW QUESTION # 77

Scenario 7:CleanHydro is a forward-thinking company operating in the wastewater industry. Based in Stockholm, Sweden, the company is dedicated to revolutionizing wastewater treatment processes using advanced automated technology aiming to reduce environmental impact.

Recognizing the paramount importance of robust cybersecurity measures to protect its advanced technologies, CleanHydro is committed to ensuring compliance with the NIS 2 Directive. In line with this commitment, the company has initiated a comprehensive employee training program. To do so, the company adheres to Sweden's national cybersecurity strategy, which includes objectives, governance frameworks to guide strategy implementation and define roles and responsibilities at the national level, risk assessment mechanism, incident preparedness measures, a list of involved authorities and stakeholders, and coordination policies.

In addition, CleanHydro engaged GuardSecurity, an external cybersecurity consultancy firm, to evaluate and potentially improve the cybersecurity infrastructure of the company to ensure compliance with the NIS 2 Directive. GuardSecurity focused on strengthening the risk management process of the company.

The company started determining competence development needs by considering competence levels, comparing them with required competence levels, and then prioritizing actions to address competence gaps found based on risk-based thinking. Based on this determination, the company planned the competence development activities and defined the competence development program type and structure. To provide the training and awareness programs, the company contracted CyberSafe, a reputable training provider, to provide the necessary resources, such as relevant documentation or tools for effective training delivery. The company's top management convened a meeting to establish a comprehensive cybersecurity awareness training policy. It was decided that cybersecurity awareness training sessions would be conducted twice during the onboarding process for new employee to instill a culture of cybersecurity from the outset and following a cybersecurity incident.

In line with the NIS 2 compliance requirements, CleanHydro acknowledges the importance of engaging in communication with communities consisting of other essential and important entities. These communities are formed based on industry sectors, critical infrastructure sectors, or other relevant classifications. The company recognizes that this communication is vital for sharing and receiving crucial cybersecurity information that contributes to the overall security of wastewater management operations.

When developing its cybersecurity communication strategy and setting objectives, CleanHydto engaged with interested parties, including employees, suppliers, and service providers, to understand their concerns and gain insights. Additionally, the company identified potential stakeholders who has expressed interest in its activities, products, and services. These activities aimed to contribute to the achievement of the overall objectives of its cybersecurity communication strategy, ensuring that it effectively addressed the needs of all relevant parties.

Based on scenario 7, why did the company undertake the mentioned activities when developing its cybersecurity communication strategy?

- A. To enhance knowledge, influence opinions and perceptions, and achieve communication objectives
- B. To streamline inter-organizational communication and reduce redundancies
- C. To establish a one-way communication channel for cybersecurity updates

Answer: A

NEW QUESTION # 78

Scenario 4: StellarTech is a technology company that provides innovative solutions for a connected world. Its portfolio includes groundbreaking Internet of Things (IoT) devices, high-performance software applications, and state-of-the-art communication systems. In response to the ever-evolving cybersecurity landscape and the need to ensure digital resilience, StellarTech has decided to establish a cybersecurity program based on the NIS 2 Directive requirements. The company has appointed Nick, an experienced information security manager, to ensure the successful implementation of these requirements. Nick initiated the implementation process by thoroughly analyzing StellarTech's organizational structure. He observed that the company has embraced a well-defined model that enables the allocation of verticals based on specialties or operational functions and facilitates distinct role delineation and clear responsibilities.

To ensure compliance with the NIS 2 Directive requirements, Nick and his team have implemented an asset management system and established as asset management policy, set objectives, and the processes to achieve those objectives. As part of the asset management process, the company will identify, record, maintain all assets within the system's scope.

To manage risks effectively, the company has adopted a structured approach involving the definition of the scope and parameters governing risk management, risk assessments, risk treatment, risk acceptance, risk communication, awareness and consulting, and risk monitoring and review processes. This approach enables the application of cybersecurity practices based on previous and currently cybersecurity activities, including lessons learned and predictive indicators. StellarTech's organization-wide risk management program aligns with objectives monitored by senior executives, who treat it like financial risk. The budget is structured according to the risk landscape, while business units implement executive vision with a strong awareness of system-level risks. The company shares real-time information, understanding its role within the larger ecosystem and actively contributing to risk understanding. StellarTech's agile response to evolving threats and emphasis on proactive communication showcase its dedication to cybersecurity excellence and resilience.

Last month, the company conducted a comprehensive risk assessment. During this process, it identified a potential threat associated with a sophisticated form of cyber intrusion, specifically targeting IoT devices. This threat, although theoretically possible, was deemed highly unlikely to materialize due to the company's robust security measures, the absence of prior incidents, and its existing strong cybersecurity practices.

Based on scenario 4, what will StellarTech identify record, and maintain during asset management?

- A. An asset management plan
- B. An asset portfolio
- C. An asset framework

Answer: C

NEW QUESTION # 79

On which of the following critical areas does an organization focus when it promotes a culture of awareness and conducts comprehensive training sessions?

- A. Cyber strategy and governance
- B. Detection and response
- C. Infrastructure and application security

Answer: A

NEW QUESTION # 80

Scenario 3: Founded in 2001, SafePost is a prominent postal and courier company headquartered in Brussels, Belguim. Over the years, it has become a key player in the logistics and courier in the region. With more than 500 employees, the company prides itself on its efficient and reliable services, catering to individual and corporate clients. SafePost has recognized the importance of cybersecurity in an increasingly digital world and has taken significant steps to align its operations with regulatory directives, such as the NIS 2 Directive.

SafePost recognized the importance of thoroughly analyzing market forces and opportunities to inform its cybersecurity strategy. Hence, it selected an approach that enabled the analysis of market forces and opportunities in the four following areas: political, economic, social, and technological. The results of the analysis helped SafePost in anticipating emerging threats and aligning its security measures with the evolving landscape of the postal and courier industry.

To comply with the NIS 2 Directive requirements, SafePost has implemented comprehensive cybersecurity measures and procedures, which have been documented and communicated in training sessions. However, these procedures are used only on individual initiatives and have still not been implemented throughout the company. Furthermore, SafePost's risk management team has developed and approved several cybersecurity risk management measures to help the company minimize potential risks, protect customer data, and ensure business continuity.

Additionally, SafePost has developed a cybersecurity policy that contains guidelines and procedures for safeguarding digital assets, protecting sensitive data, and defining the roles and responsibilities of employees in maintaining security. This policy will help the company by providing a structured framework for identifying and mitigating cybersecurity risks, ensuring compliance with regulations, and fostering a culture of security awareness among employees, ultimately enhancing overall cybersecurity posture and reducing the likelihood of cyber incidents.

As SafePost continues to navigate the dynamic market forces and opportunities, it remains committed to upholding the highest standards of cybersecurity to safeguard the interests of its customers and maintain its position as a trusted leader in the postal and courier industry.

SafePost's risk management team has developed and approved several cybersecurity risk management measures intended to help the company in minimizing potential risks, protecting customer data, and ensuring business continuity. Is this in compliance with Article 20 of the NIS 2 Directive?

Refer to scenario 3.

- A. Yes, the risk management team is responsible for developing and approving cybersecurity risk management measures
- B. No, the IT Department is solely responsible for developing and approving cybersecurity risk management measures
- C. No, the company's management body is responsible for approving cybersecurity risk management measures

Answer: C

NEW QUESTION # 81
What is the role of the Commission within the Union Civil Protection Mechanism regarding cybersecurity situational awareness?

- A. Develop cybersecurity policies for Member States
- B. Coordinate internation cybersecurity collaborations
- C. Provide analytical reports on diverse areas

Answer: C
