Microsoft MS-721 Test Duration & MS-721 Braindumps Pdf

If you want a relevant and precise content that imparts you the most updated, relevant and practical knowledge on all the key topics of the MS-721 Certification Exam, no other MS-721 study material meets these demands so perfectly as does Actual4dump's study guides. The MS-721 questions and answers in these guides have been prepared by the best professionals who have deep exposure of the certification exams and the exam takers needs. The result is that Actual4dump's study guides are liked by so many ambitious professionals who give them first priority for their exams. The astonishing success rate of Actual4dump's clients is enough to prove the quality and benefit of the study questions of Actual4dump.

The MS-721 exam is an updated version of the previous Microsoft Certified Solutions Expert (MCSE) certification exam. The updated exam is designed to cover the latest trends and technologies in the field of collaboration and communication systems engineering. MS-721 Exam includes a wide range of topics, including designing and implementing collaboration and communication solutions, configuring and managing collaboration and communication systems, and troubleshooting collaboration and communication systems.

Microsoft Collaboration Communications Systems Engineer Sample Questions (Q127-Q132):

NEW QUESTION # 127

Once Direct Routing is deployed, you need to prepare the environment to support a reams SBA in the Vancouver facility. The solution must meet the technical requirements.

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Enroll the SBA server in Microsoft Intune.
- B. Run the `New-CsTeMsSurvivableBranchAppliance Cmdlet`.
- C. Register an application in Azure Active Directory (Azure AD).
- D. Enable ForwardPAI on the online voice gateway.

- E. Configure the S8C for media bypass.
- F. Configure the SBC for call forking.

Answer: B,C,E

Explanation:

Topic 2, Litware

Overview

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference into information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section. To start the case study To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Overview

Litware, Inc. is an online retailer.

Litware is replacing its telephony platform with Microsoft Teams Phone.

Currently, all users are assigned Microsoft 365 E3 licenses.

Telephony Environment

The existing telecommunications system has several third-party IP-PBXes at the corporate and warehouse sites- Currently, the PBXes are linked through the corporate WAN and an inter-office dial plan is in place.

A unique PSTN direct inward dial (DID) is assigned to each user. The last five digits of each DID are used as an extension.

Litware piloted Microsoft Skype for Business Server Enterprise Voice, but has since decided to migrate directly to Teams Phone.

During the pilot, a response group was created, and the response group is still in use. Agents in the response group use Skype for Business Server-certified handsets.

Locations

Litware has global retail stores and datacenters-

The telephony topology contains the following four types of sites:

Corporate sites

The corporate sites contain information workers who collaborate by using the Teams desktop client and SharePoint Online.

The reception desk at each corporate site has an analog intercom with an integrated door control. Each intercom connects to an existing PBX by using an FXS Analog Telephony Adapter (ATA).

SIP trunks are delivered directly to the site by using a resilient WAN that connects directly to the on-site PBX solution.

Warehouse sites

The warehouse sites are critical to the business. Users at these sites use either the Teams desktop client or the Teams mobile client.

Each warehouse has a public announcement (PA) system that connects to the PBX by using a SIP ATA along with the sites' existing ISDN trunks.

Currently, users at the company's warehouse in Georgia can call the PA system by dialing 123456.

All calls to emergency services from the warehouses are played over the warehouses' PA system automatically.

WAN connectivity at the warehouses can be unreliable, so local PSTN connectivity is preferred as compared to centrally hosted connectivity.

Retail sites

Each retail site has only one or two desk phones and a specialized point of sale (POS) computer that cannot run the desktop or web versions of the Teams client-Users at the retail sites have the Teams app and an associated data plan installed on their mobile device.

Currently, each retail site uses a managed SD-WAN appliance to connect to both the internet and the corporate WAN. The users report that in the event of an internet outage at the retail sites, they can use their mobile devices, which have strong reception.

Planned Changes

Litware plans to implement the following changes:

- * Maintain the existing emergency call PA integration.
- * Replace the existing IP-PBX solutions by using Teams Phone.
- * Consolidate all its PSTN trunks by using region-specific datacenters, wherever possible.

During the planned deployment of Teams Phone, Litware will open a new retail site in the United Kingdom that will have five users.

Litware does not have any existing telephony in the United Kingdom. Management at the new retail site wants to use Microsoft Teams Calling Plans for the users.

You are opening a new warehouse site in Melbourne. The new warehouse will connect to a phone carrier by using a Session Border Controller (SBC). Dialing rules are an area code of two digits beginning with a zero followed by a subscriber number of eight digits. For example, an E.164 number of +61370105550 will be translated to 03 7010 5550, and +61255505550 will be translated to 02 5550 5550.

Technical Requirements

Litware identifies the following technical requirements:

- Minimize the amount of voice traffic over the-WAN.
- Whenever possible, use natively supported Teams solutions.
- * Avoid replacing existing analog device adapters and SIP phones.
- * Assign a Microsoft 365 Phone System license to all the users listed in a CSV file.
- * Ensure that the retail sites can place and receive calls in the event of a WAN failure.
- * Assign a phone number of +61370105550 to a user named User1. User1 is located at a corporate site.
- * Ensure that the warehouse sites maintain calling in the event of an internet outage or Teams service failure.
- * Provide users at the United Kingdom retail site with phone numbers. The users must only be allowed to make in-country calls.
- * Replace the response group from the Skype for Business Server Voice Enterprise pilot with a call queue. The agents must be able to use their existing handset.

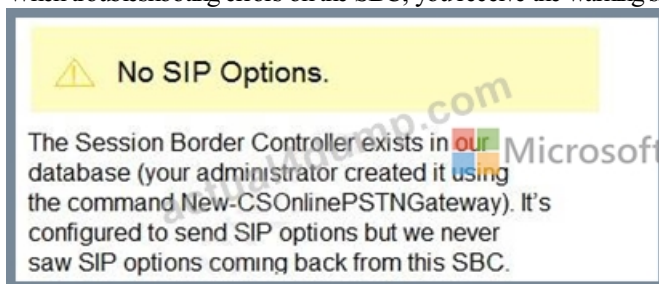

NEW QUESTION # 128

You have a Microsoft Teams Phone deployment.

You are deploying Direct Routing.

All users have a SIP URI in the format of user@contoso.com. The Session Border Controller (SBC) is named sbc.voice.contoso.com.

When troubleshooting errors on the SBC, you receive the warning shown in the following exhibit.

What is a possible cause of the issue?

- A. The firewall blocks inbound traffic on port 443 to the SBC.
- B. Microsoft 365 Phone System licenses are not assigned to the users.
- C. Only TLS 1.0 is enabled on the SBC.
- D. The certificate does not match the FQDN on the SBC.

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoftteams/troubleshoot/phone-system/direct-routing/sip-options-tls-certificate-issues>

NEW QUESTION # 129

You are evaluating the implementation of the technical requirements for the sales team.

After the implementation of the requirements, which meeting feature will the sales team be able to use during Teams meetings?

- A. Whiteboard
- B. meeting recording
- C. meeting reactions
- D. PowerPoint Live

Answer: A

NEW QUESTION # 130

You need to recommend network design changes that must be implemented before the Skype for Business Server to Microsoft Teams migration.

What should you recommend for the Vancouver facility users and the remote sale team users? To answer, drag the appropriate recommendation to the correct users. Each recommendation may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content NOTE: Each correct selection is worth one point.

Recommendations

- Decrease the NAT pool size.
- Implement VPN split tunneling.
- Deploy a local internet connection.
- Implement a web proxy server for media traffic.
- Force TCP instead of UDP for the media traffic of Teams.

Answer Area

Vancouver facility users:

Remote users:

NEW QUESTION # 131

You have a Microsoft 365 ES subscription and a Microsoft Teams deployment.

You have the Global (Org-wide default) events policy as shown in the Global events policy exhibit. (Click the Global events policy tab.)

Global (Org-wide default)

Default policy for users who aren't assigned to a policy.

- Webinars: On
- Who can attend webinars:
- Town halls: Off
- Customize event emails: Off
- Webinar registration form questions:
- Allowed webinar types for recordings:
- Allowed town hall types for recordings:

You have an events policy named Policy1 as shown in the Policy 1 exhibit (Click the Policy1 tab.) The subscription contains the users shown in the following table.

Name	Assigned events policy
User1	Policy1
User2	Policy2

For each of the following statements, select Yes if True. Otherwise select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
User2 can add custom fields to registration webinar form.	<input type="radio"/>	<input type="radio"/>
User2 can create public webinars.	<input type="radio"/>	<input type="radio"/>
User1 can publish public town hall recordings.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statements	Yes	No
User2 can add custom fields to registration webinar form.	<input type="radio"/>	<input checked="" type="checkbox"/>
User2 can create public webinars.	<input checked="" type="checkbox"/>	<input type="radio"/>
User1 can publish public town hall recordings.	<input type="radio"/>	<input checked="" type="checkbox"/>
