- A. The international reference standard to sets out the criteria for an environmental management system
- **B. The international reference standard for the optimal management of physical assets.**
- C. The international reference standard that provides the overview of information security management systems
- D. The international reference standard to sets out the criteria for a quality management system

**Answer: B**

Explanation:

ISO 55000 is a part of the ISO 55000 series (including ISO 55001 and ISO 55002), which serves as the international standard for asset management. It outlines the principles, terminology, and benefits of implementing an asset management system. It is not related to quality, environmental, or information security management systems, which are governed by ISO 9001, ISO 14001, and ISO

27001 respectively.

Exact Extract from ISO 55000 - Asset Management - Overview, Principles and Terminology:

"This International Standard provides an overview of asset management, its principles and terminology, and the expected benefits from adopting asset management." (ISO 55000:2014, Clause 1 - Scope)

#### NEW QUESTION # 18

IAM-based decisions produce real savings, where savings develop from, except.....

- A. Cost Effectiveness
- B. Cost Avoidance
- C. Compliment asset
- D. Efficiency gains

**Answer: C**

IAM-compliant practices help generate organizational savings by improving efficiency, reducing unnecessary costs, and enabling cost-effective decision-making. These outcomes are typically derived from structured planning and lifecycle optimization.

\* Efficiency Gains: Streamlining processes to use fewer resources.

\* Cost Avoidance: Proactively preventing unnecessary expenditure through better decisions.

\* Cost Effectiveness: Choosing actions that yield the best return on investment.

Compliment Assets is not a relevant financial or asset management term-it appears to be a typographical or conceptual error and is therefore the correct answer to identify as invalid.

Exact Extract from IAM - Asset Management: An Anatomy (v4), Section 2.2 - The Benefits of Asset Management:

"Benefits include cost reduction, efficiency gains, increased asset performance, and risk-informed cost avoidance."

**Answer: B**

\* A is correct: The standard explicitly states it is not software.

\* B is correct: ISO 55000 is industry and platform agnostic.

\* C is correct: The standard provides a documented foundation for good asset management practices.

\* D is incorrect: ISO 55000 is a voluntary standard, not a regulation.
