Salesforce Marketing-Cloud-Developer Certification Exam measures the candidate's knowledge of marketing automation, customer

journey management, email marketing, mobile messaging, and data management. Marketing-Cloud-Developer exam is designed to test the candidate's ability to design and develop custom applications using Marketing Cloud's programming languages, including AMPScript and SSJS. Salesforce Certified Marketing Cloud Developer Exam certification exam also evaluates the candidate's ability to integrate Marketing Cloud with other Salesforce products and third-party applications. Successful completion of this certification exam demonstrates that the candidate has the skills and knowledge needed to design and develop custom Marketing Cloud applications that meet the specific needs of their organization.

Salesforce Certified Marketing Cloud Developer Exam Sample Questions (Q48-Q53):

NEW QUESTION # 48

What is the purpose of the IF statement below?

□

- A. To handle when the subscriber is in a held status
- **B. To handle when no row is returned by the LookupRows function**
- C. To handle when there are multiple records in the data extension for the subscriber
- D. To handle when images are broken

Answer: B

Explanation:

The purpose of the IF statement in the AMPscript code is to check if any rows are returned by the LookupRows function. If rows are returned, it retrieves the image field from the data extension and sets the image source accordingly. If no rows are returned, it defaults to using a standard image.

1: Salesforce AMPscript LookupRows Function

NEW QUESTION # 49

Which of the following statements are correct concerning Contacts and Subscribers? Choose 2.

- A. Each Contact is also a Subscriber.
- B. A Contact is subscribed to a specific channel.
- **C. A Contact is subscribed to any channel.**
- **D. Each Subscriber is also a Contact.**

Answer: C,D

NEW QUESTION # 50

NTO uses an external CRM which only exports encrypted files. NTO's marketing manager team wants to use some of the subscriber data found in the CRM for future marketing sends. Which three actions should be included in an automation given these requirements? Choose 3

- A. File transfer activity to the Import directory for decryption
- B. File drop to the SFTP Root directory
- **C. File transfer activity to the Safehouse for decryption**
- **D. Import definition to the necessary data extension**
- **E. File drop to the SFTP Import directory**

Answer: C,D,E

NEW QUESTION # 51

Which AMPscript function returns the result of interpreted code within a code block and includes the result in the rendered content, where the code block is located?

- A. V
- **B. Output**
- C. TreatAsContentArea

Answer: B

Explanation:

The `Outputfunction` in AMPscript is used to include the result of interpreted code within a code block in the rendered content. This function ensures that the evaluated result of the code is included directly where the `Outputfunction` is called.

* Example:

ampscript

Copy code

```
%%[ SET @message = "Hello, World!" ]%% %%=Output(@message)=%%
```

NEW QUESTION # 52

A developer wants to create a CloudPage which is linked from an email. %%[SET @point = RequestParameter(x) SET @value = 5 IF Length(@point) > 1 THEN SET @value = 1 ELSEIF Length (@point)>2 THEN SET @value = 2 ELSEIF Length(@point) >3 THEN SET@value = 3 ELSEIF Length (@point) >4 THEN SET @value = 4 ENDIF]%% Which is the expected value of @value if x = 'Tacos'?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

Explanation:

In the provided AMPscript, the IF statement checks the length of the @point variable and sets @value accordingly. Since x = 'Tacos' has a length of 5, it meets the first condition `Length(@point) > 1`, which sets

@value to 1. Subsequent conditions are not evaluated because the first condition is already true.

* AMPscript IF-ELSEIF Example:

```
%%[ SET @point = RequestParameter('x') SET @value = 5 IF Length(@point) > 1 THEN SET @value = 1 ELSEIF Length(@point) > 2 THEN SET @value = 2 ELSEIF Length(@point) > 3 THEN SET @value = 3 ELSEIF Length(@point) > 4 THEN SET @value = 4 ENDIF ]%% Salesforce AMPscript Documentation
```

NEW QUESTION # 53
