Salesforce B2B Commerce for Administrators Accredited Professional Sample Questions (Q81-Q86):

NEW QUESTION # 81

Which two permission sets are needed for a user on the storefront to view other accounts across multiple accounts?

- A. Buyer (or Commerce User)
- B. Account Switcher User
- C. Account Delegation User
- D. Buyer Manager (or B2B Commerce Super User)

Answer: B,D

Explanation:

For a user on the storefront to view other accounts across multiple accounts, the necessary permission sets are C. Account Switcher User, which allows users to switch between different accounts they have access to, and D. Buyer Manager (or B2B Commerce Super User), which provides broader permissions including the ability to manage and view information related to multiple accounts.

NEW QUESTION # 82

An Administrator learns of two new requirements around international taxation and credit card payments. What two options are available for investigating additional functionality for Salesforce B2B Commerce in these areas?

- A. Drop ins
- B. Open source APIs
- C. Salesforce Labs add-ons
- D. AppExchange connectors

Answer: C,D

Explanation:

For investigating additional functionality around international taxation and credit card payments in Salesforce B2B Commerce, an administrator can explore A. Salesforce Labs add-ons and D. AppExchange connectors. Salesforce Labs provides innovative solutions that can be used as is or customized, while AppExchange connectors offer pre-built integrations that extend the functionality of Salesforce B2B Commerce to meet specific business needs, including payment processing and tax calculations.

NEW QUESTION # 83

AB2B Administrator notices a change that needs to be made to a storefront before the Change Set can be finalized for deployment. From which two places can the Administrator directly access Experience Builder to make the change?

- A. All Sites
- B. All Communities
- C. Digital Experiences
- D. Store tile
- E. Experience Cloud Configuration

Answer: A,C

Explanation:

An Administrator can directly access Experience Builder to make changes to a storefront from A. All Sites and D. Digital Experiences. These areas within Salesforce provide entry points to the Experience Builder, where administrators can modify the design and layout of storefronts, including components and pages.

NEW QUESTION # 84

An Administrator has both Spanish and English enabled as languages for a store. However when viewing the storefront in Spanish, the Administrator notices the search filters are not visible on the Category Detail page. What could be missing?

- A. The picklist value's translations were not completed in Translation Workbench.
- B. The translated category data has not been populated.
- C. The user's browser is translating the page from Spanish back to English.
- D. The site page does not have a variation for the translated menu.

Answer: A

Explanation:

If search filters are not visible on the Category Detail page when viewing the storefront in Spanish, it could be due to The picklist value's translations not being completed in Translation Workbench (C). The Translation Workbench in Salesforce allows Administrators to provide translations for various UI elements, including picklist values used in search filters. If these translations are incomplete or missing, the filters may not display correctly in the specified language. This issue highlights the importance of comprehensive translation efforts to ensure a seamless multilingual user experience. Browser translation issues (A), site page variations (B), and untranslated category data (D) can also affect localization, but the visibility of search filters is directly tied to the completeness of translations in the Translation Workbench.

NEW QUESTION # 85

Which two steps can an Administrator take to present different user experiences to different Buyers in a storefront?

- **A. Create audiences to define different segments**
- B. Link the Store to multiple communities
- C. Associate the branding to specific buyer groups
- **D. Use page variations**

Answer: A,D

Explanation:

To present different user experiences to different buyers in a storefront, an Administrator can:

A) Create audiences to define different segments: This allows for the customization of content and experiences based on specific characteristics of user segments.

B) Use page variations: Different page layouts and content can be presented to different audiences, enabling a highly personalized shopping experience for each user group.

NEW QUESTION # 86

.....
