Scrum PSPO-II (Professional Scrum Product Owner II) Certification Exam is an advanced level certification for Product Owners in the Scrum framework. Professional Scrum Product Owner II certification is designed for experienced Product Owners who have already achieved the Scrum.org PSPO-I certification and have a deep understanding of the Scrum framework and Agile principles. The PSPO-II Certification Exam is designed to test the Product Owner's ability to manage complex product development processes and deliver value to customers in a dynamic and constantly changing environment.

Scrum Professional Scrum Product Owner II Sample Questions (Q17-Q22):

NEW QUESTION # 17

Which of the following is true about Scrum?

(choose all that apply)

- A. Scrum is a framework for generating value through adaptive solutions for complex problems.
- B. Each component of Scrum serves a specific purpose and is essential to the successful usage of Scrum for building complex products.
- C. Scrum is like traditional processes but with self-management to replace Project Managers.
- D. Scrum is a methodology, where you can "pick and choose" which parts of Scrum you think will work for your environment.
- E. Scrum is based on empiricism.

Answer: A,B,E

Explanation:

Scrum is a lightweight framework that helps people, teams and organizations generate value through adaptive solutions for complex problems. Scrum consists of three roles (Scrum Master, Product Owner and Developers), five events (Sprint, Sprint Planning, Daily Scrum, Sprint Review and Sprint Retrospective), and three artifacts (Product Backlog, Sprint Backlog and Increment). Each component of Scrum serves a specific purpose and is essential to the successful usage of Scrum. Scrum is not a methodology, where you can "pick and choose" which parts of Scrum you think will work for your environment. Scrum is a whole, and each part of Scrum complements the others. Scrum is based on empiricism, which means that knowledge comes from experience and making decisions based on what is observed. Scrum employs an iterative, incremental approach to optimize predictability and control risk. Scrum is not like traditional processes but with self-management to replace Project Managers. Scrum is a different way of working that requires a shift in mindset and culture. Scrum promotes self-organization, collaboration, transparency, inspection and adaptation.
