PL-300 Actual Torrent: Microsoft Power BI Data Analyst & PL-300 Actual Exam & PL-300 Pass for Sure

Our PL-300 exam torrent is compiled by first-rank experts with a good command of professional knowledge, and our experts adept at this exam practice materials area over ten years' long, so they are terrible clever about this thing. They exert great effort to boost the quality and accuracy of our PL-300 study tools and is willing to work hard as well as willing to do their part in this area. Our PL-300 study tools galvanize exam candidates into taking actions efficiently. We are sure you will be splendid and get your desirable outcomes by our PL-300 exam guide. If your mind has made up then our PL-300 study tools will not let you down.

Solutions

Microsoft Power BI Data Analyst Certification Exam is one of the most popular certification exams in the market. However, most candidates don't pass it on their first attempt. The reasons for this are many, but the most common ones are not having enough time

to prepare, not knowing where to start and what to study, or not having access to quality learning materials. To help you overcome these obstacles and pass Microsoft Power BI Data Analyst Certification Exam easily, our experts have created a comprehensive Microsoft **PL-300 Dumps** that will give you everything you need to know to pass Microsoft Power BI Data Analyst Certification Exam quickly and efficiently.

This study guide contains everything you will need to have a deep understanding of this certification and take it with confidence. Our experts have taken great care in creating this study guide by using only high-quality resources available on the internet. Our goal is to help you understand each concept so that when taking the exam, there will be no surprises that throw off your momentum or cause you any stress during your preparation or while taking the exam itself.

Microsoft Power BI Data Analyst Sample Questions (Q409-Q414):

NEW QUESTION # 409

Which DAX expression should you use to get the ending balances in the balance sheet reports?

- A. FIRSTNONBLANK ('Date' [Date]
SUM(BalanceSheet[BalanceAmount])
)
- B. CALCULATE (MAX(BalanceSheet[BalanceAmount]),
LASTDATE('Date' [Date])
)
- C. **CALCULATE (**
SUM(BalanceSheet [BalanceAmount]),
DATESQTD('Date'[Date])
)
- D. CALCULATE (
SUM(BalanceSheet [BalanceAmount]),
LASTDATE('Date'[Date])
)

Answer: C

Explanation:

Scenario: At least one of the balance sheet reports in the quarterly reporting package must show the ending balances for the quarter, as well as for the previous quarter.

DATESQTD returns a table that contains a column of the dates for the quarter to date, in the current context.

Reference:

Topic 1, Contoso Ltd, Case Study

Contoso Ltd. is a manufacturing company that produces sports equipment. Contoso holds quarterly board meetings for which financial analysts manually prepare Microsoft Excel reports, including balance sheets and profit and loss statements for each of the company's four business units.

Data for the reports comes from the sources shown in the following table.

□ The balance sheet data is unrelated to the profit and loss results other than they both relate to dates.

□ The balance sheet data is imported and includes the final monthly balances of each account in the format shown in the following table.

□ The balance sheet data always includes a row for each account for each month.

□ The product catalog shows how products roll up to product categories, which roll up to the business units the product list is provided in the format shown in the following table.

□ Revenue data is provided at the date and product level. Expense data is provided at the date and department level.

Contoso wants the reports and datasets refreshed with minimum manual effort.

The company wants to provide the board with 3 single package of reports that will contain custom navigation and links to supplementary information.

Maintenance, including maturity updating data and access, must be minimized as much as possible.

The reports must be made available to the board from powerbi.com. A group in Microsoft Azure Active Directory' (Azure AD), part of Microsoft Entra, will be used to share information with the board. Contoso identifies the following security requirements for analyst access:

* Analysts must be able to access all balance sheet and product catalog data.

* Analysts must be able to access only the profit and loss data of their respective business unit

* Analysts must be able to create new reports from the dataset that contains the profit and loss data, but the reports built by the

analysts must NOT be included in the quarterly reports for the board.

* Analysts must NOT be able to share the quarterly reports with anyone.

* Analysts must NOT be able to make new reports by using the balance sheet data.

You plan to relate the balance sheet table to a date table in Power BI in a many-to-one relationship based on the last day of the month. At least one of the balance sheet reports in the quarterly reporting package must show the ending balances for the quarter, as well as for the previous quarter.

The date table will contain the columns shown in the following table.

The definitions and attributes for the products, departments, and business units must be consistent across all the reports. The board must be able to get the following information from the quarterly reports:

* Revenue trends over time

* The ending balances of each account

* Changes in long-term liabilities from the previous quarter

* The percent of total revenue contributed by each product category

* A comparison of quarterly revenue versus the same quarter from the previous year. The reports must be updated with the latest data by 5 AM each day.

Overview

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Existing Environment

Contoso, Ltd. is a manufacturing company that produces outdoor equipment. Contoso has quarterly board meetings for which financial analysts manually prepare Microsoft Excel reports, including profit and loss statements for each of the company's four business units, a company balance sheet, and net income projections for the next quarter.

Data and Sources

Data for the reports comes from three sources. Detailed revenue, cost and expense data comes from an Azure SQL database. Summary balance sheet data comes from Microsoft Dynamics 365 Business Central. The balance sheet data is not related to the profit and loss results; other than they both relate to dates.

Monthly revenue and expense projections for the next quarter come from a Microsoft SharePoint Online list.

Quarterly projections relate to the profit and loss results by using the following shared dimensions: date, business unit, department, and product category.

Net Income Projection Data

Net income projection data is stored in a SharePoint Online list named Projections in the format shown in the following table.

Revenue projections are set at the monthly level and summed to show projections for the quarter.

Balance Sheet Data

The balance sheet data is imported with final balances for each account per month in the format shown in the following table.

There is always a row for each account for each month in the balance sheet data.

Dynamics 365 Business Central Data

Business Central contains a product catalog that shows how products roll up to product categories, which roll up to business units. Revenue data is provided at the date and product level. Expense data is provided at the date and department level.

Business Issues

Historically, it has taken two analysts a week to prepare the reports for the quarterly board meetings. Also, there is usually at least one issue each quarter where a value in a report is wrong because of a bad cell reference in an Excel formula. On occasion, there are conflicting results in the reports because the products and departments that roll up to each business unit are not defined consistently.

Planned Changes

Contoso plans to automate and standardize the quarterly reporting process by using Microsoft Power BI. The company wants to know how long it takes to populate reports to less than two days. The company wants to create common logic for business units, products, and departments to be used across all reports, including, but not limited, to the quarterly reporting for the board.

Technical Requirements

Contoso wants the reports and datasets refreshed with minimal manual effort. The company wants to provide a single package of reports to the board that contains custom navigation and links to supplementary information.

Maintenance, including manually updating data and access, must be minimized as much as possible.

Security Requirements

The reports must be made available to the board from powerbi.com. A mail-enabled security group will be used to share information with the board.

The analysts responsible for each business unit must see all the data the board sees, except the profit and loss data, which must be restricted to only their business unit's data. The analysts must be able to build new reports from the dataset that contains the profit and loss data, but any reports that the analysts build must not be included in the quarterly reports for the board. The analysts must not be able to share the quarterly reports with anyone.

Report Requirements

You plan to relate the balance sheet to a standard date table in Power BI in a many-to-one relationship based on the last day of the month. At least one of the balance sheet reports in the quarterly reporting package must show the ending balances for the quarter, as well as for the previous quarter.

Projections must contain a column named RevenueProjection that contains the revenue projection amounts. A relationship must be created from Projections to a table named Date that contains the columns shown in the following table.

The relationships between products and departments to business units must be consistent across all reports.

The board must be able to get the following information from the quarterly reports:

* Revenue trends over time

* Ending balances for each account

* A comparison of expenses versus projections by quarter

* Changes in long-term liabilities from the previous quarter

* A comparison of quarterly revenue versus the same quarter during the prior year

NEW QUESTION # 410

You have a Power BI workspace that contains a single-page report named Sales.

You need to add all the visuals from Sales to a dashboard. The solution must ensure that additional visuals added to the page are added automatically to the dashboard.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

1 - Open Power BI Desktop

2 - Open the Sales report

3 - Pin the page

NEW QUESTION # 411

You need to design the data model and the relationships for the Customer Details worksheet and the Orders table by using Power BI. The solution must meet the report requirements.

For each of the following statement, select Yes if the statement is true, Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 412

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this scenario, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have several reports and dashboards in a workspace.

You need to grant all organizational users read access to a dashboard and several reports.

Solution: You assign all the users the Viewer role to the workspace.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

"You have five reports and two dashboards in a workspace. You need to grant all organizational users read access to one dashboard and three reports"

NEW QUESTION # 413

You have the Power BI data model shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

□

Answer:

Explanation:

□

NEW QUESTION # 414

.....

After years of operation, our platform has accumulated a wide network of relationships, so that we were able to learn about the changes in the exam at the first time. This is a benefit that students who have not purchased PL-300 exam guide can't get. The team of experts hired by Microsoft Power BI Data Analyst study questions constantly updates and supplements the contents of study materials according to the latest syllabus and the latest industry research results. We also have dedicated staff to maintain PL-300 Exam Material every day, and you can be sure that compared to other test materials on the market, Microsoft Power BI Data Analyst study questions are the most advanced. With PL-300 exam guide, there will not be a situation like other students that you need to re-purchase guidance materials once the syllabus has changed. PL-300 exam material not only helps you to save a lot of money, but also let you know the new exam trends earlier than others.
