SAP Certified Associate - Positioning SAP Business Suite via SAP Financial Management Solutions Sample Questions (Q38-Q43):

NEW QUESTION # 38

Which processes does SAP Global Trade Services most closely support?

Note: There are 2 correct answers to this question.

- A. Sales
- B. Marketing
- C. Production
- D. Purchasing

Answer: A,D

Explanation:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

SAP Global Trade Services (GTS) is an essential component of the finance and risk landscape, specifically designed to manage the complexities of international trade. It is most closely integrated with the Sales and Purchasing processes. In the Purchasing (Procurement) process, GTS ensures that goods being imported meet all regulatory requirements, checks for sanctioned suppliers, and calculates the appropriate customs duties to be included in the landed cost.

In the Sales (Order-to-Cash) process, GTS performs critical "Sanctioned Party Screening" to ensure that the company is not selling to prohibited individuals or entities. It also manages export licenses and ensures that the goods being shipped comply with the export laws of the origin country and the import laws of the destination. If a violation is detected during either the Sales or Purchasing cycle, GTS can automatically place a "block" on the transaction in the SAP S/4HANA core, preventing further processing until the issue is resolved. This tight integration ensures that trade compliance is not a bottleneck but a real-time safeguard embedded into the supply chain and financial workflows. Marketing and Production, while related to the business, do not typically trigger the cross-border legal and financial compliance checks that define the core function of SAP GTS.

NEW QUESTION # 41

Which of the following is a key feature of SAP S/4HANA Finance?

- A. Limited integration
- B. Batch processing
- **C. Real-time analytics**
- D. Manual data entry

Answer: C

NEW QUESTION # 42

Which SAP Finance technology ensures all finance data is available from a Single source?

- A. Extension Ledger
- B. Actual Costing
- **C. Universal Journal**
- D. Document Splitting

Answer: C

Explanation:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

The cornerstone of SAP S/4HANA Finance is the Universal Journal (table ACDOCA). Traditionally, financial systems relied on separate tables for General Ledger (GL), Controlling (CO), Asset Accounting (AA), and Material Ledger (ML). This fragmentation led to data silos, necessitated complex reconciliations at period end, and often resulted in "multiple versions of the truth." The Universal Journal revolutionizes this by combining all these components into a single line-item table.

By providing a Single Source of Truth, the Universal Journal ensures that financial and managerial accounting are inherently reconciled. Every transaction captured in the system updates one table with all relevant dimensions-including market segments, cost centers, and functional areas. This eliminates the need for reconciliation between FI and CO and provides immediate, real-time access to granular data. For the CFO, this means faster financial closes and the ability to drill down from high-level financial statements directly to the underlying operational detail without leaving the report. This architecture is the "digital core" that enables all other advanced SAP Financial Management capabilities, such as real-time analytics and predictive forecasting.
