

ITexamReview 3V0-24.25 Cert Guide

Do you want to spend the least time to pass your exam? If you do, then we will be your best choice. 3V0-24.25 training materials are compiled by experienced experts who are quite familiar with the exam center, so the quality can be guaranteed. In addition, 3V0-24.25 exam materials contain most of the knowledge points for the exam, and you can have a good command of these knowledge points through practicing. In order to strengthen your confidence for the 3V0-24.25 Exam Braindumps, we are pass guarantee and money back guarantee if you fail to pass the exam. The money will be returned to your payment account.

ITexamReview 3V0-24.25 test questions materials will guide you and help you to pass the certification exams in one shot. If you want to know our 3V0-24.25 test questions materials, you can download our free demo now. Our demo is a small part of the complete charged version. Also you can ask us any questions about VMware 3V0-24.25 Exam any time as you like.

100% Pass Quiz 2026 3V0-24.25: Updated Exam Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service Training

Do you want to pass exam 100% one-shot? Do you want to get certification fast? VMware 3V0-24.25 actual test question is a good way. If you study hard, 20-40 hours' preparation will help you pass exam. Once you clear 3V0-24.25 exam and obtain certification you will have a bright future. You have a great advantage over the other people. VMware 3V0-24.25 Actual Test questions have effective high-quality content and cover at least more than 88% of the real test questions. Looking for the best exam preparation, ours is the best.

VMware Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service Sample Questions (Q122-Q127):

NEW QUESTION # 122

Which feature in VMware vSphere Kubernetes Service (VKS) provides vSphere storage policy integration that supports provisioning persistent volumes and their backing virtual disks?

- A. Cloud storage provider
- B. vSphere Cloud Native Storage (CNS)

- C. Container Storage Interface (CSI)
- D. Cloud storage implementation

Answer: B

Explanation:

VCF 9.0 describes Cloud Native Storage (CNS) on vCenter as the component that implements "provisioning and lifecycle operations for persistent volumes." When provisioning persistent volumes, CNS "interacts with the vSphere First Class Disk functionality to create virtual disks that back the volumes," and it

"communicates with Storage Policy Based Management to guarantee a required level of service to the disks." This is exactly the storage-policy-to-backed-virtual-disk relationship the question is testing: storage policies (via policy-based management) define requirements, and CNS is the vCenter-side service that applies those requirements while creating and managing the backing storage objects.

In contrast, CSI (including Supervisor CNS-CSI and VKS pvCSI) is the Kubernetes-facing interface/driver used to request and consume storage, but it does not "provide" the vSphere storage policy system; rather, it relies on CNS/CNS-CSI and vCenter services to fulfill provisioning requests. Therefore, vSphere Cloud Native Storage (CNS) is the correct choice.

NEW QUESTION # 123

A Platform Engineer needs to enable the Cluster Autoscaler for an existing TKG cluster named web- cluster to handle bursty traffic. The cluster currently has a static worker node count.

Review the TanzuKubernetesCluster YAML snippet:

spec:

topology:

workers:

replicas: 3

vmClass: best-effort-medium

storageClass: default-storage

Which modification to the YAML manifest correctly enables autoscaling for the worker node pool?

- A. Create a HorizontalPodAutoscaler resource targeting the MachineSet.
- B. Install the cluster-autoscaler Helm chart from the VMware marketplace into the cluster.
- C. Add the annotations `cluster.k8s.io/cluster-api-autoscaler-node-group-min-size` and `cluster.k8s.io/cluster-api-autoscaler-node-group-max-size` to the workers section (or the corresponding MachineDeployment).
- D. Change the replicas field to auto.

Answer: C

NEW QUESTION # 124

A Platform Engineer is enabling Workload Management on a vSphere Cluster to prepare it for a new development team. The environment utilizes NSX for networking.

Review the following configuration options available in the "Enable Workload Management" wizard:

[Network Stack]

1. NSX
2. VDS

[Load Balancer]

1. NSX Load Balancer
2. HAProxy
3. Avi Load Balancer

Which specific configuration combination facilitates the deployment of vSphere Pods (native pods)?

- A. Network Stack: VDS | Load Balancer: Avi Load Balancer
- B. Network Stack: VDS | Load Balancer: HAProxy
- C. Network Stack: NSX | Load Balancer: NSX Load Balancer
- D. Network Stack: NSX | Load Balancer: Avi Load Balancer

Answer: C

NEW QUESTION # 125

A VKS Administrator wants to Uninstall a Supervisor Service (e.g., a test instance of MinIO) to free up resources. What is the impact of uninstalling a service on the Persistent Data associated with it (e.g., the MinIO buckets)?

- A. By default, the uninstall workflow deletes the Service Instance and its compute resources (Pods), but the Persistent Volume Claims (PVCs) and the underlying data are typically Retained (unless the specific service operator logic or a "Force Delete" option effectively purges them, but standard K8s practice for stateful sets often leaves PVCs to prevent accidental data loss). Self-Correction: In the vSphere Client workflow for Supervisor Services, "Remove" typically deletes the SupervisorService CR.
The behavior depends on the Operator managing it. However, vSphere often warns that data might be lost or asks. A key exam point is understanding that Uninstall removes the active logic. But usually, for Supervisor Services specifically, it cleans up the namespace created for the service instance.
- B. The data remains on the datastore as orphaned VMDKs.
- C. **The Uninstall operation deletes the dedicated vSphere Namespace created for that service instance, which permanently deletes all Pods, Secrets, and Persistent Volumes (Data) contained within it.**
- D. The service is paused, but data is kept.
- E. The data is archived to the Content Library.

Answer: C

NEW QUESTION # 126

A Security Architect needs to integrate an OIDC provider (Azure AD) with vSphere to provide authentication for a new fleet of TKG clusters. The requirement is to map the Azure AD group k8s- platform-admins (Group Claim: 9283-uuid-xyz) to the cluster-admin role on all TKG clusters automatically upon creation.

Which architectural approach achieves this global policy enforcement? (Choose 2.)

- A. It is not possible to automate this; the admin kubeconfig must be used to set up RBAC for the first time on each cluster.
- B. **Use Tanzu Mission Control (if available/configured) to define an Access Policy that binds the k8s- platform-admins group to the cluster.admin role for the "All Clusters" group.**
- C. Configure the Supervisor to trust the OIDC provider directly via the Supervisor Management API, bypassing vCenter.
- D. Manually create a ClusterRoleBinding on every TKG cluster after provisioning using a script.
- E. **Configure the vCenter Single Sign-On Identity Provider with the Azure AD OIDC settings.**

Answer: B,E

NEW QUESTION # 127

.....

ITExamReview is a globally famous IT exam provider, offering the valid and latest VMware 3V0-24.25 study material to all the candidates. Our mission is to provide quality 3V0-24.25 vce dumps which is easy to understand. There are 3V0-24.25 free demo for you to be downloaded. The purpose of the 3V0-24.25 demo is to show our 3V0-24.25 quality material to valuable customers. If you are satisfied with our 3V0-24.25 latest dumps, you can rest assured to buy it.

Guaranteed 3V0-24.25 Questions Answers: <https://www.itexamreview.com/3V0-24.25-exam-dumps.html>

VMware 3V0-24.25 Dumps - They will mitigate your chance of losing. Firstly, our company always feedbacks our candidates with highly-qualified 3V0-24.25 study guide and technical excellence and continuously developing the most professional exam materials, Controlling your personal information: You may choose to restrain your personal information in the following ways: Whenever you are asked to fill in a form on the website, look for the box that you can click to indicate that you do not want the information to be used by anybody for direct marketing purposes if you have previously agreed to us using your personal information for direct marketing purposes, you may change your mind at any time by writing to or emailing us at ITExamReview Guaranteed 3V0-24.25 Questions Answers We will not sell, distribute or lease your personal information to third parties unless we have your permission or are required by law to do so, VMware Exam 3V0-24.25 Training Convenience and apply to everyone there are three versions for you according to your study habits.
