

HPE7-J02 Test Torrent is Very Helpful for You to Learn HPE7-J02 Exam - Exam4Docs

DOWNLOAD the newest Exam4Docs HPE7-J02 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1M43FvgJCMEDCVY3Whvk-nc4OE_ZW1MbT

Three formats of Advanced HPE Storage Integrator Solutions Written Exam (HPE7-J02) practice material are always getting updated according to the content of real Advanced HPE Storage Integrator Solutions Written Exam (HPE7-J02) examination. The 24/7 customer service system is always available for our customers which can solve their queries and help them if they face any issues while using the HPE7-J02 Exam product. Besides regular updates, Exam4Docs also offer up to 1 year of free real Advanced HPE Storage Integrator Solutions Written Exam (HPE7-J02) exam questions updates.

HP HPE7-J02 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• HPE Storage Portfolio and Strategy: This domain measures the knowledge of Solution Advisors in positioning HPE's Storage portfolio within enterprise infrastructure. Candidates must understand HPE Storage hardware, procurement options, available tools, and the overarching storage strategy, including its relevance to enterprise-scale solutions.
Topic 2	<ul style="list-style-type: none">• Planning and Validating Storage Solutions: This section assesses the role of Storage Consultants in evaluating complex, multi-vendor environments. Candidates will demonstrate their ability to plan, size, and validate storage solutions tailored for enterprise workloads, ensuring proposals meet customer requirements effectively.
Topic 3	<ul style="list-style-type: none">• Optimizing the Customer's Environment: This domain evaluates the skills of Optimization Specialists in identifying opportunities for improvement. Candidates will design and validate optimization plans that enhance customer environments, ensuring measurable performance and efficiency gains.
Topic 4	<ul style="list-style-type: none">• Advanced Troubleshooting and Prevention: This section focuses on the ability of Support Engineers to identify root causes of issues and implement advanced preventive measures. It emphasizes building resilience in customer environments to minimize future disruptions.

HP HPE7-J02 Exam Dumps Fastest Way Of Preparation 2026

Exam4Docs's HPE7-J02 certification is a dispensable part in IT area. So how can we achieve it in a short time? Exam4Docs will be

your choice. HPE7-J02 test training materials of Exam4Docs are organized by experienced IT experts. If you still worry, you can download HPE7-J02 free demo before purchase.

HP Advanced HPE Storage Integrator Solutions Written Exam Sample Questions (Q47-Q52):

NEW QUESTION # 47

An HPE Alletra 6030 with 138TB flash kit needs a storage expansion. The BOM lists only a 46TB Expansion Shelf, including price. What should you take into account?

- A. QSFP+ DAC cables are required if NVMe media is used.
- **B. The expansion shelf needs to include the 24G SAS cables.**
- C. Total supported capacity will be exceeded with the proposed configuration.
- D. Both Controllers need 100Gb OCP adapters for the expansion shelf connection.

Answer: B

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

Alletra 6000 expansion shelves connect via 24G SAS back-end connectivity. The BOM must include the required SAS cables to properly attach the shelf. If only the shelf is listed, it's incomplete - SAS connectivity accessories must be added.

Distractors:

B: The supported max capacity is higher than 138TB + 46TB, so it won't exceed limits.

C: Expansion shelves don't use OCP adapters; they rely on SAS backend ports.

D: QSFP+ DACs are used for front-end networking (iSCSI/FC), not SAS shelf expansion.

Key Concept: Alletra 6000 expansions require 24G SAS cables included in the BOM.

Reference: HPE Alletra 6000 Hardware Installation Guide.

NEW QUESTION # 48

You are sizing an HPE Alletra Storage MP B10000 array (graphic provided).

What happens when the High Availability (HA) option is switched from Drive Level to Enclosure Level?

- A. The Enclosure Level option is not possible with the current number of disk enclosures
- B. The estimated performance decreases due to lower IOPS and GB/s values
- **C. The Usable Capacity for the array decreases when selecting Enclosure Level HA**
- D. The Enclosure Level option is only available with a switched configuration

Answer: C

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

Changing HA from Drive Level to Enclosure Level means the system must reserve additional capacity to tolerate the loss of an entire disk enclosure. This decreases usable capacity, as more parity/spare space is required. Performance remains similar, but capacity overhead increases.

Distractors:

A: Multiple enclosures exist in the config; option is valid.

B: Switched vs direct-connect is unrelated to HA settings.

C: Performance estimates are not directly reduced by HA level change; capacity is.

Key Concept: Enclosure HA = more reserve overhead # less usable capacity.

Reference: HPE Alletra MP Sizing Tool User Guide.

NEW QUESTION # 49

A global financial services company is looking to enhance its disaster recovery (DR) capabilities. They operate VMware workloads across multiple data centers and a mix of AWS and Azure cloud workloads. They need a solution that can replicate data with near-zero recovery point objectives (RPOs) and orchestrate rapid recovery of critical applications in case of a site-wide failure.

- A. SimpliVity
- B. CommVault
- **C. Zerto**
- D. Cohesity

Answer: C

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

Zerto, now part of HPE, provides continuous data protection (CDP) with near-zero RPOs and very low RTOs. It supports VMware workloads, as well as hybrid cloud deployments with AWS and Azure. Zerto is specifically designed for disaster recovery orchestration, enabling automated failover, failback, and application-consistent protection across sites and cloud environments.

Distractors:

B (CommVault): Primarily a backup/recovery and data management platform - RPOs are not near-zero.

C (Cohesity): Strong in backup, secondary storage, and ransomware recovery, but not near-zero RPO DR orchestration.

D (SimpliVity): Hyperconverged infrastructure with built-in backup, but not optimized for large-scale multi- cloud DR.

Key Concept: Continuous Data Protection (Zerto) for hybrid/multi-cloud disaster recovery.

Reference: HPE Zerto DR for Hybrid and Multi-cloud Environments.

NEW QUESTION # 50

Your customer is a hospital that recently experienced an outage that impacted patient care. They are evaluating HPE SimpliVity. Which statement about HPE SimpliVity RapidDR is correct?

- A. HPE RapidDR auto-commit and auto-rollback policies are completed without user interaction.
- B. HPE RapidDR ensures an RTO of 0 in a stretched cluster topology.
- **C. HPE RapidDR requires an authorized person to execute a pre-configured recovery plan during failover.**
- D. HPE RapidDR requires domain administrator credentials to re-IP virtual machines in the failover site.

Answer: C

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

HPE SimpliVity RapidDR simplifies and automates DR failover processes, but execution requires an authorized operator to trigger a pre-configured recovery plan. This balances automation with compliance and security requirements (important for healthcare). It does not guarantee zero RTO, but it does minimize RTO through automation.

Distractors:

A: RTO of 0 is not possible; RapidDR reduces but does not eliminate recovery time.

B: Domain admin credentials for re-IP are not required; automation handles reconfiguration.

C: Auto-commit/rollback require administrator validation; no "silent" automation is allowed for compliance.

Key Concept: RapidDR = automation of failover/failback but requires authorized trigger.

Reference: HPE SimpliVity RapidDR Technical Overview.

NEW QUESTION # 51

Refer to the exhibit of Zerto Vault architecture.

Which statement about the Zerto Vault architecture is correct?

- A. Immutable snapshots of all Zerto components are taken at the Replication Target and replicated to the Vault.
- B. The Resilience Automation Server manages port access between Production and the Replication Target.
- **C. Data is replicated via encrypted periodic replication between the Replication Target and the Vault.**
- D. Data is replicated via encrypted periodic replication between Production and the Replication Target.

Answer: C

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

In the Zerto Vault architecture, production workloads replicate continuously to a Replication Target (secondary site). From there,

data is further replicated periodically and encrypted into the Vault (air-gapped, isolated site). This two-step process ensures ransomware resilience and immutability, as the Vault acts as a hardened third copy.

Distractors:

A: Production-to-replication target traffic is continuous synchronous/asynchronous replication, not periodic.

Periodic replication applies to Replication Target # Vault.

C: The Resilience Automation Server (RAS) is responsible for orchestrating failover and immutability enforcement, but it does not control port access between production and replication target.

D: Snapshots of Zerto components are not what is replicated - it's application data VMs/volumes. The Vault ensures immutability of replicated data, not ZVM components.

Key Concept: Zerto Vault = encrypted, periodic replication from replication target to immutable vault.

Reference: HPE Zerto Vault Architecture White Paper, HPE Ransomware Recovery Solutions.

NEW QUESTION # 52

.....

HP is obliged to give you 12 months of free update checks to ensure the validity and accuracy of the HP HPE7-J02 exam dumps. We also offer you a 100% money-back guarantee, in the very rare case of failure or unsatisfactory results. This puts your mind at ease when you are HP HPE7-J02 Exam preparing with us.
