Practice ISA-IEC-62443 Online - Quiz ISA First-grade Reliable ISA-IEC-62443 Braindumps Free

Compared with the book version, our ISA-IEC-62443 exam dumps is famous for instant access to download, and if you receive your downloading link within ten minutes, and therefore you don't need to spend extra time on waiting the arriving of the exam materials. Furthermore, ISA-IEC-62443 training materials are edited and verified by professional experts, therefore the quality can be guaranteed. We offer you free update for one year for ISA-IEC-62443 Study Materials, and the update version will be sent to your email automatically. If you choose us, you just choose to pass your exam just one time!

ISA/IEC 62443 Cybersecurity Fundamentals Specialist Sample Questions (Q178-Q183):

NEW QUESTION # 178

Which model describes relationships between assets within an industrial automation and control system?

- A. Asset model
- B. Security level model
- C. Reference architecture
- D. Zone model

Answer: A

Explanation:

The asset model is used in ISA/IEC 62443 to represent and describe the relationships and dependencies between different assets in an IACS environment. This model helps organizations identify and document assets, their interconnections, and their significance for operational and cybersecurity purposes. The zone model builds upon the asset model for segmentation, but the asset model itself establishes the foundational relationships.

Reference: ISA/IEC 62443-1-1:2007, Section 4.3.1 ("Asset Model"); Figure 3 ("Example asset model for IACS").

NEW QUESTION # 179

Which is a physical layer standard for serial communications between two or more devices?

Available Choices (select all choices that are correct)

- A. RS232
- B. RS235
- C. RS432
- D. RS435

Answer: A

Explanation:

RS232 is a physical layer standard for serial communication between two or more devices. It defines the electrical characteristics, timing, and pinout of connectors for serial data transmission. RS232 is widely used in industrial communication devices, such as PLCs, measuring instruments, and network servers. RS232 allows only one master and one slave to communicate on each line, and operates in a full duplex mode. RS232 has lower transmission speed, shorter maximum cable length, and larger voltage swing than later standards such as RS422 and RS485. References: 1: Basics of RS232, RS422, and RS485 Serial Communication 2: RS-232 - Wikipedia 3: RS232 Serial Communication Protocol: Basics, Working & Specifications

NEW QUESTION # 180

Which of the following is an example of separation of duties as a part of system development and maintenance?

Available Choices (select all choices that are correct)

- A. Developers write and then test their own code.
- B. Changes are approved by one party and implemented by another.
- C. Design and implementation are performed by the same team.
- D. Configuration settings are made by one party and self-reviewed using a checklist.

Answer: B

NEW QUESTION # 181

Whose responsibility is it to determine the level of risk an organization is willing to tolerate?

Available Choices (select all choices that are correct)

- A. Operations Department
- B. Management
- C. Safety Department
- D. Legal Department

Answer: B

NEW QUESTION # 182

What programs are MOST effective if they are tailored to the audience, consistent with company policy, and communicated regularly?

- A. CSMS development
- B. ISCS cybersecurity certification programs
- C. Control systems adjustment programs

- **D. Cybersecurity awareness programs**

Answer: D

Explanation:

Cybersecurity awareness programs are critical for ensuring that all personnel understand and follow security practices. To be effective, these programs must be:

Tailored to roles and responsibilities

Aligned with company policies

Communicated regularly and reinforced

"An effective cybersecurity awareness program is audience-specific, policy-aligned, and continuously reinforced to ensure long-term behavioral change."

- ISA/IEC 62443-2-1:2010, Clause 4.3.3 - Security Training and Awareness These programs are part of the organization's security governance and are essential for building a security- focused culture.
