AB-900 Valid Exam Questions - Latest AB-900 Exam Guide

Our online test engine and the windows software of the AB-900 study materials can evaluate your exercises of the virtual exam and practice exam intelligently. Our calculation system of the AB-900 study materials is designed subtly. Our evaluation process is absolutely correct. We are strictly in accordance with the detailed grading rules of the real exam. The point of every question is set separately. Once you submit your exercises of the AB-900 Study Materials, the calculation system will soon start to work.

Microsoft 365 Copilot & Agent Administration Fundamentals Sample Questions (Q64-Q69):

NEW QUESTION # 64

You are reviewing your company's security policies as part of a Zero Trust strategy. Which statement accurately describes the Zero Trust principles?

- A. Zero Trust enhances the user experience by minimizing authentication prompts.
- B. Zero Trust treats all requests from your corporate network as trustworthy.
- C. Zero Trust assumes breach and verifies each request.
- D. Zero Trust removes the need to regularly review and adjust access permissions.

Answer: C

Explanation:

The correct answer is A . Microsoft Learn defines Zero Trust as a security strategy built on the principles verify explicitly , use least privilege access , and assume breach . Microsoft also summarizes Zero Trust as a model that assumes breach and verifies every request , rather than trusting users, devices, or traffic simply because they originate from inside the corporate network. This is the

key reason option A is correct.

Under Zero Trust, every access request should be evaluated continuously using available signals such as identity, device state, location, service, and risk.

Option B is incorrect because improving user experience is not the defining principle of Zero Trust. Option C is incorrect because Zero Trust requires ongoing review and adjustment of permissions, especially through least privilege and risk-based access. Option D is incorrect because Zero Trust explicitly rejects implicit trust based on network location. Microsoft states that organizations should reduce reliance on the traditional idea that anything on the internal network is automatically safe or trustworthy.

NEW QUESTION # 65

Compliance needs a report listing SharePoint sites that contain highly sensitive documents but are shared with broad groups such as "Everyone except external users." Which Microsoft capability is designed to run Data Access Governance (DAG) reports that identify sensitive content plus permissive sharing posture?

- A. Microsoft Entra ID Protection
- **B. SharePoint Advanced Management (SAM)**
- C. Microsoft Defender for Cloud Apps
- D. Microsoft Purview Data Loss Prevention (DLP)

Answer: B

Explanation:

SharePoint Advanced Management includes specific capabilities for data access governance, including the Data Access Governance (DAG) report. This report is specifically designed to identify sites based on their content sensitivity (via Purview sensitivity labels) and their sharing posture (e.g., sharing links, large group membership like "Everyone"), which directly addresses the requirement to find sites with sensitive data and overly permissive settings.

NEW QUESTION # 66

Hotspot Question

Select the answer that correctly completes the sentence.

Answer:

Explanation:

NEW QUESTION # 67

Your organization has a Microsoft 365 subscription that contains a user named User1. User1 plans to leave your company in two weeks. You need to capture the activity of User1 to identify whether the user is exfiltrating data. Which Microsoft Purview solution should you use?

- **A. Insider Risk Management**
- B. Data Lifecycle Management
- C. Communication Compliance
- D. Data Security Posture Management

Answer: A

Explanation:

The correct answer is C. Insider Risk Management . Microsoft documents that Microsoft Purview Insider Risk Management helps organizations detect, investigate, and act on potentially risky internal activities, including data theft and data leakage . Microsoft specifically provides policy templates for departing users

, describing scenarios where users who are leaving an organization might download files, print files, or copy data to personal cloud storage or messaging services near their resignation or end date. That matches this question exactly, where User1 is leaving in two weeks and you need to determine whether the user is exfiltrating data.

The other options do not fit. Communication Compliance is for reviewing risky communications, Data Security Posture Management focuses on broader data exposure posture, and Data Lifecycle Management is for retention and deletion. None of those is the

Microsoft Purview solution specifically built to monitor suspicious user activity and data exfiltration risk for departing employees. Microsoft positions Insider Risk Management as the correct tool for this scenario.

NEW QUESTION # 68

Your organization has a Microsoft 365 subscription.

Which two tasks can you perform by using the Exchange admin center? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Add a custom domain.
- B. Assign a Microsoft Exchange license.
- C. Create a mail flow rule.
- D. Create a shared mailbox.

Answer: C,D

Explanation:

The correct answers are A and D because both tasks are supported directly in the Exchange admin center (EAC). Microsoft Learn states that administrators can manage mail flow rules in Exchange Online from the EAC under Mail flow > Rules, which includes creating and managing transport rules for organizational email handling. Microsoft Learn also states that administrators can create shared mailboxes in the EAC under Recipients > Mailboxes, where a shared mailbox can be added and then delegated to users. Option B is incorrect because adding a custom domain is normally done in the Microsoft 365 admin center, specifically on the Domains page. Although Exchange can later work with accepted domains and related mail flow settings, the act of adding and verifying a custom domain is not an Exchange admin center task. Option C is incorrect because license assignment is handled through Microsoft 365 or Microsoft Entra administrative tools, not the Exchange admin center.

NEW QUESTION # 69

.....

No matter where you are, we will ensure that you can use our AB-900 guide quiz at any time. We have provided you with three versions for your choice: the PDF, Software and APP online. At home, you can use the Software. Outside, you can use the APP version of our AB-900 Study Materials. If you like the aroma of paper, you can choose the PDF version. You can carry the printed material with you and write your own notes on it. If you want to know more about them, just free download the demos of our AB-900 exam questions.
