BCI Certificate of the Business Continuity Institute (CBCI) 認定 CBCI 試験問題 (Q56-Q61):

質問 # 56

Which of the following statements about an Activity Business Impact Analysis (BIA) is correct?

- A. An Activity BIA identifies risks to delivery activities and establishes strategies to either prevent risks arising or to mitigate their effects should they arise
- B. An Activity BIA determines the resources required to deliver the organization's prioritized products and services
- **C. An Activity BIA identifies and prioritizes the activities that deliver the most urgent products and services and determines the resources and dependencies required to enable continuity**
- D. An Activity BIA ensures that all of the activities undertaken by an organization can continue as usual during a disruption and sets out a detailed plan to enable continuity

正解: C

解説:

An Activity Business Impact Analysis (BIA) is a crucial component of the Business Continuity Management System (BCMS) that focuses on identifying and prioritizing the activities within the organization that contribute to delivering critical products and services. According to the CBCI 7.0 course, the Activity BIA maps out which activities are most urgent and vital, and it determines the necessary resources and interdependencies required to maintain or restore these activities following a disruption. This detailed understanding enables the organization to allocate resources effectively and design recovery strategies tailored to priority activities. Unlike a broad process or product BIA, the Activity BIA provides granular insights into operational components, ensuring continuity plans address practical recovery needs and dependencies.

質問 # 57

In relation to Solutions Design, a gap analysis is used to determine whether:

- A. Personnel are embracing Business Continuity sufficiently well to deliver Business Continuity requirements
- B. The results of an external audit are justified in terms of internal evidence of Business Continuity achievements
- **C. New strategies and solutions are in order to meet Business Continuity requirements**
- D. The organization is performing at its optimum financial level

正解: C

解説:

A gap analysis is a critical evaluation tool used in the Solutions Design phase to identify differences between existing Business Continuity capabilities and what is required to achieve organizational resilience. The CBCI 7.0 course specifies that this analysis determines if new or revised strategies and solutions are needed to meet Business Continuity requirements effectively. By comparing current states with desired outcomes, the gap analysis highlights areas lacking adequate controls, resources, or processes. It drives decision-making for prioritizing improvements and investments in continuity measures. This systematic assessment ensures that Business Continuity strategies are fit for purpose and aligned with evolving risks and business objectives. It is not focused on financial performance or audit justifications but on actionable capability enhancements.

質問 # 58

When developing solutions for people strategies, solutions to recover activities with a short Recovery Time Objective (RTO) requiring redeployment of personnel should be supported by:

- A. Recruitment of additional personnel so that the organization always has access to surplus staff in case of an incident occurring
- **B. The development of training material including all relevant information and procedures so that this can be made available when required**
- C. Links to social media so the organization can run an extensive recruitment campaign both inside and outside the organization if a disruptive event occurs
- D. Induction and training by an operational manager at the time when the disruption is underway so that individuals can build understanding and confidence prior to commencing the allocated tasks

正解: B

解説:

Short RTOs necessitate rapid recovery actions that often require personnel to perform tasks they may not usually undertake. The CBCI 7.0 course outlines that providing accessible, comprehensive training materials in advance ensures personnel can quickly familiarize themselves with necessary procedures during a disruption. This proactive preparation supports redeployment without delay, building confidence and reducing errors. While recruitment and on-the-fly training are options, relying on real-time induction is risky and can delay recovery. Social media recruitment is impractical during crises due to time constraints.

Preparedness through training material is key for agility.

質問 # 59

Which of the following is demonstrated where an organization includes Business Continuity in induction processes and sets Business Continuity objectives for personnel?

- A. The use of validation
- **B. The organization's Business Continuity culture**
- C. The role of the Business Continuity professional
- D. The organization's approach to risk assessment

正解: B

解説:

Embedding Business Continuity into induction and setting objectives for personnel clearly indicates a mature Business Continuity culture. The CBCI 7.0 course details that a strong culture is characterized by widespread awareness, commitment, and integration of Business Continuity principles into everyday activities. Including continuity in induction familiarizes new staff with the organization's resilience expectations, while individual objectives reinforce personal accountability. This cultural embedding supports sustainable continuity practices and improves the likelihood of effective responses during disruptions. It reflects a proactive organizational mindset rather than isolated activities or roles.

質問 # 60

As part of the process to develop a Business Continuity policy, it is important to ensure that:

- A. Access to the policy is restricted to top management and department heads
- **B. The policy is communicated widely within the organization**
- C. All personnel who are provided with a copy of the policy are required to confirm that they will treat its contents as confidential
- D. Communications specialists take control of the distribution of the policy and the management of any future revisions

正解: B

解説:

The CBCI 7.0 course emphasizes that wide communication of the Business Continuity policy is vital to ensure that all personnel understand the organization's commitment to continuity and their roles within the BCMS. Transparency fosters engagement and
