- Enable collaboration in the Service Cloud
- Analyze support data with reports and dashboards
- Automate the support process
- Understand the Salesforce Console

Salesforce Certification Preparation for Advanced Administrator Sample Questions (Q203-Q208):

NEW QUESTION # 203

The sales manager at Cloud Kicks (CK) wants to make sure the accounts that CK serves are happy. One way they track this is by how many open cases an account has with CK. The sales manager asks CK's administrator to build a report to show Accounts with Open Cases.

What report type would this be?

- A. Joined Report
- B. Bucket Report
- C. Summary Report
- D. Matrix Report

Answer: A

Explanation:

A joined report is a type of report that allows you to create multiple report blocks that provide different views of your data. Each report block can have its own fields, columns, sorting, and filtering. A joined report can only be created from summary or matrix reports. You can use a joined report to show data from different report types or data sources on a single report. In this case, you can use a joined report to show Accounts with Open Cases by creating two report blocks: one for accounts and one for cases with a filter for open status.

You can then join the two blocks by a common field such as Account ID or Account Name. References:

NEW QUESTION # 204

AW Computing created new multi-tier service plans. The primary difference between the packages is the length of the term. The company wants to capture start and end dates for each service plan sold, which can differ from the contract dates of the subscription. How should an administrator ensure the data is captured properly?

- A. Configure formula fields to reflect the close date of the opportunity.
- B. Build a validation rule on the Opportunity object to require custom date fields based on the product(s) selected.
- C. Make a validation rule on the Opportunity Product object to require custom date fields based on the product family.
- D. Create a new price book for service plans with term lengths.

Answer: C

Explanation:

Make a validation rule on the Opportunity Product object to require custom date fields based on the product family is how the administrator should ensure the data is captured properly. A validation rule is a way to enforce data quality and integrity.

NEW QUESTION # 205

Choose the Forecast schedule type that is a revenue projection that can be expressed in dollar amount, units of product family, or both.

- A. Quota
- B. Forecast
- C. Pipeline

Answer: B

NEW QUESTION # 206

What is not a requirement of Joined Reports? (Select 2)

- A. Objects can only be standard
- B. Objects can only be standard
- C. Objects must be grouped by one common field to all objects
- D. All objects must have the same parent object

Answer: A,C

NEW QUESTION # 207

Universal Containers has a Private sharing model for Accounts and Opportunities. A new team is being created from within the sales team that will be assigned all renewal opportunities. These users will need to see all closed won opportunities while keeping the account private.

How should the administrator meet this requirement?

- A. Create a new profile for the renewals team with View All permission enabled on Accounts and Opportunities.
- B. Create a permission set with View All enabled on Accounts and assign it to the new users.
- C. Update the organization-wide default on Opportunities to Public Read Only and add them to the opportunities team.
- D. Create a public group for the renewals team and create a criteria based sharing rule on Opportunities.

Answer: A
