IIBA Entry Certificate in Business Analysis (ECBA) Sample Questions (Q64-Q69):

NEW QUESTION # 64

The task that uses the elicitation activity plan to draw out, explore and identify information relevant to the change is:

- **A. conduct elicitation.**
- B. confirm elicitation results.
- C. prepare for elicitation.
- D. plan business analysis information.

Answer: A

Explanation:

The task that uses the "Elicitation Activity Plan" to draw out, explore, and identify information relevant to the change is "Conduct Elicitation." This task involves direct interaction with stakeholders or independent research to understand stakeholder needs and identify potential solutions that may meet those needs. The Elicitation Activity Plan guides the business analyst through the planned elicitation activities, ensuring that the elicitation is focused, efficient, and aligned with the project objectives. This structured approach to elicitation helps in gathering relevant and accurate information, which is essential for the success of the change initiative.

NEW QUESTION # 65

Which of the following is an activity that a business analyst (BA) performs to prepare for elicitation?

- **A. Secure supporting material**
- B. Analyze performance measures
- C. Trace requirements
- D. Assess risk

Answer: A

NEW QUESTION # 66

In which activity would a business analyst (BA) consider using an organizational Center of Excellence?

- **A. Determining the optimal business analysis approach**
- B. Defining the limits within which decisions must be made
- C. Understanding the stakeholders concerns and interests
- D. Providing techniques and procedures to be followed

Answer: A

Explanation:

A Center of Excellence (CoE) supports this by providing standardized methods, best practices, and lessons learned that can help a BA determine the most effective approach for their analysis work.

NEW QUESTION # 67

A data model that is used by implementation subject matter experts to address concerns such as performance, concurrency, and security, is:
