NEW QUESTION # 63

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A process manufacturer is implementing Dynamics 365 Supply Chain Management to produce sports energy bars, beverages, and nutritional supplements.

The company must run a series of quality control tests for all its beverage items for each production run after the items are completed from a production job. The testing process for all beverages must follow the same process. The energy bars and nutritional supplements have their own testing requirements.

The specific tests are not yet defined.

You need to configure the quality associations in preparation for the requirements.

Solution: Create a quality association for each item with Reference type as Inventory, using item code as Table and specifying each item on the quality associations. Set Event type to Report as finished. Set Execution to After.

Does the solution meet the goal?

- A. Yes
- **B. No**

Answer: B

Explanation:

Correct:

* Create a quality association with Reference type as Production and Item code as Group. Create a quality group for all items and assign it to the quality association. Set Event type to Report as finished. Set Execution to After.

Incorrect:

* Create a test group for all beverage items. Create a quality association with Reference type as Production and Item code as All. Assign the test group to the quality association. Set Event type to Report as finished. Set Execution to After.

* Create a quality association for each item with Reference type as Inventory, using item code as Table and specifying each item on the quality associations. Set Event type to Registered. Set Execution to Before.

* Create a quality association for each item with Reference type as Inventory, using item code as Table and specifying each item on the quality associations. Set Event type to Report as finished.

Set Execution to After.

Note:

You can use quality associations in Microsoft Dynamics 365 Supply Chain Management to automatically generate quality orders that are related to your sales, purchase, inbound shipment order, and production processes.

NEW QUESTION # 65

A company operates a chain of retail coffee shops and a distribution center. Each coffee shop and the distribution center are distinct warehouses.

Cups and lids are replenished from a single distribution center.

You need to configure store replenishment for coffee cup lids.

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Set the coverage plan by dimension for warehouse on the Storage dimension group.
- B. Set the minimum item coverage to 0. Set the maximum item coverage to the number of lids to keep on hand.
- C. Set the minimum item coverage to the safety stock quantity. Set the maximum to the maximum quantity of stock to reorder above the safety stock quantity.
- D. Create a coverage group assignment for the item.
- E. Set the minimum item coverage to the safety stock quantity. Set the maximum item coverage to 0.

Answer: A,C,D
