CheckPoint Check Point Certified Security Administrator - R82 Sample Questions (Q13-Q18):

NEW QUESTION # 13

What type of NAT is a one-to-one relationship where each host is translated to a unique address?

- A. Hide
- **B. Static**
- C. Source
- D. Destination

Answer: B

Explanation:

The type of NAT that is a one-to-one relationship where each host is translated to a unique address is Static NAT. Static NAT maps an unregistered IP address to a registered IP address on a one-to-one basis. This means that for each internal host, there is a corresponding external address that represents it. Therefore, the correct answer is B.

NEW QUESTION # 14

Which of the following are types of VPN communities?

- A. Star, octagon, and combination
- **B. Meshed, star, and combination**
- C. Combined and star
- D. Pentagon, star, and combination

Answer: B

Explanation:

The types of VPN communities are Meshed, Star, and Combination. A Meshed community is a group of Security Gateways that have VPN connections between every pair of members. A Star community has one Security Gateway as the center and other Security Gateways or hosts as satellites. A Combination community is a group of Meshed and Star communities. NEW QUESTION # 15

What default layers are included when creating a new policy layer?

- A. Firewall, Application Control and IPSec VPN
- **B. Access Control, Threat Prevention and HTTPS Inspection**
- C. Firewall, Application Control and IPS
- D. Application Control, URL Filtering and Threat Prevention

Answer: B

Explanation:

The default layers that are included when creating a new policy layer are Access Control, Threat Prevention, and HTTPS Inspection. Access Control is the layer that defines the basic firewall rules. Threat Prevention is the layer that enables the protection against various types of attacks, such as IPS, Anti-Virus, Anti-Bot, etc. HTTPS Inspection is the layer that allows the inspection of encrypted traffic. The other options are not the default layers that are included when creating a new policy layer.

NEW QUESTION # 16

Which information is included in the "Extended Log" tracking option, but is not included in the "Log" tracking option?

- A. file attributes

- B. application information
- C. data type information
- D. destination port

Answer: B

Explanation:

Application information is included in the "Extended Log" tracking option, but is not included in the "Log" tracking option⁴. The "Extended Log" option provides additional information about the application, such as name, category, risk, and technology⁴.

LOGGING AND MONITORING R80

NEW QUESTION # 17

Which of the following is NOT a component of a Distinguished Name?

- A. Country
- B. Common Name
- C. Organizational Unit
- D. User container

Answer: D

Explanation:

A Distinguished Name (DN) is a unique identifier for an entry in an LDAP directory. A DN consists of a sequence of relative distinguished names (RDNs) separated by commas. Each RDN is composed of an attribute type and an attribute value, such as cn=John Smith or ou=Sales. A DN can have different components depending on the structure and schema of the LDAP directory, but some common components are: Common Name (cn), Country, Organizational Unit (ou), Organization (o), State or Province (st), and Locality (l). User container is not a component of a DN³. Check Point R81 Identity Awareness Administration Guide
