Also you may improve your test skills by attempting EUNA_2024 exam questions multiple times.

Esri ArcGIS Utility Network Associate 2024 Sample Questions (Q32-Q37):

NEW QUESTION # 32

In ArcGIS Utility Network, some networks are organized so that resources flow directly outward or inward from a subnetwork controller in a single direction. Which topology tier type represents this kind of flow pattern?

- A. Mesh topology
- B. Radial topology
- C. Partitioned topology

Answer: B

Explanation:

Radial topology radiates flow upstream or downstream from a subnetwork controller. This is typical for electric and telecom networks.

NEW QUESTION # 33

Which attribute rule type should be used if you want an attribute to be automatically populated after a feature is added or updated in ArcGIS Pro?

- A. Validation rule
- B. Constraint rule
- C. Immediate calculation rule

Answer: C

Explanation:

Immediate calculation rules run instantly after edits to populate attributes automatically.

NEW QUESTION # 34

During editing, a GIS analyst encounters error code 10: "Invalid Connectivity - The edges are different subtypes and cannot connect." What does this error mean, and how can it be resolved?

- A. Invalid terminal paths exist and must be reassigned
- B. Containment rules are missing and must be added
- C. Edges belong to different asset groups/types and need a junction or matching subtype to connect

Answer: C

Explanation:

This occurs when lines of different subtypes are connected without a junction. Fix: adjust subtype, merge lines, or insert a junction with valid rule.

NEW QUESTION # 35

In ArcGIS Utility Network, which property is derived from feature class attributes, cached in the topology, and used to speed up tracing and analysis?

- A. Asset types
- B. Network attributes

- C. Subnetwork controllers

Answer: B

Explanation:

Network attributes are cached to make tracing and subnetwork evaluation more efficient.

NEW QUESTION # 36

When creating and managing terminals in ArcGIS Utility Network, which process correctly describes the required steps?

- A. Allow topology validation to auto-generate terminals
- B. Use only system-provided attributes for terminal management
- C. Create a terminal configuration, assign it to asset groups/types, and define valid and default paths

Answer: C

Explanation:

Terminals are created through configurations assigned to asset groups and types, defining valid paths and flow direction.

NEW QUESTION # 37

.....

Thanks to modern technology, learning online gives people access to a wider range of knowledge, and people have got used to convenience of electronic equipment. As you can see, we are selling our EUNA_2024 learning guide in the international market, thus there are three different versions of our EUNA_2024 exam materials: PDF, Soft and APP versions.
