As the collection and analysis of our FCSS_SASE_AD-24 exam materials are finished by our experienced and capable IT elite.

Fortinet FCSS - FortiSASE 24 Administrator Sample Questions (Q35-Q40):

NEW QUESTION # 35

What is a critical factor when deploying FortiSASE in a hybrid network environment?

Response:

- A. The integration with existing SD-WAN infrastructure
- B. The number of remote users
- C. The number of physical servers
- D. The complexity of existing VPN configurations

Answer: A

NEW QUESTION # 36

How does integrating endpoint detection and response (EDR) systems into SASE contribute to security posture?
Response:

- A. It provides real-time threat detection and response at endpoints
- B. It serves as the primary firewall
- C. It isolates the network from the internet
- D. It enhances user interface designs

Answer: A

NEW QUESTION # 37

In The Secure Private Access (SPA) use case, which two FortiSASE features facilitate access to corporate applications? (Choose two.)

- A. Cloud access security broker (CASB)
- B. SD-WAN
- C. Zero trust network access (ZTNA)
- D. Thin edge

Answer: B,C

NEW QUESTION # 38

Which component of FortiSASE is essential for real-time malware protection in hybrid networks?
Response:

- A. Firewall as a Service (FWaaS)
- B. Zero Trust Network Access (ZTNA)
- C. Cloud Access Security Broker (CASB)
- D. Advanced Threat Protection (ATP)

Answer: D

NEW QUESTION # 39

Refer to the exhibit. The daily report for application usage shows an unusually high number of unknown applications by category. What are two possible explanations for this? (Choose two.)

- A. The inline-CASB application control profile does not have application categories set to Monitor
- B. Deep inspection is not being used to scan traffic.
- C. Certificate inspection is not being used to scan application traffic.
- D. Zero trust network access (ZTNA) tags are not being used to tag the correct users.

Answer: B,C

Explanation:

The unusually high number of unknown applications by category in the daily report for application usage can be attributed to the following reasons:

Certificate Inspection is not being used to scan application traffic:

Without certificate inspection, encrypted traffic cannot be adequately analyzed, leading to a higher number of unknown applications. Certificate inspection allows the FortiSASE to decrypt and inspect HTTPS traffic, identifying applications correctly.

Deep Inspection is not being used to scan traffic:

Deep inspection goes beyond basic traffic analysis, performing thorough examination of packet contents to identify applications accurately.

If deep inspection is not enabled, many applications may go unrecognized and categorized as unknown.

NEW QUESTION # 40

.....

We offer free demos of the FCSS_SASE_AD-24 exam braindumps for your reference before you pay for them, for there are three versions of the FCSS_SASE_AD-24 practice engine so that we also have three versions of the free demos.
