Salesforce Consumer Goods Cloud Accredited Professional Sample Questions (Q88-Q93):

NEW QUESTION # 88
Which two of the following allows a Consumer Goods Cloud user to review the vision detection accuracy?

- A. Planogram Metrics
- B. Model Metrics
- C. Goods Metrics
- D. Shelf Metrics
- E. Object Metrics

Answer: A

NEW QUESTION # 89
Northern Trail Outfitters (NTO) is expanding quickly and wants to improve their reps productivity. Business leadership has expressed their desire to leverage Salesforce Einstein Vision to accomplish this. What are the three recommended steps for setting up Einstein Vision with Consumer Goods Cloud for automatic detection of products on the shelf?

- A. Train Einstein Vision Models with marketing images of products to yield optimal results
- B. Setup in store location and associate planogram
- C. Upload the training pictures as attachments to the planogram for Einstein Object Detection to work
- D. Define planogram check task
- E. Enable Einstein Object Detection

Answer: A,D,E

Explanation:
These steps are essential in setting up Einstein Vision for automatic product detection on shelves, involving enabling the feature, defining relevant tasks, and training the models with appropriate product images.

NEW QUESTION # 90
Which Lightning component can an admin add to a Consumer Goods assessment task record page?

- A. In-Store Products Check
- B. Promotion Check

- C. Inventory Check
- D. Planogram Check

Answer: C

Explanation:
https://help.salesforce.com/s/articleView?id=sf.retail_task_admin_create_assessment_task_record_page.htm&type=5 Inventory Check is a Lightning component that can be added to a Consumer Goods assessment task record page by an admin. An assessment task is a type of action plan task that allows users to collect data and perform actions related to a retail store. An inventory check is a type of assessment task that allows users to verify the availability and quantity of products in a store. The Inventory Check component displays the products that are associated with the store and allows users to search, scan, and update the product information. Verified Reference: [Salesforce Consumer Goods Cloud Implementation Guide], page 40.

NEW QUESTION # 91
Which object is connected to Action Plan?

- A. Assessment Task
- B. Retail Store
- C. Visit
- D. Action Plan Template em

Answer: C

NEW QUESTION # 92
ABC Cloud is considering implementing Communications Cloud and Industries Order Management (OM) to integrate with its new network provisioning platform. The network provisioning system orchestrates activation with low-level network elements and transmits different milestones to different upstream systems including Communications Cloud. Industries OM should react on certain milestones and progress its order to the next stages.
What should a Consultant consider when designing orchestration flows for these requirements?

- A. Advise the intermediate layer to filter out only Industries OM relevant milestones to be forwarded to Communications Cloud. Implement a Push Event for each milestone to progress the order in the orchestration flow.
- B. Configure a Push Event for Industries OM relevant milestones. Irrelevant milestones will not trigger the orchestration plan to progress so it will not count against governor limits.
- C. Configure a Push Event for each milestone from the network provisioning platform; this will allow a Sales representative to monitor order progress in the orchestration plan.
- D. Configure an integration procedure to process each milestone and change the order status according to the milestone value. Let the integration procedure change the order status, this in turn will trigger out-of-the-box implementation that progresses the orchestration plan to the next stage.

Answer: A

Explanation:
Industries Order Management should only react to relevant provisioning milestones. Sending every network event overwhelms the platform and wastes governor limits. Therefore:
The middleware/integration layer filters milestones.
Only relevant milestones trigger Push Event Orchestration Items inside OM.
OM receives the filtered event and progresses the order.
This is the recommended, scalable pattern.
Why others are incorrect:
B is wrong: irrelevant milestones still impact limits.
C sending all milestones is inefficient and unnecessary.
D letting an Integration Procedure manipulate order status is not how OM is triggered.

NEW QUESTION # 93
