PL-600資格認証攻略 & PL-600最新対策問題

JPTestKingのMicrosoftのPL-600「Microsoft Power Platform Solution Architect」試験トレーニング資料はPDF形式とソフトウェアの形式で提供して、JPTestKingのMicrosoftのPL-600試験問題と解答に含まれています。PL-600認定試験の真実の問題に会うかもしれません。そんな問題はパーフェクトと称するに足って、効果的な方法がありますから、どちらのMicrosoftのPL-600試験に成功を取ることができます。JPTestKingのMicrosoftのPL-600問題集は総合的にすべてのシラバスと複雑な問題をカバーしています。JPTestKingのMicrosoftのPL-600テストの問題と解答は本物の試験の挑戦で、あなたのいつもの考え方を変換しなければなりません。

Microsoft Power Platform Solution Architect 認定 PL-600 試験問題 (Q34-Q39):

質問 # 34

You need to recommend methods for assigning security to each group of users.

What should you recommend? To answer, drag the appropriate methods to the correct groups of users. Each method may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

正解:

解説:

Explanation

Graphical user interface, application, table Description automatically generated

Box 1: Power Platform Local Business Owner Team

Owner team: An owner team owns records and has security roles assigned to the team. A user's privileges can come from their individual security roles, those of the teams that they're part of or the ones they inherit. A team has full access rights on the records that the team owns. Team members are added manually to the owner team.

Scenario: Employee authentication with the existing system is provided by an on-premises Active Directory instance that is linked to Azure Active Directory.

Box 2: Azure Active Directory Security Group Team

An Azure Active Directory (Azure AD) group team. Similar to owner team, an Azure AD group team can own records and can have security roles assigned to the team.

Note: The administration of app and data access for Microsoft Dataverse has been extended to allow administrators to use their organization's Azure Active Directory (Azure AD) groups to manage access rights for licensed Dataverse users.

Box 3: Azure Active Directory B2B Guest Access

An Azure AD B2B collaboration user is an external user, typically from a partner organization, that you invite to sign into your Azure AD organization using their own credentials. This B2B collaboration user (also generally referred to as a guest user) can then access the apps and resources you want to share with them. A user object is created for the B2B collaboration user in the same directory as your employees. B2B collaboration user objects have limited privileges in your directory by default, and they can be managed like employees, added to groups, and so on.

Scenario: Before First Up signs a contract to place workers at a client company, a member of the audit team visits the company and interviews company management. Audit members use different types of devices including Android and iOS devices. First Up has no plans to require the use of a single type of device.

質問 # 35

You need to recommend a solution for handling data entry requirements for the mobile audit teams.

What are two possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Canvas app within Power Apps Player
- B. Dynamics 365 App for Outlook
- C. Dynamics 365 Field Service
- D. Canvas app within a browser

正解: A、D

解説:

Scenario:

Audit teams must have the ability to view worker information on their mobile devices.

Audit teams must be able to record data during visits to locations where workers are placed.

When you create an app, or someone shares an app with you, you can run that app on the Power Apps mobile app or in a web browser.

質問 # 36

Hotspot Question

You are implementing a Microsoft Power Platform solution for a customer to include data migration from multiple legacy systems.

The data includes lead and contact data. The environment includes an assigned security group.

The following issues have occurred during a go-live deployment attempt:

- Lookup values are not populated when data migration is complete.
- Data is being added to the contacts table that is not part of the data migration.
- Various users do not appear in the list of users available for record assignment.

You need to resolve the go-live deployment issues.

How should you resolve the issue? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

□

正解:

質問 # 37

A company wants to add an interactive checklist to a Power Platform solution to ensure that salespeople are following the same steps when qualifying leads.

You need to recommend a solution that will incorporate this checklist.

What should you recommend?

- A. Dashboards
- B. Microsoft Customer Voice
- C. Business Process Modeler task guide
- **D. Business Process Flow**

正解: D

質問 # 38

A company has a Power Apps app and uses Microsoft Dataverse for data storage. The company plans to provide employees the ability to create the following:

* Data loss prevention (DLP) policies that are at the environment level.

* Applications that allow employees to access only the activity records that they create.

You need to identify the security roles that the employees require.

Which security roles should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.
