The Juniper JN0-336 certification differentiates you from other professionals in the market. Success in the Juniper JN0-336 exam shows that you have demonstrated dedication to understanding and advancing in your profession. Cracking the Juniper JN0-336 test gives you an edge which is particularly essential in today's challenging market of information technology. If you are planning to get through the test, you must study from reliable sources for Security, Specialist (JNCIS-SEC) JN0-336 Exam Preparation. Dumpkiller real Juniper JN0-336 exam dumps are enough to clear the JN0-336 certification test easily on the first attempt. This is because Dumpkiller Juniper JN0-336 PDF Questions and practice test is designed after a lot of research and hard work carried out by experts.

Our company is glad to provide customers with authoritative study platform. Our JN0-336 quiz torrent was designed by a lot of experts and professors in different area in the rapid development world. At the same time, if you have any question on our JN0-336 exam braindump, we can be sure that your question will be answered by our professional personal in a short time. In a word, if you choose to buy our JN0-336 Quiz prep, you will have the chance to enjoy the authoritative study platform provided by our company. We believe our latest JN0-336 exam torrent will be the best choice for you. More importantly, you have the opportunity to get the demo of our latest JN0-336 exam torrent for free.

JN0-336 Valid Test Registration & JN0-336 Pass4sure Pass Guide

If you are preparing for the exam in order to get the related certification, here comes a piece of good news for you. The JN0-336 guide torrent is compiled by our company now has been praised as the secret weapon for candidates who want to pass the JN0-336 exam as well as getting the related certification, so you are so lucky to click into this website where you can get your secret weapon. Our reputation for compiling the best JN0-336 Training Materials has created a sound base for our future business. We are clearly focused on the international high-end market, thereby committing our resources to the specific product requirements of this key market sector. There are so many advantages of our JN0-336 exam torrent, and now, I would like to introduce some details about our JN0-336 guide torrent for your reference.

Juniper Security, Specialist (JNCIS-SEC) Sample Questions (Q53-Q58):

NEW QUESTION # 53

Exhibit

Referring to the exhibit, which two statements describe the type of proxy used? (Choose two.)

- A. reverse proxy
- B. server protection proxy
- C. forward proxy
- D. client protection proxy

Answer: A,C

Explanation:

In the exhibit, the SRX Firewall could be acting as a forward proxy, managing outbound internet requests from internal users or clients within a private network to the internet. Forward proxies are commonly used to control and monitor outbound traffic, provide content caching to improve load times, and enforce company policies.

The scenario can also imply a reverse proxy setup where the SRX Firewall might be configured to direct incoming requests from the internet to the web application. Reverse proxies are used to balance load, enhance security, manage SSL encryption, and provide additional caching functionalities for inbound traffic to servers.

NEW QUESTION # 54

Which two statements are true about the vSRX? (Choose two.)

- A. It does not have VMXNET3 vNIC support.
- B. Linux is the base OS.
- C. It has VMXNET3 vNIC support.
- D. UNIX is the base OS.

Answer: B,C

```

You just finished setting up your command-and-control (C&C) category with Juniper ATP Cloud. You notice that all of the feeds have zero objects in them.

Which statement is correct in this scenario?

- A. The security intelligence policy must be configured; on a unified security policy
- B. Use the commit full command to start the download.
- C. Set the maximum C&C entries within the Juniper ATP Cloud GUI.
- D. No action is required, the feeds take a few minutes to download.

Answer: D

Explanation:

According to the Juniper Networks JNCIS-SEC Study Guide, when you set up your command-and-control (C&C) category with Juniper ATP Cloud, all of the feeds will initially have zero objects in them.

This is normal, as it can take a few minutes for the feeds to download. No action is required in this scenario and you will notice the feeds start to populate with objects once the download is complete.

NEW QUESTION # 56

Exhibit

Exhibit

```
[edit security policies from-zone Trust to-zone Untrust]
user@srx# show
policy FindThreat {
    match {
        source-address any;
        destination-address any;
        application junos-defaults;
        dynamic-application { junos:BITTORRENT junos:BITTORRENT-BUNDLE
junos:BITTORRENT-WEB-CLIENT };
    }
    then {
        permit;
    }
}
[edit security policies from-zone Trust to-zone Untrust]
user@srx#
```

You are asked to track BitTorrent traffic on your network. You need to automatically add the workstations to the High_Risk_Workstations feed and the servers to the BitTorrent_Servers feed automatically to help mitigate future threats. Which two commands would add this functionality to the FindThreat policy? (Choose two.)

- A.

```
[edit security policies from-zone Trust to-zone Untrust] policy FindThreat then permit application-
services security-intelligence]
user@srx# set add-destination-ip-to-feed BitTorrent_Servers
```

- B.

```
[edit security policies from-zone Trust to-zone Untrust] policy FindThreat then permit application-
services security-intelligence]
user@srx# set add-destination-identity-to-feed BitTorrent_Servers
```

- C.

```
[edit security policies from-zone Trust to-zone Untrust] policy FindThreat then permit application-
services security-intelligence]
user@srx# set add-source-identity-to-feed High_Risk_Workstations
```

- D.

```
[edit security policies from-zone Trust to-zone Untrust] policy FindThreat then permit application-
services security-intelligence]
user@srx# set add-source-ip-to-feed High_Risk_Workstations
```

Answer: A,D

NEW QUESTION # 57

You are preparing a proposal for a new customer who has submitted the following requirements for a vSRX deployment:

- globally distributed,
- rapid provisioning,
- scale based on demand,
- and low CapEx.

Which solution satisfies these requirements?

- A. Network Director
- B. Juniper ATP Cloud
- C. VMWare ESXi
- D. AWS

Answer: D

Explanation:

The solution that satisfies the requirements for a vSRX deployment is AWS. AWS (Amazon Web Services) is a cloud computing platform that provides on-demand services such as infrastructure, platform, software, and database as a service. AWS is globally distributed, meaning that it has data centers in multiple regions around the world. AWS also allows rapid provisioning, meaning that you can launch vSRX instances in minutes using preconfigured Amazon Machine Images (AMIs) or custom templates. AWS also enables scaling based on demand, meaning that you can adjust the number and size of vSRX instances according to your network traffic and performance needs. AWS also has low CapEx (capital expenditure), meaning that you only pay for what you use and do not need to invest in hardware or maintenance costs.
