질문 # 23

Which of the following describes the process of creating a new library in the SAP SuccessFactors Learning Management System?

- A. Go to the Catalogs menu, select Add New, give it a name, and add the content.
- **B. From the Learning Activities menu, select Libraries and click Add New, give it a name, and add the content.**
- C. Go to the Entity's Libraries tab, click New Library, give it a name, and add the content.
- D. From the Entity's Content tab, click Libraries, select Add New, give it a name, and add the content.

정답: B

설명:

Step by Step Explanation with exact Extract from SAP SuccessFactors Learning documents:

* Understanding Libraries in SAP SuccessFactors Learning:

- * Libraries in SAP SuccessFactors Learning are collections of learning content (e.g., items, programs) that users can browse and self-assign. Creating a new library involves adding a named container and populating it with content.
- * Process to Create a New Library:
 - * The correct process involves navigating to the Learning Activities menu, selecting Libraries, and adding a new library.
- * Extract from SAP SuccessFactors Learning Documentation (Admin Guide, Library Management):

"To create a new library, go to Learning Activities > Libraries. Click 'Add New' to create a library, provide a name, and add content such as items, programs, or curricula. Save the library to make it available to users."
- * This confirms that option B accurately describes the process.
- * Why Other Options are Incorrect:
 - * Option A (Catalogs menu): The Catalogs menu is used for managing catalogs, not libraries.
- * "Catalogs are used to organize learning content for specific audiences, not for creating libraries" (SAP SuccessFactors Learning Admin Guide).
- * Option C (Entity's Libraries tab): There is no specific "Entity's Libraries tab" in the standard interface for creating libraries.
- * Option D (Entity's Content tab): The Content tab is used for managing content within an item or program, not for creating libraries.
- * Conclusion:
 - * The correct process for creating a new library is to navigate to Learning Activities > Libraries, click Add New, name the library, and add content, as described in option B.

질문 # 24

As an Administrator you are planning a new course that combines online modules with live workshops. The course's online modules include various content objects, assessment objects, and folder objects. How would you structure this course to implement a blended learning approach and ensure content objects are properly assigned?

- **A. Group the online content objects into an assignable unit or item, and schedule specific dates and times for the instructor-led sessions, restricting access to online content based on the class schedule.**
- B. Assign each content object independently to users, allowing them to access both the online and live components at their convenience.
- C. Offer the course entirely online, with content objects and assessment objects freely accessible at any time, while providing optional live sessions without fixed schedules.
- D. Create individual online items that include content objects, assessment objects, and folder objects, and schedule instructor-led sessions independently of the online material.

정답: A

설명:

Step by Step Explanation with exact Extract from SAP SuccessFactors Learning documents:

- * Understanding Blended Learning:
 - * A blended learning approach combines online and instructor-led components, requiring structured content and scheduling.
- * Correct Approach (D):
 - * Grouping online content into an assignable unit (item) and scheduling instructor-led sessions with restricted online access ensures a cohesive blended learning experience.
- * Extract from SAP SuccessFactors Learning Documentation (SAP Help Portal, Admin Guide, Blended Learning Configuration):

"For blended learning, group online content objects (e.g., SCORM, assessments) into an item, and create a class for instructor-led sessions with specific dates and times. Restrict online content access based on the class schedule to align with the blended learning path."
- * How to Implement:
 - * Create an item for online content, schedule a class for instructor-led sessions, and use settings to control access (e.g., prerequisites or time-based restrictions).
- * Extract from SAP SuccessFactors Learning Documentation (SAP Help Portal, Admin Guide, Course Management):

"To structure a blended course, create an item for online components and a class for instructor-led sessions. Use access restrictions, such as class enrollment or completion dependencies, to control when online content is available."
- * Why Other Options are Incorrect:
 - * Option A (Independent scheduling): Independent scheduling lacks integration between online and instructor-led components.
- * "Independent scheduling of online and instructor-led components does not ensure a cohesive blended learning experience" (SAP SuccessFactors Learning Admin Guide).
- * Option B (Independent assignment): Assigning content independently lacks structure and control.
- * "Independent assignment of content objects does not align with a structured blended learning approach" (SAP SuccessFactors Learning Admin Guide).
- * Option C (Fully online with optional sessions): This does not represent a true blended approach.
- * "A fully online course with optional sessions is not a blended learning structure" (SAP SuccessFactors Learning Admin Guide).

* Conclusion:

* The best approach is to group online content into an item, schedule instructor-led sessions, and restrict online access based on the class schedule, as specified in option D.
