SAP C_SIGDA_2403 Certification General Information

SAP C_SIGDA_2403 Certification Exam Preparation

All SAP consultant certifications are available as Cloud Certifications in the Certification Hub and can be booked with product code CER006. With CER006 – SAP Certification in the Cloud, you can take up to six exams attempts of your choice in one year – from wherever and whenever it suits you! Test dates can be chosen and booked individually.

Each specific certification comes with its own set of preparation tactics. We define them as "Topic Areas" and they can be found on each exam description. You can find the number of questions, the duration of the exam, what areas you will be tested on, and recommended course work and content you can reference.

SAP C_SIGDA_2403 Certification exams might contain unscored items that are being tested for upcoming releases of the exam. These unscored items are randomly distributed across the C_SIGDA_2403 certification topics and are not counted towards the final score. The total number of items of an examination as advertised in the Training Shop is never exceeded when unscored items are used.

SAP C_SIGDA_2403 Certification Details:

- Exam Code:- C_SIGDA_2403
- Exam Name:- SAP Certified Associate – Process Data Analyst - SAP Signavio
- Delivery Methods:- SAP Certification
- Level:- Associate
- Exam:- 60 questions
- Sample Questions:- View more
- Cut Score:- 65%
- Duration:- 120 mins
- Languages:- English, Japanese

我們PDFExamDumps不僅僅提供優質的產品給每位C-SIGDA-2403考生，而且提供完善的售後服務給每位考生，如果你使用了我們的產品，我們將讓你享受一年免費的更新，並且在第一時間回饋給每位考生，讓你及時得到更新的最新的考試資料，以最大效益的服務給每位C-SIGDA-2403考生。

最新的 SAP Certified Application Associate C-SIGDA-2403 免費考試真題 (Q27-Q32):

問題 #27

How would you start capturing process documentation? Note: There are 3 correct answers to this question.

- A. Creating process-related surveys
- B. Conducting process interviews
- C. Verifying customer data
- D. Creating task descriptions
- E. Running workshops with process participants

答案: A,B,E

解題說明:

Capturing process documentation in SAP Signavio involves gathering detailed information about how processes are executed. The SAP Signavio Process Manager Documentation provides guidance:

* Exact Extract:"To capture process documentation, organizations should:

* Run workshops with process participants to map out process steps and responsibilities.

* Create process-related surveys to collect input from stakeholders on process details.

* Conduct process interviews to gather in-depth insights from key process owners or performers." (SAP Signavio Process Manager User Guide, section on "Process Documentation Methods").

* Explanation:

* Option A (Running workshops with process participants):Workshops bring together stakeholders to collaboratively map processes, identify steps, and document roles, often using tools like SAP Signavio Process Manager for modeling.

* Option D (Creating process-related surveys):Surveys collect feedback from a broader group of process participants, capturing details about tasks, challenges, or variations that may not emerge in workshops.

* Option E (Conducting process interviews):Interviews with process owners or key performers provide detailed, qualitative insights into process execution, helping to refine documentation.

* Option B (Creating task descriptions)is incorrect as task descriptions are an output of documentation, not a method to start capturing it.

* Option C (Verifying customer data)is incorrect because customer data verification is related to data quality, not process documentation.

問題 #28

How can a Collaboration Hub user find additional information about a task?

- A. Click on a task in the process model.
- B. Use the print function for the process model.
- C. Access the dictionary.
- D. Leave a comment on the task and ask for the missing info.

答案: A

解題說明:

A Collaboration Hub user can find additional information about a task by clicking on a task in the process model. This action provides access to detailed information about the task, including its properties, documentation, and any linked processes or additional data that may have been associated with the task. This makes it easy for users to explore and understand the specifics and context of tasks within a process.

Accessing the dictionary, using the print function, or leaving a comment are not direct methods for finding additional information about a specific task's details or related documentation.

References: SAP Signavio Collaboration Hub user guide.

問題 #29

What are the typical roles required in Process Mining projects? Note: There are 3 correct answers to this question.

- A. Data & IT Expert
- B. Process Analyst
- C. Project Lead
- D. Process Manager
- E. Process Owner

答案: A,B,E

解題說明:

Process Mining projects require a combination of technical, analytical, and process-specific expertise.

According to the SAP Signavio documentation:

* Option A (Data & IT Expert): This role is responsible for extracting and preparing data from source systems, configuring ETL pipelines, and ensuring data quality for Process Mining analysis.

* Option C (Process Analyst): The Process Analyst interprets Process Mining results, identifies improvement opportunities, and translates insights into actionable recommendations.

* Option E (Process Owner): The Process Owner provides domain knowledge, defines analysis objectives, and ensures that Process Mining outcomes align with business goals.

* Option B (Project Lead) is incorrect as, while a project lead may oversee the project, it is not a role specifically required for Process Mining tasks.

Reference: SAP Signavio Process Intelligence Documentation, section on "Roles in Process Mining Projects"; SAP Certified Associate - Process Data Analyst Study Guide, Chapter 5: Process Mining Team Structure.

問題 #30

How does the splitting Inclusive Gateway (OR) work? Note: There are 2 correct answers to this question.

- A. It triggers only one of all outgoing sequence flows, if all conditions apply.
- B. It triggers a few of all possible outgoing sequence flows, if several conditions apply.
- C. It triggers all outgoing sequence flows, if only one condition applies.
- D. It triggers one outgoing sequence flow, if a condition applies.

答案: B,D

解題說明:

The Inclusive Gateway (OR) in BPMN operates as follows:

* Option C (It triggers a few of all possible outgoing sequence flows, if several conditions apply): The Inclusive Gateway can activate one or more of its outgoing sequence flows simultaneously, based on the evaluation of conditions. If multiple conditions are met, multiple paths can be triggered, allowing for a flexible process flow that can accommodate various scenarios.

* Option D (It triggers one outgoing sequence flow, if a condition applies): Even though an Inclusive Gateway can trigger multiple paths, it can also trigger just one path if only one condition applies. This versatility makes the Inclusive Gateway suitable for complex decision-making processes where the number of paths taken can vary.

問題 #31

Which Widgets can visualize process flows by backtracking the performed events? Note: There are 2 correct answers to this

question.

- A. Correlation
- B. Process Discovery
- C. Variant Explorer
- D. Breakdown

答案：B,C

問題 #32
