Top Latest Test Plat-Admn-202 Discount | Valid Plat-Admn-202 Authentic Exam Hub: Salesforce Certified Platform App Builder 100% Pass

To help candidates study and practice the Plat-Admn-202 exam questions more interesting and enjoyable, we have designed three different versions of the Plat-Admn-202 test engine that provides you a number of practice ways on the exam questions and answers: the PDF, Software and APP online. The PDF version can be printable. And the Software version can simulate the exam

and apply in Windows system. The APP online version of the Plat-Admn-202 training guide can apply to all kinds of the electronic devices, such as IPAD, phone, laptop and so on.

Salesforce Plat-Admn-202 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Business Logic and Process Automation: This section of the exam measures the skills of Process Automation Specialists and Salesforce Administrators and covers the key tools Salesforce provides to automate and enforce business logic. It focuses on using formula fields, roll-up summary fields, and validation rules to meet defined requirements. Candidates must also understand approval processes and know how to select the right automation tool to prevent conflicts or errors. The domain emphasizes evaluating business requirements and recommending automation solutions that maintain system stability and accuracy.
Topic 2	<ul style="list-style-type: none">• Salesforce Fundamentals: This section of the exam measures the skills of Salesforce Administrators and Junior Salesforce Consultants and covers the essential concepts needed to understand how Salesforce works at a foundational level. It focuses on recognizing when to use declarative tools versus programmatic customization, determining when AppExchange apps extend org capabilities, and understanding key methods for managing object, record, and field access. It also evaluates your ability to choose the right sharing model based on business needs and to apply reporting tools effectively, including report types and dashboards. Additionally, the domain reviews how to optimize the mobile experience through actions and layouts, and how Chatter can be used to support collaboration.
Topic 3	<ul style="list-style-type: none">• User Interface: This section of the exam measures the skills of Salesforce UI Designers and Lightning App Builders and covers the ways in which Salesforce interfaces can be customized to improve usability. It includes understanding available options for UI customization and demonstrating when to apply custom buttons, links, and actions. The domain also distinguishes between declarative and programmatic methods for incorporating Lightning components in applications, ensuring that the right approach is selected for different user interface needs.
Topic 4	<ul style="list-style-type: none">• Data Modeling and Management: This section of the exam measures the skills of Data Analysts and Salesforce Administrators and covers the core principles of designing and maintaining Salesforce data structures. It requires selecting the correct data model in various scenarios and understanding relationship types and how they influence reporting, record access, and the user interface. It also tests knowledge of field data types and the operational impact of changing them. The section includes evaluating the use of Schema Builder and understanding the considerations involved in importing and exporting data across internal and external sources.
Topic 5	<ul style="list-style-type: none">• App Deployment: This section of the exam measures the skills of Release Managers and Salesforce Administrators and covers the application lifecycle from planning through deployment. It requires determining the appropriate strategy when working with different sandboxes and managing milestones during development. Candidates must know when to use change sets and how to troubleshoot deployment issues. The section also includes understanding the implications of using unmanaged versus managed packages and selecting the correct deployment plan for various business scenarios.

Salesforce Certified Platform App Builder Sample Questions (Q130-Q135):

NEW QUESTION # 130

An app builder wants to add the option to 'Send New Email' from Leads, Contacts and Accounts for users on mobile. What is the benefit of using global actions to accomplish this?

- A. The global action's layout automatically clones the default page layout.
- B. Global actions are record-specific and are available when searching that particular
- C. Salesforce Lightning Component Library houses existing global actions prebuild for use.
- D. Global actions can be accessed anywhere actions are pages, feed and Chatter groups,

Answer: D

Explanation:

Global actions can be accessed anywhere actions are pages, feed and Chatter groups. This is correct because global actions are not tied to a specific object, and they can be added to any page that supports actions, such as record pages, home pages, feed pages, and Chatter groups.

NEW QUESTION # 131

Sales reps at Universal Containers create multiple quotes per opportunity.

Which automation tool should an app builder recommend to delete rejected quotes?

- **A. Flow**
- B. Approval process
- C. Validation rule
- D. Einstein Next Best Action

Answer: A

Explanation:

The goal is to automatically delete rejected quotes, which requires an automation tool capable of performing record deletion actions. Only Flow can perform this function declaratively.

Why D (Flow) is correct:Exact Extract:"Use Flow Builder to automate complex business processes by collecting data and performing actions such as creating, updating, or deleting records." - Salesforce Help | Flow Builder OverviewA Record-Triggered Flow can be configured to delete a quote automatically when its status is updated to "Rejected." Why D (Flow) is correct:Exact Extract:"Use Flow Builder to automate complex business processes by collecting data and performing actions such as creating, updating, or deleting records." - Salesforce Help | Flow Builder OverviewA Record-Triggered Flow can be configured to delete a quote automatically when its status is updated to "Rejected." Why not A (Validation Rule):Validation rules prevent record saving; they don't perform deletions.

Why not B (Einstein Next Best Action):NBA recommends actions but does not execute deletions automatically.

Why not C (Approval Process):Approval processes manage approvals but don't delete records after rejection.

NEW QUESTION # 132

A sales rep at AW Computing is unable to find what they are looking for while scrolling through their Chatter feed.

How can a filter be utilized to show only posts from their key account and opportunity records?

- A. Create a Chatter notification.
- **B. Create a Chatter stream.**
- C. Create Chatter bookmarks
- D. Create a Chatter group.

Answer: B

Explanation:

Create a Chatter stream. This is correct because a Chatter stream allows users to follow multiple records and people in one feed, and filter the feed by selecting a stream.

NEW QUESTION # 133

Northern Trail Outfitters (NTO) has created the custom objects Trail and Park in Salesforce to track trails and parks respectively.

NTO wants to track the total number of trails a park has on the park record without writing any code.

Which two actions should an app builder take to accomplish this requirement?

Choose 2 answers

- A. Use a formula field on the Park record to show the total number of trails.
- B. Use a lookup relationship between the Park and Trail objects.
- **C. Use a roll-up summary field on the Park record to show the total number of Trails.**
- **D. Use a master-detail relationship between the Park and Trail objects.**

Answer: C,D

Explanation:

To track the total number of trails associated with a park without writing code, the correct actions to take are:

Use a roll-up summary field on the Park record to show the total number of Trails (B). Roll-up summary fields calculate and display a value in a master record based on the values of fields in a detail record. They are used to count, sum, average, or get the minimum/maximum of values in related detail records.

Use a master-detail relationship between the Park and Trail objects (C). Master-detail relationships are necessary for roll-up summary fields as they allow the master object to control certain behaviors of the detail object and summarize data from those detail records.

A formula field (A) cannot dynamically count related records unless those records are linked via a master-detail relationship, and it cannot alone handle counts across related records without such a relationship. A lookup relationship (D) does not support roll-up summaries unless combined with additional tools like triggers or third-party apps, which involve coding or extra configuration outside standard object setup.

For more details, refer to the Salesforce Help documentation on master-detail relationships and roll-up summary fields:

Master-Detail Relationship: https://help.salesforce.com/articleView?id=relationships_considerations.htm&type=5

Roll-Up Summary Fields: https://help.salesforce.com/articleView?id=fields_about_roll_up_summary_fields.htm&type=5

NEW QUESTION # 134

Which three standard component types are available in the Lightning App Builder?

Choose 3 answers

- A. Report details
- B. Plain text
- C. Recent items
- D. Rich text
- E. Filter list

Answer: A,C,D

Explanation:

In the Lightning App Builder, the following standard components can be used to enhance the functionality of Lightning pages:

B . Rich text: Allows the inclusion of formatted text, links, and images on a page.

D . Report details: Enables embedding of specific report details directly on a page.

E . Recent items: Displays a list of recently accessed items relevant to the user.

Steps to add these components:

Open the Lightning App Builder via Setup → Edit Page or when creating a new Lightning page.

Drag and drop the Rich text, Report details, and Recent items components from the standard components section onto the page layout.

Configure each component as needed (e.g., selecting a specific report for the Report details component).

For more on using these components, refer to Salesforce's guide on Standard Lightning Components.

NEW QUESTION # 135

.....
