C-TS422-2023 Reliable Dumps, New C-TS422-2023 Exam Practice

But the helpful feature is that it works without a stable internet service. What makes your SAP Certification Exams preparation super easy is it imitates the exact syllabus and structure of the actual SAP C-TS422-2023 Certification Exam. Actual4Dumps never leaves its customers in the lurch.

SAP C-TS422-2023 Exam Syllabus Topics:

Topic	Details
Topic 1	• Introduction to SAP S • 4HANA Supply Chain Planning: This part covers the background and motivation for SAP S • 4HANA, its main components, business applications, and user experience strategy.

Topic 2	• Master Data in SAP S • 4HANA: This section covers the exploration of crucial production-related master data elements, with emphasis on bill of material, routing, and production version.
Topic 3	• Production Orders in SAP S • 4HANA: This section covers BOM item categorization, order status management, availability checks, routing selection, order type setup, and material handling processes.
Topic 4	• Material Requirements Planning in SAP S • 4HANA: This part of the exam covers an examination of planning strategies, tools, and long-term planning concepts. Overview of MRP fundamentals and lot size procedures.
Topic 5	• Lean Manufacturing in SAP S • 4HANA: This section covers repetitive manufacturing master data, line load planning, and Kanban systems.
Topic 6	• Demand Management in SAP S • 4HANA: This section covers a comparison of production methods in various manufacturing environments.

Reliable C-TS422-2023 Reliable Dumps bring you Verified New C-TS422-2023 Exam Practice for SAP SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing

Actual4Dumps offers web-based C-TS422-2023 practice exams and desktop SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing (C-TS422-2023) practice test software so that our customers can give unlimited SAP C-TS422-2023 practice tests and make themselves perfect by tracking their mistakes. The progress of previously given SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing (C-TS422-2023) practice tests are saved in the history so that the customers can assess it and avoid mistakes in future exams and pass SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing (C-TS422-2023) certification exam easily.

SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing Sample Questions (Q51-Q56):

NEW QUESTION # 51
in your Plant, MRP is activated.
which options do you have to exclude a material from the MRP run?
Note: there are 2 correct answers to this question.

- A. Use a specific material group
- B. Use a specific material status
- C. Use a specific MRP list
- D. Use a specific MRP type

Answer: B,D

Explanation:
You can exclude a material from the MRP run by using a specific material status or a specific MRP type. A material status is a user-defined indicator that can be assigned to a material master record to control the procurement and planning activities for the material. For example, you can define a material status that blocks the material from being planned by MRP. An MRP type is a parameter that defines how a material is planned by MRP. For example, you can use the MRP type ND (No Planning) to exclude the material from the MRP run.

NEW QUESTION # 52

What determines whether the planned independent requirements in dem management are consumed by other requirements? Note: There are 2 correct answers to this question.

- A. Order type
- B. Requirements type
- C. Requirements profile
- D. Planning strategy

Answer: B,D

NEW QUESTION # 53

Which chart types does the tabular planning table for capacity planning provide in SAP S/4HANA Cloud Private Edition? Note: There are 2 correct answers to this question.

- A. Orders (dispatched) chart
- B. Work center capacities chart
- C. Capacity requirements chart
- D. Order (pool) chart

Answer: B,C

NEW QUESTION # 54

Why would you use phantom assemblies? Note: There are 3 correct answers to this question.

- A. To reduce the number of changes required in bills of material
- B. To reduce the number of material masters
- C. To increase the number of planning levels
- D. To make the assignment of components easier
- E. To simplify the structure of bills of material

Answer: B,D,E

Explanation:
Phantom assemblies are assemblies that have their own product structure, but whose assembly does not actually physically exist. The components of the phantom assembly are incorporated directly in the superordinate product. The product structure of the superordinate product contains a reference to the phantom assembly. You can use phantom assemblies for the following purposes:
To simplify the structure of bills of material: Phantom assemblies allow you to group components that belong together logically or functionally, without creating an additional level in the product structure. This can make the product structure easier to maintain and understand.
To reduce the number of material masters: Phantom assemblies do not require a material master record in SAP S/4HANA, as they are not physically produced or stored. This can save storage space and reduce the effort of creating and updating material masters.
To reduce the number of changes required in bills of material: Phantom assemblies can be used to represent common subassemblies that are used in multiple products. This way, you only need to maintain the product structure of the phantom assembly once, and any changes will be reflected in all the products that reference it.
Phantom assemblies do not increase the number of planning levels, as they are not considered as separate planning objects. They also do not make the assignment of components easier, as the components are assigned to the superordinate product, not to the phantom assembly. Reference: Phantom Assembly | SAP Help Portal, Phantom Assembly | SAP Help Portal, Planning Phantom Assemblies | SAP Help Portal.

NEW QUESTION # 55

What are the advantages of collective orders? Note: There are 2 correct answers to this question.

- A. To perform availability checks across the entire collective order
- B. To show the flow of batches across the entire collective order
- C. To coordinate orders in the planning board for a collective order
- D. To post confirmations for the entire collective order

Answer: A,D

Explanation:

In SAP S/4HANA, acollective orderis a network of production orders where a top-level order (for a finished product) is directly linked to subordinate orders (for assemblies), created automatically via special procurement key 52 (material master, MRP 2 view). The advantages include:

* To perform availability checks across the entire collective order(A): When a collective order is created (e.g., via CO01 with "Collective Order" indicator), the system performs a material availability check (configured in OPL8) across all levels of the order hierarchy. This ensures components are available for the entire structure before release, reducing partial shortages.

* To post confirmations for the entire collective order(D): Confirmations (e.g., via CO11N or CO15) for the top-level order can automatically trigger goods movements (goods receipt for the finished product, goods issue for components) across all linked orders. This streamlines shop floor processing by consolidating confirmations.

To coordinate orders in the planning board(B) is not specific to collective orders-it's a general PP/DS or capacity planning feature (e.g., DS Planning Board), not an inherent advantage.To show the flow of batches (C) is possible via batch tracing (e.g., MB56), but it's not a unique benefit of collective orders, which focus on production linkage, not batch visibility. This aligns with SAP's collective order documentation.

NEW QUESTION # 56

......

With the SAP C-TS422-2023 exam practice test questions, you can easily speed up your C-TS422-2023 exam preparation and be ready to solve all the final SAP C-TS422-2023 exam questions. As far as the top features of SAP C-TS422-2023 Exam Practice test questions are concerned, these C-TS422-2023 exam questions are real and verified by experience exam trainers.
