Pass Guaranteed 2026 Esri Unparalleled EAEP2201: Exam Enterprise Administration Professional 2201 Collection

Our test bank includes all the possible questions and answers which may appear in the real exam and the quintessence and summary of the exam papers in the past. We strive to use the simplest language to make the learners understand our EAEP2201 study materials and the most intuitive method to express the complicated and obscure concepts. For the learners to fully understand our EAEP2201 Study Materials, we add the instances, simulation and diagrams to explain the contents which are very hard to understand. So after you use our EAEP2201 study materials you will feel that our EAEP2201 study materials' name matches with the reality.

Esri Enterprise Administration Professional 2201 Sample Questions (Q42-Q47):

NEW QUESTION # 42

An ArcGIS Enterprise deployment is completely internal and does not have access to the internet. How should the organization find patches and updates for the deployment components?

- A. Run the patch notification bat utility from the command line
- B. Refer to the Patches and Service Pack page on the Esri Support website
- C. Open the Check For Updates option on the machine where ArcGIS Server is installed

Answer: A

Explanation:

For environments without internet access, the organization can use thepatchnotification.batutility to check for available patches and

updates. This utility can be run from the command line and provides information about the current patch status of the ArcGIS Enterprise components. Administrators can then manually download the necessary patches from another machine with internet access and transfer them to the internal environment for installation.

Reference Source: ArcGIS Enterprise documentation on checking for and installing software patches and updates

NEW QUESTION # 43

A GIS administrator is analyzing the usage statistics of ArcGIS Enterprise. The administrator needs to pull tabular statistics on various groups and users about the type of content that they produce and consume.

Which action should the administrator perform?

- A. Open ArcGIS Server statistics to create a report for commonly used items.
- B. Run usage reports in Portal for ArcGIS to determine the effect on the organization.
- C. Use ArcGIS Monitor to capture desired information over a period of time in a report.

Answer: A

NEW QUESTION # 44

A client has an internet-accessible ArcGIS Enterprise deployment with the Web Adaptors in the DMZ, and the remaining components are on an internal network behind a firewall. A user on the internet must access a web map in that environment.

Which ports must be open in the firewall between the DMZ and the internal network?

- A. 80 and 443
- B. 6443 and 7443
- C. 443 and 6443
- D. 2443 and 6443

Answer: A

NEW QUESTION # 45

An organization recently upgraded Portal for ArcGIS. The organization must reduce the number of named users to the maximum allowed by the authorization file and delete members in bulk.

Which action should the administrator perform?

- A. Delete users using the Member tab
- B. Batch delete users with ArcPy
- C. Use command line utilities

Answer: B

NEW QUESTION # 46

An organization's portal license file provides for 30 Editor user type and 15 GIS Professional user type licenses. After performing a needs assessment, the GIS administrator discovers that the organization requires 10 Viewer, 40 Editor, and 20 GIS Professional user type licenses.

When downloading a new license file, how many of each user type license should the administrator specify?

- A. 40 Editor and 20 GIS Professional user type licenses
- B. 10 Viewer, 10 Editor, and 5 GIS Professional user type licenses
- C. 30 Viewer, 30 Editor, and 15 GIS Professional user type licenses
- D. 10 Viewer, 40 Editor, and 20 GIS Professional user type licenses

Answer: D

Explanation:

When downloading a new license file from My Esri to accommodate the organization's user needs, administrators should request the exact quantities identified in the internal needs assessment:

* 10 Viewer

* 40 Editor

* 20 GIS Professional

These quantities will be used to generate the new license file, which reflects the actual number of entitlements needed. Esri licensing is flexible in this regard, and the administrator can request different counts per type within their entitlements.

From the ArcGIS Enterprise Licensing documentation:

"When generating a new license file for your deployment, you can specify the number of each user type and role needed. The license file will reflect these values, and must match the needs of your organization."

* OptionAprovides insufficient licenses.

* OptionBomits the necessary Viewer licenses.

* OptionDreflects original entitlements, not the updated requirement.
