In order to help our candidates know better on our C_ACDET_2506 exam questions to pass the exam, we provide you the responsible 24/7 service. Our candidates might meet different problems on C_ACDET_2506 learning guide during purchasing and using our C_ACDET_2506 prep guide, you can contact with us through the email, and we will give you respond and solution as quick as possible. With the commitment of helping candidates to Pass C_ACDET_2506 Exam, we have won wide approvals by our clients. We always take our candidates' benefits as the priority, so you can trust us without any hesitation.

SAP C_ACDET_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.
Topic 2	<ul style="list-style-type: none">• Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.
Topic 3	<ul style="list-style-type: none">• Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q26-Q31):

NEW QUESTION # 26

Which of the following is NOT mentioned as a configuration type migrated by the Intelligent Configuration Manager?

- A. DynamicForm - custom form templates (dForms)
- B. Template - project templates such as Contract templates
- C. AMLExtension - AML customizations such as custom fields
- D. SupplierContact - contacts for the suppliers

Answer: D

Explanation:

The Intelligent Configuration Manager (ICM) migrates configuration types such as DynamicForms (dForms), AML Extensions (custom fields and enumerations), and Templates (contract or project templates). However, SupplierContact data, which is master or transactional data, is not migrated through ICM because ICM focuses on configuration migration, not operational or transactional data. Supplier contact information is managed separately and must be migrated using appropriate master data processes.

NEW QUESTION # 27

You are performing a Brownfield migration for a customer with live transactions in their SAP Ariba Production environment. The customer plans to introduce new required fields for contract workspaces that are associated with flex master data templates and enumeration lists. Based on the correct Brownfield process, what is the correct sequence of activities to avoid system errors or user disruption?

- A.
- B.
- C.
- D.

Answer: A

NEW QUESTION # 28

You have defined a custom field to have a default value based on another field. You have verified that the defaulting happens correctly the first time. However, when the dependent field change value, your custom field does not change.

What scenarios could cause this? Note: There are 3 correct answers to this question.

- A. The defaulting Expression sets a value that violates the custom field Validity Condition
- B. The custom field has the property Lock Initial value enabled, which prohibits a field to be changed once it's set
- C. Your dependent field does not have the property Refresh screen on value change enabled
- D. Your custom field has the property Respect User Value enabled, and the user has manually entered another value into the field
- E. The parameter Application.Base.RecomputeValueOnFieldChange is not enabled

Answer: B,C,D

NEW QUESTION # 29

Which document outlines the roles and responsibilities for the SAP Deployment Lead assigned to your project?

- A. Deployment Description

- B. Inline Help
- C. Partner Statement of Work
- D. Onboard Resource Center

Answer: A

Explanation:

The Deployment Description document formally defines the scope, roles, and responsibilities of the SAP Deployment Lead within a specific SAP Ariba project. It provides clarity on tasks such as migration coordination, technical issue resolution, and stakeholder communication. Other documents like the Onboard Resource Center provide logistical support, the Partner Statement of Work focuses on partner deliverables, and Inline Help offers in-application guidance-not role definitions. The Deployment Description is the authoritative reference for deployment lead responsibilities.

NEW QUESTION # 30

In a Greenfield deployment scenario, how should translation migrations be performed for header field labels, help tips, and validity condition error messages?

- A. Contact an SAP Deployment lead for customization help.
- B. User with Partner Administrator can configure translation.
- C. Create a package to migrate translations by ICM.
- D. Translations are included in migrations and are listed as AMLStringResource in the migration

Answer: D

NEW QUESTION # 31
