CIPS Ethical and Responsible Sourcing 認定 L4M4 試験問題 (Q81-Q86):

質問 # 81

A supplier operates in a monopolistic market where the threat of entry is low. The product that they offer is key in manufacturing certain types of submarines and there is no known substitute for the product at present.

What type of sourcing relationship is a buyer likely to have with this supplier?

- A. multiple sourced
- **B. sole sourced**
- C. dual sourced
- D. single sourced

正解: B

解説:

This is sole sourcing as there is only one supplier in the marketplace.

Be careful not to confuse single sourcing and sole sourcing. Single sourcing is when a buyer chooses to work with only one supplier (usually to achieve economies of scale), sole sourcing, on the other hand, is when the buyer doesn't have a choice- they work with one supplier because there is only one supplier in the market.

Types of sourcing is a key concept for this exam.

質問 # 82

Private sector procurement organisations should always allow suppliers at least 35 days to respond to invitations to tender. Is this statement true?

- **A. No, because the complexity of the tender should inform the response timescale**
- B. Yes, because that timeframe is internationally recognised as being appropriate
- C. No, because this timeframe will cause delays that are unacceptable to stakeholders
- D. Yes, because it helps suppliers to plan and prioritise their work

正解: A

解説:

Response times should be tailored to the complexity of the tender. Responsible sourcing encourages flexibility in setting realistic timelines that allow suppliers adequate time to prepare, supporting efficient and effective sourcing without unnecessary delays.

質問 # 83

Why is it important to consider factors such as environmental, social, governance, and ethics (ESG) when analysing tenders?

- * To ensure adherence to sustainability initiatives
- * To improve process workflow
- * To perform supplier spend and monitoring
- * To identify potential risks within the supply chain

- A. 2 and 3 only
- **B. 1 and 4 only**
- C. 3 and 4 only
- D. 1 and 2 only

正解: B

解説:

Including ESG criteria in tender analysis helps ensure suppliers align with the buyer's sustainability initiatives (1) and helps identify risks within the supply chain (4), such as unethical labour practices or environmental harm. Improving workflow (2) and spend monitoring (3) are operational concerns but not ESG drivers.

Responsible sourcing requires procurement professionals to integrate ESG into decision-making, ensuring not only cost-efficiency

but also ethical compliance, resilience, and long-term value. This reflects the growing importance of corporate social responsibility (CSR) and stakeholder expectations.

質問 #84

Which of the following can be undertaken by the buyer in relation to the governance of a supplier's ethical and sustainable behaviours?

- * Review the insurance clauses in the contract
- * Check that the supplier's internal policies are up to date
- * Check the supplier's conflict of interest register for their contract
- * Review the non-disclosure agreement for their contract

- A. 2 and 3 only
- B. 1 and 3 only
- C. 1 and 4 only
- D. 2 and 4 only

正解: A

解説:

Regularly checking supplier policies and conflict of interest registers helps ensure that suppliers are upholding ethical standards, which supports responsible sourcing practices. This governance activity aligns with ethical guidelines to promote transparency and prevent conflicts that could affect the integrity of the supply chain.

質問 #85

Pierre is constructing a tender for a security contract. As well as cost, he would like to ask the security companies some questions about their health and safety processes and staff qualifications. He has created several questions and weighted these so that they add up to 25. is this the correct thing to do?

- A. no- the weighting should total 100
- B. yes- 25 is the correct weighting for quality question
- C. no- the weighting should total 10
- D. yes- point systems can be weighted any way a buyer choses so long as this is explained in the ITT

正解: A

解説:

weighted points systems for assessments should add up to 100. This is 100%.

An example is how this would work is

Price = 50%

Health and Safety questions= 30%

Qualifications = 20%
