

# GES-C01 Test Dumps Pdf | Reliable GES-C01 Test Guide

## MODIFIED TRUE OR FALSE TEST

### GES-CIE - Prelims Reviewer

Instruction: Write TRUE if the statement correctly defines the underlined word/s. If FALSE, replace the underlined word/s with the correct answer.

1. Technology is a systemized body of knowledge.
2. Science is knowledge gained through observation and experimentation.
3. Technology is a human activity.
4. Science is the application of knowledge in solving scientific and practical problems that will help humans to survive and improve his life.
5. Technology came from the Greek word "tekhne" which means "art, skill, craft in work".
6. Technology is the study of the natural world via research and experiment.
7. Science is the application of science in practice.
8. Science, Technology, and Society (STS) is the study of how social, political, and cultural values affect scientific research and technological innovation.
9. Effect is defined as a precursor to the unfolding or existence of something.
10. Historical antecedent is the previous state of science and technology before something more advanced was created.
11. Scientific Revolution was an era when the scientific method was just unfolding.
12. Written language was the only means of communication during ancient times.
13. Transportation was significant during ancient times because people were trying to go places and discover new horizons.
14. Agriculture was important in the discovery of new places or the establishment of new alliances with other tribes.
15. Egypt was the southernmost region of Mesopotamia and was first established in about 3600 BC.
16. Alphabet is the first writing system depicted in symbols of triangular around 3100 BC.
17. Potter's wheel was a mechanical device invented by the Sumerians.
18. Decimal system is a system of counting in units of 60.

2026 Latest Actual4Cert GES-C01 PDF Dumps and GES-C01 Exam Engine Free Share: [https://drive.google.com/open?id=1zNDUpefzqpra5eHb2t92F\\_zSIuW4w2h](https://drive.google.com/open?id=1zNDUpefzqpra5eHb2t92F_zSIuW4w2h)

Keeping the dynamic SnowPro® Specialty: Gen AI Certification Exam (GES-C01) exam content in mind, we provide updated and reliable GES-C01 test material. We also offer free Snowflake Dumps updates for up to 1 year after your purchase. We only provide cost-effective SnowPro® Specialty: Gen AI Certification Exam (GES-C01) exam practice material. A 24/7 customer service can also help you in case of any problem. Don't wait for your success if the best SnowPro® Specialty: Gen AI Certification Exam (GES-C01) exam preparation material is available on our platform. You can get actual SnowPro® Specialty: Gen AI Certification Exam (GES-C01) exam questions and prepare for your test in a short time. If you have any issue, please contact our customer support.

You can install Snowflake GES-C01 PRACTICE TEST file and desktop practice test software on your devices and easily start SnowPro® Specialty: Gen AI Certification Exam (GES-C01) exam preparation right now. Whereas the "Actual4Cert" GES-C01 web-based practice test software is concerned, it is a simple browser-based application that works with all the latest web browsers. Just put the link of Actual4Cert GES-C01 web-based practice test application in your browser and start Snowflake GES-C01 exam preparation without wasting further time. The "Actual4Cert" is quite confident that you will be the next successful SnowPro® Specialty: Gen AI Certification Exam exam candidate.

## Trust the best-selling GES-C01 Cert Guide Test Dumps Pdf

The Actual4Cert is one of the high in demands platforms that are committed to making the SnowPro® Specialty: Gen AI Certification Exam Exam GES-C01 exam journey successful in a short time period. To achieve this objective the Actual4Cert is

offering real, valid, and updated GES-C01 exam dumps. These SnowPro® Specialty: Gen AI Certification Exam GES-C01 exam questions are the real GES-C01 questions that are verified by qualified SnowPro® Specialty: Gen AI Certification Exam Exam GES-C01 Certification Exam experts. They strive hard and put all their efforts to maintain the top standard of Snowflake GES-C01 exam dumps. So rest assured that with the Actual4Cert GES-C01 exam questions you will get everything that you need to learn, prepare and pass the difficult SnowPro® Specialty: Gen AI Certification Exam GES-C01 exam with flying colors.

## Snowflake SnowPro® Specialty: Gen AI Certification Exam Sample Questions (Q21-Q26):

### NEW QUESTION # 21

A data science team is fine-tuning a mistral-1b model within Snowflake Cortex using proprietary customer interaction logs. Which of the following principles and practices apply to this fine-tuning process concerning data privacy, model ownership, and subsequent inference?

- A. The fine-tuned model, which is a CORTEX\_FINETUNED type, can be shared with other Snowflake accounts using secure data sharing.
- B. The fine-tuning process occurs entirely within Snowflake's security and governance boundaries, ensuring the data never leaves the Snowflake environment.
- C. The resulting fine-tuned model is exclusively available to the data science team and cannot be accessed by other Snowflake customers.
- D. The fine-tuned model is fully managed by the Snowflake Model Registry API, allowing programmatic management of its lifecycle.
- E. The proprietary customer interaction logs used for fine-tuning are leveraged by Snowflake to improve the base mistral -7b model for all customers.

**Answer: A,B,C**

Explanation:

Cortex Fine-tuning is a fully managed service that lets you fine-tune popular LLMs using your data, all within Snowflake. Your Usage and Customer Data (including inputs and outputs) are NOT used to train, re-train, or fine-tune Models made available to others. Fine-tuned Models built using your data can only be used by you. Therefore, Option A is incorrect. Options B and C are correct, as the fine-tuned model is exclusive to the customer, and the process is managed within Snowflake's boundaries. Option D is also correct because models generated with Cortex Fine-tuning (CORTEX\_FINETUNED type) can be shared using Data Sharing. Option E is incorrect because Cortex Fine-Tuned LLMs appear in the model registry's Snowsight UI, but are not managed by the model registry API.

### NEW QUESTION # 22

A company is implementing a Document AI solution to extract sensitive financial data from invoices. They plan to fine-tune the Document AI model (Arctic-TILT) and then manage this custom model within the Snowflake Model Registry. Which of the following statements correctly outlines the access control, data handling, and model management principles for this scenario?

- A. Option D
- B. Option A
- C. Option B
- D. Option C
- E. Option E

**Answer: B**

Explanation:

### NEW QUESTION # 23

A data application developer is tasked with building a multi-turn conversational AI application using Streamlit in Snowflake (SiS) that leverages the COMPLETE (SNOWFLAKE. CORTEX) LLM function. To ensure the conversation flows naturally and the LLM maintains context from previous interactions, which of the following is the most appropriate method for handling and passing the conversation history?

- A. Option D

- B. Option C
- C. Option A
- D. Option B
- E. Option E

**Answer: B**

Explanation:

To provide a stateful, conversational experience with the 'COMPLETE (SNOWFLAKE.CORTEX)' function, all previous user prompts and model responses must be passed as part of the argument. This argument accepts an array of objects, where each object represents a turn and contains a 'role' ('system', 'user', or 'assistant') and a 'content' key, presented in chronological order. In Streamlit, `st.session_states` is the standard and recommended mechanism for storing and managing data across reruns of the application, making it ideal for maintaining chat history. Option A is inefficient and incorrect because 'COMPLETE does not inherently manage history from external tables. Option B is incorrect as 'COMPLETE does not retain state between calls; history must be explicitly managed. Option D is less effective than structured history, as it loses the semantic role distinction and can be less accurate for LLMs. Option E describes a non-existent parameter for the 'COMPLETE' function.

#### NEW QUESTION # 24

A data engineering team is planning to build a real-time data pipeline using Snowflake's dynamic tables to process incoming log data. They want to use SNOWFLAKE.CORTEX.EXTRACT\_ANSWER to pull out specific error codes and timestamps from log entries. They are also mindful of the operational costs. Which of the following statements accurately describes limitations or cost considerations for using SNOWFLAKE.CORTEX.EXTRACT\_ANSWER in this scenario?

- A. EXTRACT\_ANSWER is explicitly designed for multi-language extraction, making it suitable for logs that might contain various languages without affecting cost.
- B. The billing for EXTRACT\_ANSWER is based on the combined token count of both the source\_document (log entry) and the question used for extraction.
- C. To optimize performance and reduce cost for large-scale log processing, it is recommended to execute EXTRACT\_ANSWER queries on a Snowpark-optimized warehouse of at least 'LARGE' size.
- D. If a source\_document input exceeds the model's token limit, EXTRACT\_ANSWER will automatically truncate the text, potentially impacting results but avoiding an error.
- E. The EXTRACT\_ANSWER function does not support dynamic tables, which will prevent its direct use in this pipeline design.

**Answer: B,E**

Explanation:

Option A is incorrect because Snowflake Cortex functions, including `EXTRACT_ANSWER`, do not support dynamic tables. Option B is correct because for `EXTRACT_ANSWER`, the number of billable tokens is the sum of the number of tokens in the (source document) and 'question' fields. Option C is incorrect; Snowflake recommends executing queries that call Cortex AISQL functions with a smaller warehouse (no larger than MEDIUM) as larger warehouses do not increase performance. Option D is incorrect; inputs that exceed the model's token limit result in an error, rather than automatic truncation. Option E is incorrect; while the newer 'AI\_EXTRACT supports multiple languages, the documentation for 'EXTRACT\_ANSWER does not explicitly state multi-language support and generally refers to plain English text. Costs are incurred per token regardless of language.

#### NEW QUESTION # 25

A data engineering team is implementing a solution using Snowflake Cortex's AI\_COMPLETE function to process customer support tickets. They are concerned about sensitive information and ensuring the model's responses are safe, while adhering to Snowflake's data governance principles. Which of the following statements correctly describe the functionality of Cortex Guard and Snowflake's data privacy commitments in this context?

- A. Option D
- B. Option A
- C. Option E
- D. Option B
- E. Option C

**Answer: C,D**

Explanation:

Option B is correct because Cortex Guard evaluates the LLM's responses, not just the prompts, to filter unsafe content. Additionally, only the input tokens for Cortex Guard are counted for billing, and this cost is in addition to the function's cost. Option E is correct because Snowflake's trust and safety principles explicitly state that your Usage and Customer Data (including inputs and outputs of Snowflake AI Features) are NOT available to other customers and are NOT used to train, re-train, or fine-tune Models made available to others. Option A is incorrect as customer data is not anonymised and used to improve general model performance for others. Option C is incorrect as the sources do not mention fine-tuning a customer-owned guardrail model. Option D is incorrect as the sources do not mention a 'CORTEX GUARD ADMIN' role or logging of filtered content to a customer-accessible audit table.

## NEW QUESTION # 26

.....

We have been focusing on perfecting the GES-C01 exam dumps by the efforts of our company's every worker no matter the professional expert or the 24 hours online services. We are so proud that we own the high pass rate to 99%. This data depend on the real number of our worthy customers who bought our GES-C01 Study Guide and took part in the real GES-C01 exam. Obviously, their performance is wonderful with the help of our outstanding GES-C01 learning materials.

**Reliable GES-C01 Test Guide:** <https://www.actual4cert.com/GES-C01-real-questions.html>

Passing the Reliable GES-C01 Test Guide - SnowPro® Specialty: Gen AI Certification Exam exam in one sitting is not a walk in the park, At Actual4Cert Reliable GES-C01 Test Guide we have the entire range of practice study material for exams held by HP, CompTIA, Apple, Microsoft, Oracle and etc, The credibility and validity of these Reliable GES-C01 Test Guide Q&As have been approved by the experts related to this field, In the GES-C01 exam resources, you will cover every field and category in Snowflake helping to ready you for your successful Snowflake Certification.

Learning from Troubled Projects, To keep up Clear GES-C01 Exam with changing technology, computer programmers may take continuing education and professional development seminars to learn new Reliable GES-C01 Test Guide programming languages or upgrades to programming languages that they already know.

## Pass Guaranteed Snowflake - Fantastic GES-C01 Test Dumps Pdf

Passing the SnowPro® Specialty: Gen AI Certification Exam exam in one sitting is not a walk in the park, GES-C01 Valid Exam Voucher At Actual4Cert we have the entire range of practice study material for exams held by HP, CompTIA, Apple, Microsoft, Oracle and etc.

The credibility and validity of these Snowflake Certification Q&As have been approved by the experts related to this field, In the GES-C01 Exam resources, you will cover every field and category GES-C01 in Snowflake helping to ready you for your successful Snowflake Certification.

By devoting in this area so many years, we are omnipotent to solve the problems about the GES-C01 practice questions with stalwart confidence.
