

Try Microsoft PL-300 Questions To Clear Exam in First Endeavor

PL-300 Microsoft Power BI Certification Exam Questions with 100% correct answers 2024

You have a Power BI workspace that contains several reports. You need to provide a user with the ability to create a dashboard that will use the visuals from the reports.

What should you do?

- A. Grant the Read permission for the datasets to the user.
- B. Add the user as a Viewer of the workspace.
- C. Share the reports with the user.
- D. Create a row-level security (RLS) role and add the user to the role.
- E. Add the user as a member of the workspace.

B

You have a Power BI workspace named Inventory that contains a dataset, a report, and a dashboard. You need to add an additional tile to the dashboard. The tile must show inventory by location. This information is NOT visualized in the report. The solution must minimize the impact on the report. Which two actions should you perform? Each correct answer presents part of the solution.

- A. Use quick insights on the dashboard.
- B. Hide the report page.
- C. Ask a question by using Q&A.
- D. Add the visual to the report.
- E. Pin the visual to the dashboard.

C+E

You need to create a Power BI theme that will be used in multiple reports. The theme will include corporate branding for font size, color, and bar chart formatting.

What should you do?

- A. From Power BI Desktop, customize the current theme.
- B. From Power BI Desktop, use a built-in report theme.
- C. Create a theme as a JSON file and import the theme into Power BI Desktop.
- D. Create a theme as a PBIVIZ file and import the theme into Power BI Desktop.

B

You have several reports and dashboards in a workspace. You need to grant all organizational users read access to a dashboard and several reports.

Solution: You create an Azure Active Directory group that contains all the users. You share each report and dashboard to the group.

Does this meet the goal?

Prominent Features of Microsoft PL-300 Practice Exam Material

Our PL-300 exam materials are the product of this era, which conforms to the development trend of the whole era. It seems that we have been in a state of study and examination since we can remember, and we have experienced countless tests. In the process of job hunting, we are always asked what are the achievements and what certificates have we obtained? Therefore, we get the test PL-300 Certification and obtain the qualification certificate to become a quantitative standard, and our PL-300 learning guide can help you to prove yourself the fastest in a very short period of time.

Microsoft Power BI Data Analyst Sample Questions (Q301-Q306):

NEW QUESTION # 301

You have a Power BI report.
You have the following tables.

Name	Description
Balances	The table contains daily records of closing balances for every active bank account. The closing balances appear for every day the account is live, including the last day.
Date	The table contains a record per day for the calendar years of 2000 to 2025. There is a hierarchy for financial year, quarter, month, and day.

You have the following DAX measure.

```
ACCOUNTS :=
CALCULATE (
```

Answer Area

Statements	Yes	No
A table visual that displays the date hierarchy at the year level and the [Accounts] measure will show the total number of accounts that were live throughout the year.	<input type="radio"/>	<input type="radio"/>
A table visual that displays the date hierarchy at the month level and the [Accounts] measure will show the total number of accounts that were live throughout the month.	<input type="radio"/>	<input type="radio"/>
A table visual that displays the date hierarchy at the day level and the [Accounts] measure will show the total number of accounts that were live that day.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statements	Yes	No
A table visual that displays the date hierarchy at the year level and the [Accounts] measure will show the total number of accounts that were live throughout the year.	<input type="radio"/>	<input checked="" type="radio"/>
A table visual that displays the date hierarchy at the month level and the [Accounts] measure will show the total number of accounts that were live throughout the month.	<input type="radio"/>	<input checked="" type="radio"/>
A table visual that displays the date hierarchy at the day level and the [Accounts] measure will show the total number of accounts that were live that day.	<input checked="" type="radio"/>	<input type="radio"/>

Explanation

Statements	Yes	No
A table visual that displays the date hierarchy at the year level and the [Accounts] measure will show the total number of accounts that were live throughout the year.	<input type="radio"/>	<input checked="" type="radio"/>
A table visual that displays the date hierarchy at the month level and the [Accounts] measure will show the total number of accounts that were live throughout the month.	<input type="radio"/>	<input checked="" type="radio"/>
A table visual that displays the date hierarchy at the day level and the [Accounts] measure will show the total number of accounts that were live that day.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION # 302

You are creating reports in Power BI Desktop. The model has the following tables.

Table name	Column name	Data type
Order	Order_date	Datetime
	Order_amount	Float
	Customer_ID	Integer
Customer	Customer_ID	Integer
	Full_name	Varchar(100)
	Customer Photo	Binary

There is a relationship between the tables.

You plan to publish a report to the Power BI service that displays Order_amount by Order_date by Full_name.

You need to ensure that only the columns required for the report appear in Report View. The solution must minimize the size of the dataset that is published.

How should you configure the columns in Power BI Desktop? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Customer_ID:	<input type="text"/> From Query Editor, select the column and click Remove Columns. From Query Editor, select the column and click Remove Duplicates. From Query Editor, select the column and click Remove Other Columns. From the model, select the column and click Hide.
Customer_Photo:	<input type="text"/> From Query Editor, select the column and click Remove. From Query Editor, select the column and click Remove Duplicates. From Query Editor, select the column and click Remove Other Columns. From the model, select the column and click Hide.

Answer:

Explanation:

Explanation

Table Description automatically generated

Customer_ID:	<input type="text"/> From Query Editor, select the column and click Remove Columns. From Query Editor, select the column and click Remove Duplicates. From Query Editor, select the column and click Remove Other Columns. From the model, select the column and click Hide.
Customer_Photo:	<input type="text"/> From Query Editor, select the column and click Remove. From Query Editor, select the column and click Remove Duplicates. From Query Editor, select the column and click Remove Other Columns. From the model, select the column and click Hide.

NEW QUESTION # 303

You have the dataset shown in the following exhibit.

City	Sales Profit
Abbotsburg	\$173,947
Absecon	\$129,358
Accomac	\$157,768
Aceitunas	\$119,283
Airport Drive	\$162,500
Akhiok	\$259,554
Alcester	\$127,040
Alden Bridge	\$152,138
Alstead	\$106,147
Amado	\$136,718
Amanda Park	\$117,444
Andrix	\$130,710
Annamoriah	\$139,499
Antares	\$147,562
Antonio	\$113,056
Total	\$85,729,181

You need to ensure that the visual shows only the 10 cities that have the highest sales profit. What should you do?

- A. Add a calculated column to the table that uses the TOPN function. In the visual, replace Sales Profit with the calculated column.
- B. Add a Top N filter to the visual.
- C. Add a calculated column to the table that returns the city name if the city is in the top 10, otherwise the calculated column will return "Not in Top 10". In the visual, replace Sales Profit with the calculated column.
- D. Configure the Sales Profit measure to use the RANKX function.

Answer: B

Explanation:

Power BI Top N Filters are useful to display the top performing records, and Bottom N filters are helpful to display the least performing records. For example, we can display top or bottom 10 products by orders or sales.

Note:

- * Select the Column you want to display the Top Sales Profit
- * Then change the Filter Type of that Column to Top N
- * Fill in Top / Bottom number field
- * And lastly drag to the By Value field your Sales Profit

NEW QUESTION # 304

You are using existing reports to build a dashboard that will be viewed frequently in portrait mode on mobile phones. You need to build the dashboard.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

The screenshot shows the Microsoft Power BI interface. On the left, under the heading 'Actions', there is a list of five actions in rectangular boxes: 'Pin items from the reports to the dashboard.', 'Rearrange, resize, or remove items from the phone view.', 'Change the dashboard view to Phone view.', 'Open the dashboard.', and 'Create a phone layout for the existing reports.' On the right, under the heading 'Answer Area', there is a large empty space. A watermark 'practicecurrent.com' is visible across the center. There are also some navigation icons (left and right arrows) and checkmark icons.

Answer:

Explanation:

The screenshot shows the Microsoft Power BI interface with the 'Actions' list on the left and the 'Answer Area' on the right. The 'Answer Area' contains four actions moved from the 'Actions' list, arranged in a specific order from top to bottom: 'Pin items from the reports to the dashboard.', 'Open the dashboard.', 'Change the dashboard view to Phone view.', and 'Rearrange, resize, or remove items from the phone view.'. The 'Answer Area' is enclosed in a dashed red border. There are also some navigation icons (left and right arrows) and checkmark icons.

Explanation

1. Pin items from report to Dashboard.
2. Open Dashboard.
3. Change the dashboard view to Phone view.
4. Rearrange, resize the visuals.

NEW QUESTION # 305

You have a dataset named Pens that contains the following columns:

Unit Price

Quantity Ordered

You need to create a visualization that shows the relationship between Unit Price and Quantity Ordered. The solution must highlight orders that have a similar unit price and ordered quantity.

Which type of visualization and which feature should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:
