100% Pass Quiz 2026 Authoritative SAP C_TS422_2023: SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing Latest Exam Testking

Our product boosts varied functions to be convenient for you to master the C_TS422_2023 training materials and get a good preparation for the exam and they include the self-learning, the self-assessment, stimulating the exam and the timing function. We provide 24-hours online on C_TS422_2023 Guide prep customer service and the long-distance professional personnel assistance to for the client. If clients have any problems about our C_TS422_2023 study materials they can contact our customer service anytime.

SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing Sample Questions (Q51-Q56):

NEW QUESTION # 51

What determines whether the planned independent requirements in demand management are consumed by other requirements? Note: There are 2 correct answers to this question.

- A. Requirements type
- B. Requirements profile
- C. Planning strategy
- D. Order type

Answer: A,C

Explanation:

The consumption of planned independent requirements by other requirements, such as sales orders or stock transport orders, depends on the planning strategy and the requirements type of the materials involved. The planning strategy defines the basic procedure for planning a material and determines whether the consumption is relevant for planning. The requirements type controls the consumption parameters, such as the consumption mode (forward, backward, or bidirectional), the consumption interval (period of time in which the consumption can take place), and the consumption indicator (whether the consumption reduces the planned independent requirements or not). Reference: Consumption of Planned Independent Requirements | SAP Help Portal, Planning Strategy | SAP Help Portal, Requirements Type | SAP Help Portal.

NEW QUESTION # 52

Which SAP applications can be used for forecasting in Supply Chain Planning? Note: There are 2 correct answers to this question.

- A. Material Requirements Planning (MRP)
- B. Capacity Requirements Planning (CRP)
- C. Integrated Business Planning (IBP)
- D. Supply Chain Management (SCM)

Answer: C,D

NEW QUESTION # 53

Which of the following automation options can you use for production orders? Note: There are 2 correct answers to this question.

- A. You can use trigger points to automatically create rework orders via confirmations.
- B. You can use mass processing to read PP master data for production orders.
- C. You can use mass processing to set production orders to technically complete.
- D. You can use the production scheduling profile to automatically set orders to technically complete.

Answer: A,C

NEW QUESTION # 54

Your project team decided to use a make-to-order planning strategy material in discrete manufacturing. What is the impact of this decision?

Note: there are 2 correct answers to this question

- A. Both the reduction of make-to-order stock and requirements occur on delivery
- B. Sales orders have to be ATP-confirmed (available-to-promise) to be saved.
- C. Storage Location MRP areas are required for sales-order-specific stock.
- D. Net requirement calculation is carried out for every sales order individually.
- E. Production orders are created with sales order reference.

Answer: D,E

Explanation:

In make-to-order production, the production planning is initiated only when a sales order is received. The system does not perform a net requirements calculation between individual sales orders or with the make-to-stock warehouse stock¹. Therefore, option B is correct. Additionally, production orders are created with sales order reference, which means that the costs and revenues of the sales order are settled at the end of the production process². Therefore, option E is also correct. The other options are not valid for make-to-order production. Storage location MRP areas are not required for sales-order-specific stock, as the stock is managed at the sales order level³. The reduction of make-to-order stock and requirements does not occur on delivery, but on goods issue to the sales order¹. Sales orders do not have to be ATP-confirmed to be saved, as the availability check is optional and can be performed later. NEW QUESTION # 55

Which of the following are possible configuration steps when setting up the alert monitor in Advanced Planning? Note: There are 2 correct answers to this question.

- A. Create an object selection variant for productionplanningrelated alerts.
- B. Assign the overall profile to the authorization profile.
- C. Create an object selection variant for alerts according to the priority of ATP categories.
- D. Assign the alert profile to the overall profile.

Answer: A,D

NEW QUESTION # 56

.....

We are so proud that we own the high pass rate of our C_TS422_2023 exam braindumps to 99%. This data depends on the real number of our worthy customers who bought our C_TS422_2023 exam guide and took part in the real exam. Obviously, their performance is wonderful with the help of our outstanding C_TS422_2023 Exam Materials. We have the definite superiority over the other C_TS422_2023 exam dumps in the market. If you choose to study with our C_TS422_2023 exam guide, your success is 100% guaranteed.
