

# 2026 SAP C\_BW4H\_2505–Efficient Test Testking

P.S. Free & New C\_BW4H\_2505 dumps are available on Google Drive shared by Real4test: <https://drive.google.com/open?id=1FOYYY2N31FRmIAcX4YRfd-nX91xLaz0C>

If you purchase our C\_BW4H\_2505 preparation questions, it will be very easy for you to easily and efficiently find the exam focus. More importantly, if you take our products into consideration, our C\_BW4H\_2505 study materials will bring a good academic outcome for you. At the same time, we believe that our C\_BW4H\_2505 training quiz will be very useful for you to have high quality learning time during your learning process. Your success is 100% guaranteed with our C\_BW4H\_2505 learning guide!

## SAP C\_BW4H\_2505 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• SAP BW</li><li>• 4HANA Data Flow: This section of the exam measures the practical ability of SAP Consultants to load data within the SAP BW</li><li>• 4HANA environment. It assesses familiarity with data movement and transformation processes across different layers of the system.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• SAP BW</li><li>• 4HANA Modeling: This section targets the skills of Data Engineers in selecting appropriate modeling options and applying best practices like LSA++ within SAP BW</li><li>• 4HANA. It focuses on designing scalable, high-performing data models.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• SAP BW</li><li>• 4HANA Project and the Modeling Process: This section of the exam assesses how Data Engineers guide and contribute to SAP BW</li><li>• 4HANA projects. It includes knowledge of modeling workflows, project lifecycle stages, and collaboration strategies within project teams.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>• Native SAP HANA Modeling: This section evaluates the ability of SAP Consultants to describe and apply native modeling options in SAP HANA. It emphasizes understanding how to build optimized data structures directly within the HANA platform.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>• Data Acquisition into SAP HANA: This section evaluates the capacity of SAP Consultants to integrate various data sources into SAP HANA. It assesses their ability to understand different ingestion techniques and ensure data accessibility for processing.</li></ul>

## Dumps - Real4test

This SAP Certified Associate - Data Engineer - SAP BW/4HANA (C\_BW4H\_2505) software has a simple-to-use interface. By using the C\_BW4H\_2505 practice exam software, you can evaluate your mistakes at the end of every take and overcome them. Our software helps you to get familiar with the format of the original C\_BW4H\_2505 test. Software lets you customize your SAP C\_BW4H\_2505 Practice Exam's duration and question numbers as per your practice needs. You just need an active internet connection to confirm the license of your product. All Windows-based computers support this C\_BW4H\_2505 practice exam software.

### SAP Certified Associate - Data Engineer - SAP BW/4HANA Sample Questions (Q24-Q29):

#### NEW QUESTION # 24

You create a DataStore object (advanced) using the "Data Mart DataStore Object" modeling property. Which behaviors are specific to this modeling property? Note: There are 2 correct answers to this question.

- A. The records are treated as if all characteristics are in the key.
- B. The change log table will be filled only after data activation.
- C. Reporting is done based on a union of the inbound and active tables.
- D. Query results are shown only when data has been activated.

Answer: A,D

#### NEW QUESTION # 25

Which data deletion options are offered for a Standard DataStore Object (advanced)? Note: There are 3 correct answers to this question.

- A. Selective deletion including data of subsequent targets
- B. Request-based data deletion
- C. Selective deletion of data
- D. Deletion of data from all tables
- E. Deletion of all data from active table only

Answer: C,D,E

#### NEW QUESTION # 26

How can the delta merge process be initiated in SAP BW/4HANA? Note: There are 2 correct answers to this question.

- A. By setting a specific flag in the data transfer process
- B. By using a specific process type in a process chain
- C. By setting a specific flag in the transformation
- D. By using the SAP BW/4HANA data load monitor

Answer: B,D

Explanation:

The delta merge process in SAP BW/4HANA is a critical operation that ensures the efficient management of data in column-store tables. It consolidates delta records (new or changed data) into the main store, optimizing query performance and reducing memory usage. This process is particularly important for real-time data replication scenarios and near-real-time reporting.

\* By using a specific process type in a process chain (Option A): In SAP BW/4HANA, process chains are used to automate workflows, including data loads, transformations, and administrative tasks. To initiate the delta merge process, you can include a specific process type in the process chain:

\* Process Type: "Execute Delta Merge" This process type triggers the delta merge operation for the specified Advanced DataStore Object (ADSO) or other relevant objects. By incorporating this step into a process chain, you ensure that the delta merge is executed automatically as part of your data processing workflow.

\* By using the SAP BW/4HANA data load monitor (Option B): The SAP BW/4HANA data load monitor provides a user-friendly interface to monitor and manage data loads. After loading data into an ADSO or other data targets, you can manually trigger the delta merge process directly from the data load monitor. This is particularly useful for ad-hoc executions or troubleshooting scenarios.

where immediate consolidation of delta records is required.

\* By setting a specific flag in the transformation (Option C): Transformations in SAP BW/4HANA are used to map and transform source data into target structures. While transformations play a crucial role in data integration, they do not have a mechanism to trigger the delta merge process. The delta merge is a database-level operation and is not controlled by transformation settings.

\* By setting a specific flag in the data transfer process (Option D): Data Transfer Processes (DTPs) are used to move data between source and target objects in SAP BW/4HANA. While DTPs can be configured to handle delta loads, they do not include a flag or option to initiate the delta merge process.

The delta merge must be triggered separately after the data load is complete.

\* Automatic vs. Manual Execution: In some cases, the delta merge process can be triggered automatically by the system (e.g., after a certain volume of delta records is reached). However, for better control and optimization, it is often initiated manually or via process chains.

\* Performance Impact: Delaying the delta merge can lead to increased memory usage and slower query performance, as queries need to read both the main store and delta store. Regularly executing the delta merge ensures optimal performance.

\* SAP BW/4HANA Administration Guide: This guide explains the importance of the delta merge process and how to manage it effectively in SAP BW/4HANA environments.

\* Link: SAP BW/4HANA Documentation

\* SAP Note 2578930 - Best Practices for Delta Merge in SAP BW/4HANA: This note provides detailed recommendations for configuring and executing the delta merge process, including the use of process chains and the data load monitor.

Correct Answers: Why Other Options Are Incorrect: Key Points About Delta Merge: References to SAP Data Engineer - Data Fabric: By leveraging process chains and the data load monitor, you can ensure that the delta merge process is executed efficiently, maintaining high performance and data consistency in your SAP BW/4HANA system.

#### NEW QUESTION # 27

Which node type is available for both graphical modeling of SAP HANA HDI Calculation Views (XS Advanced) and SAP HANA Calculation Views (XS Classic)?

- A. Minus
- B. Graph
- C. Non Equi Join
- **D. Rank**

**Answer: D**

#### NEW QUESTION # 28

In a DataStore object (advanced) of type Data Mart, which request-based deletion is possible?

- A. Only the most recent request in the active data table
- **B. Only the most recent not activated request in the inbound table**
- **C. Any not activated request in the inbound table**
- D. Any request in the active data table

**Answer: B,C**

#### NEW QUESTION # 29

.....

The objective of Real4test is to provide SAP Certified Associate - Data Engineer - SAP BW/4HANA (C\_BW4H\_2505) exam applicants with C\_BW4H\_2505 actual questions they require to expeditiously crack the SAP C\_BW4H\_2505 Exam Dumps. Customers can be sure they are obtaining the updated C\_BW4H\_2505 PDF Questions, customizable practice exams, with 24/7 customer assistance. Purchase SAP C\_BW4H\_2505 study material right away to get started on the road to success in the real exam.
