You will receive C_S4CPB_2508 exam materials immediately after your payment is successful, and then, you can use C_S4CPB_2508 test guide to learn. Everyone knows that time is very important and hopes to learn efficiently, especially for those who have taken a lot of detours and wasted a lot of time. Once they discover C_S4CPB_2508 study braindumps, they will definitely want to seize the time to learn. However, students often purchase materials from the Internet, who always encounters a problem that they have to waste several days of time on transportation, especially for those students who live in remote areas. But with C_S4CPB_2508 Exam Materials, there is no way for you to waste time. The sooner you download and use C_S4CPB_2508 study braindumps, the sooner you get the certificate.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q40-Q45):

NEW QUESTION # 40
You are recording actions for a custom process step in a test automate
When do you press the "Read" button on the recording panel? Note: There are 2 correct answers to this question.

- A. To capture a value in a text field that should be stored as a variable.
- B. To capture text in a message screen that can be used for data binding later.
- C. To capture a static label on the screen that should be checked during test execution.
- D. To capture an error message on the screen that can be used later.

Answer: A,B

Explanation:
When you are recording actions for a custom process step in a test automate, you press the "Read" button on the recording panel in the following situations:
* To capture a value in a text field that should be stored as a variable. This allows you to reuse the value in other steps or test cases, or to compare it with an expected value1.
* To capture text in a message screen that can be used for data binding later. This allows you to extract data from the message screen and use it as an input for another step or test case2.
You do not press the "Read" button to capture an error message or a static label on the screen, as these are not values that need to be stored or used later. Instead, you can use the "Check" button to verify that the error message or the label is displayed as expected3.
