Once you ensure your grasp on the CIPT questions and answers, evaluate your learning solving the CIPT practice tests provided by our testing engine. This innovative facility provides you a number of practice questions and answers and highlights the weak points in your learning. You can improve the weak areas before taking the actual test and thus brighten your chances of passing the CIPT Exam with an excellent score. Moreover, doing these practice tests will impart you knowledge of the actual CIPT exam format and develop your command over it.

The CIPT certification is ideal for professionals in the field of information technology who work in organizations that handle sensitive data. This includes IT managers, security professionals, software developers, and privacy officers. Certified Information Privacy Technologist (CIPT) certification provides individuals with the necessary skills to manage privacy risks and implement effective privacy policies within their organizations.

Target Audience

This IAPP CIPT evaluation, in particular, is for data privacy specialists who would like to learn how to avert loss brought about by breaches on data privacy. It is also for professionals who want to get the CIPT certification and display their knowledge of strategies, policy, processes, and skills to handle cybersecurity threats.

IAPP CIPT the latest certification exam training materials

The Platform Certified Information Privacy Technologist (CIPT) CIPT Exam credential makes it simple to renew your skills and knowledge to keep up with the latest trends. The Platform Certified Information Privacy Technologist (CIPT) CIPT exam certification is a worthwhile, internationally accepted industry credential. You can become a recognized specialist in addition to learning new technological needs and honing your abilities.

IAPP CIPT (Certified Information Privacy Technologist) Exam is a professional certification exam that measures an individual's knowledge and expertise in the field of information privacy technology. CIPT exam is designed for professionals who work with technology and handle personal data, including IT professionals, software developers, data analysts, and security professionals. The CIPT Certification is offered by the International Association of Privacy Professionals (IAPP), a leading global organization dedicated to promoting and advancing the privacy profession.

IAPP Certified Information Privacy Technologist (CIPT) Sample Questions (Q233-Q238):

NEW QUESTION # 233

What is the main reason a company relies on implied consent instead of explicit consent from a user to process her data?

- A. An explicit consent model is more expensive to implement.
- **B. To secure explicit consent, a user's website browsing would be significantly disrupted.**
- C. Regulators prefer the implied consent model.
- D. The implied consent model provides the user with more detailed data collection information.

Answer: B

Explanation:

Implied consent is often used instead of explicit consent in certain contexts because obtaining explicit consent can be disruptive to the user experience. Explicit consent usually requires the user to perform an additional action, such as clicking a checkbox or filling out a form, which can interrupt their activity on the website.

This disruption can lead to a negative user experience and potentially a decrease in user engagement. The IAPP guidelines emphasize the balance between user experience and the need for consent, noting that implied consent can be sufficient in situations where it is clear that the user understands and agrees to the data processing (IAPP, "Privacy by Design and Default").

NEW QUESTION # 234

What must be done to destroy data stored on "write once read many" (WORM) media?

- **A. The media must be physically destroyed.**
- B. The erase function must be used to remove all data.
- C. The data must be made inaccessible by encryption.
- D. The media must be reformatted.

Answer: A

Explanation:

Explanation/Reference:

NEW QUESTION # 235

What element is most conducive to fostering a sound privacy by design culture in an organization?

- A. Monthly reviews of organizational privacy principles.
- B. Frequent privacy and security awareness training for employees.
- C. Ensuring all employees acknowledge and understood the privacy policy.
- **D. Gaining advocacy from senior management.**

Answer: D

Explanation:

Gaining advocacy from senior management is the element most conducive to fostering a sound privacy by design culture in an organization. Senior management plays a crucial role in setting the tone and direction for privacy practices within an organization and their support is essential for establishing a strong privacy culture.

NEW QUESTION # 236

SCENARIO

Please use the following to answer next question:

EnsureClaim is developing a mobile app platform for managing data used for assessing car accident insurance claims. Individuals use the app to take pictures at the crash site, eliminating the need for a built-in vehicle camera. EnsureClaim uses a third-party hosting provider to store data collected by the app. EnsureClaim customer service employees also receive and review app data before sharing with insurance claim adjusters.

The app collects the following information:

First and last name

Date of birth (DOB)

Mailing address

Email address

Car VIN number

Car model

License plate

Insurance card number

Photo

Vehicle diagnostics

Geolocation

All of the following technical measures can be implemented by EnsureClaim to protect personal information that is accessible by third-parties EXCEPT?

- A. Encryption.
- B. Multi-factor authentication.
- **C. De-identification.**
- D. Access Controls.

Answer: C

Explanation:

While encryption, access controls, and multi-factor authentication are all technical measures that can protect personal information, de-identification specifically refers to the process of removing or modifying personal data so that individuals cannot be readily identified. Since EnsureClaim needs to provide personal data to third parties (such as insurance claim adjusters) for specific purposes (e.g., claim assessment), de-identification would not be appropriate as these third parties require access to identifiable information to perform their roles effectively.

NEW QUESTION # 237

To comply with the Sarbanes-Oxley Act (SOX), public companies in the United States are required to annually report on the effectiveness of the auditing controls of their financial reporting systems. These controls must be implemented to prevent unauthorized use, disclosure, modification, and damage or loss of financial data.

Why do these controls ensure both the privacy and security of data?

- **A. Disclosure of data is an aspect of privacy; unauthorized use, modification, and damage or loss of data are aspects of security.**
- B. Modification of data is an aspect of privacy; unauthorized use, disclosure, and damage or loss of data are aspects of security.
- C. Unauthorized use of data is an aspect of privacy; disclosure, modification, and damage or loss of data are aspects of security.
- D. Damage or loss of data are aspects of privacy; disclosure, unauthorized use, and modification of data are aspects of privacy.

Answer: A

The Sarbanes-Oxley Act (SOX) requires public companies in the United States to establish auditing controls that ensure the security and privacy of financial data. Privacy controls focus on protecting the disclosure of data, ensuring that it is only shared with authorized entities. Security controls, on the other hand, protect against unauthorized use, modification, and damage or loss of data. These controls collectively ensure that financial data is not only kept confidential (privacy) but also remains accurate, available, and secure (security).
