- C. innovation risk
- D. Cyber security risk

Answer: D

NEW QUESTION # 31

A commercial service provider has a strategy to introduce cloud storage services that will be popular with a wide range of consumers in multiple markets. Features will include fast upload speeds and secure storage.

Which should be included in the operating model for the new service?

- A. The infrastructure, skills and processes required to support the service
- B. User access via a wide range of channels and platforms
- C. A user-friendly interface that is available anytime, from any location
- D. Free limited storage combined with a tiered charging structure

Answer: A

NEW QUESTION # 32

A software development organization has a very traditional way of working that no longer meets their market needs. They currently manage all budgets via their development and operations business units. They want to change so that they can develop and deploy solutions rapidly in response to constantly changing market needs.

How should they change their funding model to support this?

- A. Switch to funding programmes and protects
- B. Switch 10 funding teams and value streams
- C. Provide additional funding to development and operations
- D. Provide additional funding via the research and development budget

Answer: B

Explanation:

Switching to funding teams and value streams is the best way to change their funding model to support their objective of developing and deploying solutions rapidly in response to constantly changing market needs. Funding teams and value streams means allocating budgets based on the value delivered by cross-functional teams working on end-to-end processes that create value for customers.

This can help increase agility, flexibility, collaboration, and innovation. Reference: ITIL 4 Leader: Digital and IT Strategy, page 50-51
