SAP Certified Associate - Implementation Consultant - SAP SuccessFactors Onboarding Sample Questions (Q74-Q79):

NEW QUESTION # 74

Which business rules do you have to configure for the Review New Hire Data and Personal Data Collection steps?

Note: There are 2 correct answers to this question.

- A. SAP_ONB2_PreDay1AccessCheck
- B. SAP_ONB2_ECDataCollectionCheck
- C. SAP_ONB2_DataCollectionConfigSelect
- D. SAP_ONB2_HMReviewCheck

Answer: B,D

Explanation:

Business rules in SAP SuccessFactors Onboarding are essential for automating and validating processes like the Review New Hire Data and Personal Data Collection steps. These rules ensure that data is collected correctly and reviewed by the appropriate users. According to the SAP SuccessFactors Onboarding Implementation Guide:

* SAP_ONB2_ECDataCollectionCheck (Option B): This rule is configured in Configure Business Rules to validate data collected during the Personal Data Collection step, ensuring it meets Employee Central requirements (e.g., mandatory fields are completed).

* SAP_ONB2_HMReviewCheck (Option D): This rule assigns the Review New Hire Data step to the hiring manager and ensures that the collected data is reviewed for accuracy before proceeding in the onboarding process.

Option A (SAP_ONB2_DataCollectionConfigSelect) is incorrect because it is not a standard rule for these steps; it does not exist in the system. Option C (SAP_ONB2_PreDay1AccessCheck) is incorrect because it controls access before the start date, not data collection or review.

NEW QUESTION # 75

How can you create a new hire Onboarding record?

Note: There are 3 correct answers to this question.

- A. By importing a CSV file through Integration Center
- B. By integrating with an external applicant tracking system
- C. By importing a CSV file in Admin Center
- D. By integrating with SAP SuccessFactors Recruiting Management
- E. By using Add New Hire to Onboarding in Admin Center

Answer: B,D,E

Explanation:
Creating a new hire Onboarding record in SAP SuccessFactors Onboarding can be done through manual, automated, or integrated methods, depending on the system configuration and integration setup.
According to the SAP SuccessFactors Onboarding Configuration Guide:
* By using Add New Hire to Onboarding in Admin Center(Option C): Administrators can manually create an Onboarding record using theAdd New Hire to Onboardingtool in Admin Center, which initiates the Onboarding process for a new hire.
* By integrating with SAP SuccessFactors Recruiting Management(Option D): When integrated, SAP SuccessFactors Recruiting Management automatically creates an Onboarding record when a candidate is moved to theHiredstatus, triggering the Onboarding process.
* By integrating with an external applicant tracking system(Option E): External applicant tracking systems (ATS) can integrate with SuccessFactors Onboarding via APIs or middleware, creating Onboarding records when candidate data is transferred.
Option A (importing a CSV file in Admin Center) is incorrect because there is no direct CSV import option in Admin Center for creating Onboarding records. Option B (importing a CSV file through Integration Center) is incorrect because Integration Center is used for data exports or imports for other purposes, not specifically for initiating Onboarding records.
