What's more, C-S4CPB-2502 Exam Braindumps are famous for instant access to download, and you can receive downloading link and password within ten minutes, so you start the training right now. You can enjoy free update for 365 days for C-S4CPB-2502 test materials after payment, and the update version will be sent to you automatically.

## SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q45-Q50):

### NEW QUESTION # 45

In which application can you see the available business context capacity remaining for extension items?

- A. Extensibility Explorer app
- B. **Extensibility Cockpit app**
- C. Custom Reusable Elements app
- D. Extensibility Inventory app

**Answer: B**

Explanation:

The Extensibility Cockpit app within SAP S/4HANA Cloud Public Edition is a central tool for managing and monitoring the extensibility aspects of the system. It provides an overview of the extension items created, including custom fields, custom business objects, and other extension elements. Importantly, it also shows the available business context capacity remaining for these extension items, which is crucial for ensuring that the system's extensibility is managed within the provided limits. This helps in planning and managing customizations effectively, ensuring that the system remains scalable and performant.

**NEW QUESTION # 46**

What are some characteristics of the SAP S/4HANA Migration Cockpit? Note: There are 2 correct answers to this question.

- A. Guidance and simulation of the migration process
- B. Extensibility using the Legacy System Migration Workbench
- C. Mapping source values to SAP S/4HANA target values
- D. Combining the local and remote schema approaches into one migration project

**Answer: A,C****NEW QUESTION # 47**

When do you specify the data retention period in the SAP S/4HANA Migration Cockpit?

- A. When the project status is "Not Started"
- B. When the project status is "Finished"
- C. When the project status is "In Progress"
- D. When the project status is "Completed"

**Answer: B**

Explanation:

You specify the data retention period in the SAP S/4HANA Migration Cockpit when the project status is "Finished". The data retention period is the length of time (in days) that the project and all associated data is kept in the system after you have set the status of the project to Finished. To do this, set the option Data Retention Period to On. The data will be deleted from the SAP S/4HANA system when the data retention time expires. If you set the option Data Retention Period to Off, then the project and all associated data will be kept in the system indefinitely. You can also change the retention time for finished projects on the Technical Information tab of the project settings. References = The Migration Project Screen, Migrating Data to the SAP S/4HANA System

**NEW QUESTION # 48**

Where is the initial list of known integrations documented?

- A. In the Fit-to-Standard Workshops
- B. In the Business Driven Configuration Questionnaire
- C. In SAP Cloud ALM
- D. In the Digital Discovery Assessment

**Answer: B**

Explanation:

The initial list of known integrations is documented in the Business Driven Configuration Questionnaire (BDCQ). The BDCQ is a tool that helps you to capture the business requirements and scope of your SAP S/4HANA Cloud Public Edition project. It contains a series of questions that cover different aspects of your business processes, such as organizational structure, master data, configuration settings, and integration scenarios. The BDCQ also provides guidance on the best practices and recommendations for your project12.

One of the sections in the BDCQ is the Integration section, where you can document the initial list of known integrations that are relevant for your project. The Integration section contains questions about the integration scenarios that you want to enable, such as cross-system process integration, data replication, data migration, and third-party integration. The Integration section also provides information on the available integration options, such as SAP Cloud Platform Integration, SAP API Business Hub, and SAP Cloud

ALM13.

The initial list of known integrations is important for your project, as it helps you to identify the integration requirements, dependencies, and risks that need to be considered in the project planning and execution. The initial list of known integrations also helps you to select the appropriate integration tools and methods, and to align the integration scope with the SAP S/4HANA Cloud Public Edition roadmap and release cycles13.

Therefore, the correct answer is A, as the initial list of known integrations is documented in the BDCQ. References = 1 Business Driven Configuration Questionnaire - SAP Help Portal 2 Business Driven Configuration Questionnaire - SAP Community 3 SAP S/4HANA Cloud Public Edition Integration - SAP Help Portal

#### **NEW QUESTION # 49**

Which tools does SAP provide to make it easier for customers to maintain their SAP S/4HANA Cloud systems after a release upgrade? Note: There are 2 correct answers to this question.

- A. Test Automation Tool
- B. Release Assessment and Scope Dependency Tool
- C. What's New Viewer Tool
- D. SAP Signavio Process Navigator Tool

**Answer: A,C**

Explanation:

SAP provides several tools to facilitate the maintenance of SAP S/4HANA Cloud systems following a release upgrade, ensuring that customers can smoothly transition to the latest functionalities and improvements:

\* What's New Viewer Tool: This tool is invaluable for understanding the changes and new features introduced with each SAP S/4HANA Cloud release. It provides detailed descriptions of new functionalities, improvements, and changes in the system, helping customers to adapt their processes and leverage new capabilities effectively. It serves as a guide to explore and understand the enhancements that come with each upgrade.

\* Test Automation Tool: Post-upgrade, it's crucial to ensure that existing functionalities continue to work as expected and new features are correctly implemented. The Test Automation Tool allows customers to automate testing of business processes, significantly reducing the time and effort required for testing after a release upgrade. This tool helps in identifying any issues arising from the upgrade early in the process, ensuring a smooth transition to the new release.

These tools are designed to assist customers in navigating the complexities of system upgrades, ensuring that they can make the most out of new features while maintaining their existing system's stability and performance.

#### **NEW QUESTION # 50**

.....
